Krystle Cordingley mourns her son Corbyn who died 14 hours after a flu shot.

Krystle claims that the hospital tried to cover up what happened, and doctors said his death following vaccination was a coincidence.

Finally, she reports, one honest MD said, yes, it was the vaccine that caused the severe damage to Corbyn’s brain stem.

Could you image going home to find your baby murdered in his bed, out of nowhere.

You didn’t get to fight for him. You didn’t get to try and save him. Because all that you found was him dead.

And then you had people tell you, “No, it wasn’t the flu shot. There’s no way it could have been the flu shot that killed him. It was just a coincidence.”

It wasn’t a coincidence that he got it 14 hours prior.

Leaving a lucrative career as a nephrologist (kidney doctor), **Dr. Suzanne Humphries** is now free to actually help cure people.

In this autobiography she explains why good doctors are constrained within the current corrupt medical system from practicing real, ethical medicine.

One of the sane voices when it comes to examining the science behind modern-day vaccines, no pro-vaccine extremist doctors have ever dared to debate her in public.
