

13 Current Trends of “Operation Coronavirus”: “Remain Sane in an Insane World”

January 2022. More and More Truth Coming to Light

By [Makia Freeman](#)

Here are the latest COVID trends, following on from the COVID trends summarized in [August](#), [September](#), [October](#), [November](#) and [December](#) last year in 2021. The news is a mix of good and bad, with COVID tyranny continuing but with more and more truth coming to light. Although some US courts are ruling in pro-freedom ways, the current mentality of some US Supreme Court judges leaves a lot to be desired. This month’s report features some of the deeper aspects of the NWO (New World Order) COVID operation: depopulation and microchipping. Here are the 13 current COVID trends as of January 2022.

COVID Trend #1: Depopulation Becomes Apparent? Life Insurance CEO says Mortality Rates for Working Age People Increased by 40%

In yet another moment when conspiracy theory became conspiracy fact (as been happening all the time since the COVID scandemic began), people were shocked to learn that the mathematics is showing the reality of the depopulation agenda. After all, insurance companies are in the business of accurate mortality data. The CEO of OneAmerica, Scott Davison, [announced](#) that death rates for people aged 18-64 had increased by 40%:

“We are seeing, right now, the highest death rates we have seen in the history of this business – not just at OneAmerica ... The data is consistent across every player in that business ... Just to give you an idea of how bad that is, a three-sigma or a one-in-200-year catastrophe would be 10% increase over pre-pandemic. So 40% is just unheard of.”

OneAmerica is not a small player in the life insurance industry. It brings in [about 2 billion dollars in revenue](#) annually and it has been around for more than 140 years:

“OneAmerica is a major insurance company located in Indianapolis with annual revenue of around \$2 billion and total assets of around \$74 billion. This is not a fly-by-night internet “insurance” company. OneAmerica is the real deal, selling both individual and group life insurance, and it has data and actuarial tables that go back 145 years.”

The first-linked article actually states that *“most of the claims for deaths being filed are not classified as COVID-19 deaths”* which lets the cat out of the bag.

This echoes the predictions of doctors like Dr. Michael Yeadon and Dr. Sucharit Bhakdi who stated that the COVID vax would result in genocide or mass murder. Of course, the NWO (New World Order) controllers and architects of the scandemic would have wargamed and simulated this scenario out.

They would have known very well this would happen.

They would have known that this scenario of mass death would eventuate, and they would have also known that many of these deaths would be attributed to different causes, thereby sparing the COVID fake-vaccine from blame. If someone gets a stroke from the COVID vax while driving and then crashes the car, it would be a traffic fatality. If someone loses their balance and falls off a ladder or down the stairs to die of head injuries, the vax would escape liability. If an athlete dies unexpectedly on the pitch or court, it could be chalked up to something else.

This entire sad and shocking scenario, unfolding right before our eyes, had been baked into the cake. Just how far it will go is still anyone’s guess. However, depopulation is only one of the agendas here, and I would suggest that the transhumanist agenda, i.e. the agenda to make a slave class of machine-like and controllable citizens, is a more prominent motivator for the NWO criminals than the desire to kill everyone. I would suggest that, to the NWO, those who don’t survive the clot shot and the transforming of their genes are more like collateral damage, eugenic weaklings, useless eaters and/or cannon fodder for the ultimate agenda.

COVID Trend #2: Company is Already Selling a COVID Passport Microchip

The article [*Covid passport microchip developer says chipping humans is happening “whether we like it or not”*](#) reports how a Swedish company Dsructive Subdermals has developed a microchip installed under the skin that can be scanned to reveal COVID vaccination status. It quotes Hannes Sjobald, the company’s managing director, who spoke to Express:

“This technology exists and is used whether we like it or not.

I am happy that it is brought into the public conversation.

New technologies must be broadly debated and understood.

Smart implants are a powerful health technology.

That is what we are building at Dsructive and our goal is to transform healthcare on a global scale.”

Sjobald said the technology makes the vaccine passports more “accessible.”

“This means it is always accessible for me or for anyone else, really, who wants to read me.

