AE911Truth will hold a press conference on Friday, February 19, at 11:00 AM at the [Marines Memorial Club and Hotel](#) in San Francisco. We will announce and honor the milestone of our achievement of obtaining [1,000 architects and engineers](#) (A/E's) petitioning for a real investigation into the destruction of the 3 World Trade Center skyscrapers.

Invitations are being sent to more than 400 local AIA members, to many local, national, and international media outlets, and to more than 15,000 AE911Truth.org petition signers and supporters from around the world.

The press conference will include a large-screen scrolling display of all 1,000 A/E's; statements by Richard Gage, AIA, founder of AE911Truth and several petition signers; and a short ten-minute presentation of "9/11: Blueprint for Truth" - the explosive evidence for the engineered destruction of the 3 World Trade Center skyscrapers. A press kit including the AE911Truth DVD will be made available to all attendees.

We will also be inviting various leaders in the 9/11 Truth movement to this milestone event. We are working with We Are Change and other 9/11 Truth organizations to deliver hardcopy [petition evidence press kits](#) to every member of Congress.

A fund-raising and working luncheon will be held after the press conference in the hotel. It is open to all who RSVP to an imminent email invitation. Join us on February 19 in San Francisco to honor this remarkable achievement and meet some of those who have made AE911Truth one of the most respected voices in the 9/11 Truth movement.

Following the above events we will host a professional conference open to our architect and engineer petition signers. RSVP and join us from 2 p.m. to 6 p.m. for this critical get together of fellow professionals to further organize strategy for AE911Truth. We will be reviewing our existing evidence content and programs as well as employing our expertise and energy in amplifying and disseminating the AE911Truth message. Our goal: a real WTC investigation.

Mr. Gage, said "It's an extraordinary statement that more than 1,000 architects and engineers have put their credibility and reputations on the line to demand a new investigation into 9/11. Compare this number to a dozen or so that are willing to publicly support the official NIST findings. We expect big breakthroughs in 2010."

Michael Newman, NIST Media Relations, when asked if NIST had any comments on the fact that over 1,000 architects and engineers have signed the petition, said that "NIST stands

behind its reports.” Its position is the same as it always has been, and that “NIST saw no evidence of explosions or melted steel whatsoever.”

NIST will have another wake-up call soon. The voices of thousands of petition signers of Architects & Engineers for 9/11 Truth and everyone who supports a new investigation grow louder and louder. Soon our irrefutable evidence in support of a new investigation will no longer be ignored. We now have the solid foundation of 1,000 A/E petitioners. We are launching the effort to force NIST to retract their flawed and fraudulent reports. Using all avenues available, whether through the Office of the Inspector General, or through Congressional investigations, factually correct findings based on the evidence must become the official position. The American public must come to see such public statements of denial by NIST as being totally unacceptable.