For example, if I go to the movies or go to a shopping center, then people will be able to

check my status even if I don't have my phone.”

Sweden seems to have been chosen as the place to first roll out human microchipping agenda. The fact that the COVID agenda has helped advance this more sinister, longstanding agenda is highly disturbing. This underscores the gravity of the situation humanity is in as 2022 begins and people worldwide fight for their rights and freedom.

COVID Trend #3: Some Nations Roll Out Digital Tech Combining State ID, Driver's License and COVID Vaccine Status

The microchip or nanochip is the end goal, but there are stepping stones along the way. The COVID pandemic has always just been the vehicle for the NWO technocrats to push forward their deeper agendas. Chief among these is the all-encompassing social credit system with one system or form of ID that tells officials everything about you, including your so-called health status (not that these sociopaths have any idea what true health is). This [article](#) reveals that Greece is poised to introduce a full mobile version of its digital ID/driver's license. This COVID trend is occurring worldwide.

COVID Trend #4: Numerous US Federal Officials Make Stunning Admissions that Contradict the Official Narrative

As the new year starts, some federal officials have made some surprising and embarrassing admissions which contradict the official narrative. Teleprompter-in-chief Joe Biden [admitted](#) that there was no federal solution to COVID, thus confirming the limitation of the US Federal Government to try to force things like vaccine mandates onto Americans.

Vaccine pusher-in-chief Dr. Anthony Fauci [admitted](#) that the mandates were just a mechanism to get more people vaccinated. Another vaccine pusher, CDC director Rochelle Walensky, [admitted](#) that the reason the CDC recently changed the quarantine period from 10 days to 5 days was that they thought people would tolerate it more. Hmm ... weren't all these measures supposed to be based on science, not how much tyranny people would endure? Walensky also [admitted](#) that 75% of COVID deaths occurred in people with at least 4 comorbidities. Did you catch that? Talk about letting the cat out of the bag.

The CDC also just [admitted](#) that PCR positive results could last up to 12 weeks, way after supposed infection. The PCR technique was the standard used by governments worldwide to declare an emergency and a pandemic. It also led of course to the phenomenon of the casedemic. With the CDC now in 2022 [withdrawing its request \(to the FDA\) for an EUA \(Emergency Use Authorization\) for the COVID PCR "test,"](#) this essentially means the CDC is no longer endorsing the validity of the PCR technique as a legitimate COVID diagnostic tool. Based on this, it may be possible for more lawsuits pushing back against the tyranny to be successful. Patrick Wood [writes](#):

“So, the CDC is pulling the experimental RT-PCR test while telling clinicians to find “authorized COVID-19 diagnostic methods” instead. You don't need to be a PhD, MD or epidemiologist with a peer-reviewed study to figure this out. In fact, you don't need any medical expertise whatsoever.

An unapproved experimental testing diagnostic was used to trick people into taking unapproved experimental mRNA injections.”

Here are the [current list of tests](#) the FDA approves for “COVID” (whatever you think that is):

diagnostic tests (molecular tests and antigen tests), serology/antibody tests and tests for management of COVID patients. There is potential for there to be [just as much fakery with the serology/antibody tests](#) as with PCR, unfortunately: the exact same result could be interpreted differently, and [antibodies are not a true measure of immunity](#).

COVID Trend #5: Authorities Intensify their Vitriol against the Unvaxxed

Another noticeable COVID trend of late has been the increasing tendency of those in power to dehumanize the unvaccinated – a trend I warned about in my February 2021 article [The COVID Cult and the 10 Stages of Genocide](#). In that article, I discussed how a group of people could gradually be made the enemy of the state through isolation, discrimination, dehumanization and (eventual) murder. The rhetoric of 2 political leaders – French President Macron and Canadian PM Trudeau – is extremely disturbing, as is that of a German police officer.

Macron recently said that he really wants to piss the unvaccinated off and make life difficult for them. He actually [said](#) that *“when my freedom threatens that of others, I become irresponsible. An irresponsible person is no longer a citizen,”* which could imply that he thinks governments should regard the unvaccinated as non-citizens, or that he proposes stripping people of citizenship if they refuse to comply with vaccine mandates. Trudeau [asked](#) whether the unvaccinated should be tolerated. In Germany, a police officer [called unvaccinated people indirect killers and said they were not human!](#) This kind of rhetoric is not simply judgemental and aggressive; it is indicative of a mass hypnosis and psychosis I discussed in [previous articles](#).

COVID Trend #6: Freudian Slips – Authorities Get a Little Too Honest

Those paying close attention to the words of our misleaders can sometimes find some startling admissions. The most recent egregious example was WHO head Tedros who [admitted](#) that *“it’s better to focus on those groups who have risk of severe diseases and death, rather than as we see some countries are using to give boosters to kill children, which is not right.”* His English is a little wobbly, but his meaning is clear enough. Why would he say that the COVID boosters kill children?

COVID Trend #7: Bills Introduced that, If Passed, Would Authorize Health Officers to Arrest and Detain the Unvaxxed

There are several proposed [New York State](#) (although A416 has now been [stricken](#) probably due to public outcry) and Washington State Bills which, if passed, would allow the State (via techniques like giving the Health Officer sheriff-like powers) to “involuntarily detain” unvaccinated people. In the case of [Washington State](#), it would authorize a “strike force” to enter people’s homes. To say these kind of bills are unconstitutional and outrageous is a gross understatement. They absolutely gut the 4th, 5th and 6th amendments, among many others, and proceed on the assumption of guilty until proven innocent per the [new bioterrorism model](#).

COVID Trend #8: Shocking Number of Athlete Heart Attacks

According to this [article](#), as of January 2022, there have been 405 athlete cardiac arrests and 237 athletes who have died after COVID shot – an unprecedented pattern in the history of sport. How many more athletes need to die (which is very conspicuous after all) before

more people put 2 and 2 together?

COVID Trend #9: More Research Shows Vaccines Ruin the Immune System Permanently

Another important COVID trend is the ever-increasing number of studies showing just how dangerous the new COVID DNA/mRNA devices are (falsely called vaccines). The Daily Expose ran this [article](#) explaining how studies prove that the non-vaccines damage the immune system, probably permanently, while official German Government data suggests that the [fully vaccinated will develop AIDS](#) (Acquired Immunodeficiency Syndrome) by the end of this month - January 2022.

COVID Trend #10: Unhealthy Bureaucrats Restrict the Rights of Healthy Citizens - Based on the Idea They Know More About Health

US Defense Secretary [Lloyd Austin](#), double masked and reportedly triple vaxxed, still got COVID. Australian PM Scott Morrison tried to deny world tennis #1 men's player, Novak Djokovic, from entry into Australia (but at this stage Novak won the legal fight). Both soldiers and athletes in general train long hours and are indisputably in great shape. The chance of them getting sick of anything is very low compared to the average person, and yet they are being dictated to, and having their rights stripped away, by unhealthy, often obese bureaucrats and politicians who claim they know more about health than their citizens. What a clownworld we inhabit.

COVID Trend #11: The Meaning of Fully Vaccinated Continues to Be Altered

This COVID trend has been a long time coming, because [being fully vaccinated is an endless destination](#). The ruling class is always fine-tuning their buzzwords and propaganda phrases for maximum effect in molding perception. Nothing is left to chance. Also, they want a permanent control system where fully vaccinated means you have done anything and everything they want, and if you have disobeyed any decree, then they'll change your designation (the essence of the social credit system). Dr. Fraud-ci recently [announced](#) that they will be changing the term "fully vaccinated" to "up to date":

"A few weeks ago, Dr. Anthony Fauci hinted that the federal government would soon change its definition of "fully vaccinated" to include not just the two original shots but at least one booster dose as well.

But in the latest indication that Dr. Fauci has succeeded in pushing this scheme, the

good doctor said Tuesday during a lecture at the National Institutes of Health that new terminology would be used in place of the “fully vaccinated” language. Instead of referring to somebody as “fully vaccinated”, they will be referred to as having their vaccinations “up to date” to reflect the notion that they have gotten their booster shots.

“We’re using the terminology now ‘keeping your vaccinations up to date,’ rather than what ‘fully vaccinated’ means,” Fauci said during a National Institutes of Health lecture Tuesday.”

COVID Trend #12: Several US Supreme Court Judges Show Their Supreme Lack of Knowledge about the Scamdemic

The US Supreme Court may be weighing in on some of the COVID restrictions that have been foisted upon the American people, but their decisions will only be as good as how well informed they are. In a recent discussion, [Judge Sotomayor showed herself to be woefully misinformed](#) about the number of child COVID cases. We can only hope that truth will prevail in the 9-person panel when it comes to them actually making a decision. Sovereign Man Simon Black [writes](#):

“You probably heard that the US Supreme Court heard oral arguments on Friday regarding the federal government’s vaccine mandate. Specifically, Hunter Biden’s dad told the Occupational Safety Health Administration, which regulates workplace safety, to require businesses across America with more than 100 employees to mandate vaccines in the workplace, or masking/testing. This order was almost immediately challenged, and the case was heard in two separate federal courts. One court ruled in favor of an injunction, the other ruled against it. And so the case landed rather quickly in front of the US Supreme Court ...I listened to the entire 4+ hours of audio over the weekend, and frankly some of the Justices’ remarks were simply ridiculous. First, it’s worth pointing out that everyone in the room had to produce a negative COVID test before being allowed to enter. Everyone present was double vaccinated, and most were boosted. And almost everyone was wearing a mask. Yet Justice Sotomayor still refused to be in the room. She phoned it in from her private office down the hall. Clearly it doesn’t matter what protocols are in place; this person has chosen to be terrified no matter what. And unsurprisingly her remarks smacked of fear, paranoia, and ignorance. Sotomayor stated that, for example, that “over 100,000” children are in serious condition, i.e. hospitalized, “many on ventilators”. This is 100% patently false. Even the CDC had to refute her comments. Nevertheless, Sotomayor thinks that the OSHA mandate is a great idea and will save lives. Therefore she seems to have no problem with it, regardless of the legality. She even concluded that since Congress isn’t willing to pass a law requiring a nationwide vaccine mandate, that OSHA should do it.

Similarly, Justice Breyer was practically exasperated in citing all the death statistics and case numbers, and wondered how in the world could anyone possibly be against the OSHA order? Justice Kagan chimed in stating that “we all know” that OSHA has put forth “the best policy”. Apparently she speaks for all of us. These are all extraordinary comments. And their general nature was that these Justices like the OSHA mandate, therefore they’re in favor of it. This is a gross, despicable violation of their most sacred responsibility. Their personal opinion about the OSHA order is not relevant. The only thing that matters is whether or not it’s legal.”

Meanwhile, lower federal court judges have delivered some good results recently, including a judge who rejects the FDA's proposed 75 year delay on vax data by ordering them to [release all of it in 8 months](#).

COVID Trend #13: US Federal Court Decisions Uphold Religious Exemption

Another important COVID trend is the upholding of the religious exemption to the vaccine. Religious exemptions, like medical and philosophical exemptions, have been repeatedly [under attack even before the scandemic](#). Recently, a US Federal Judge [ruled in favor of unvaccinated Navy SEALs](#) and blocked the Pentagon from punishing them.

Final Thoughts: Remain Sane in an Insane World

I have often heard people over the years talk about the importance of being or remaining free in an unfree world, and giving advice on how to do that. I agree, but in today's world, I would take it one step further: we need to remain sane in an insane world. The idea of mass formation psychosis (as discussed in [previous articles](#) months ago), that has developed since the scandemic began, has begun to spread. People are getting used to the idea that the world at large has been hypnotized. The key here is to remain sane by being aware of all the insanity that could penetrate your consciousness. This is no mean feat. However, unlike a supposed killer virus, sanity is contagious. The more people that can do this, the more it will spread to others.
