[Gianluca Vialli](#) was an iconic [soccer](#) player and manager who played as a striker.

He [passed away](#) on January 6, 2023, at the age of 58 following a [battle with pancreatic cancer](#).

My Take...

14 professional soccer players dead within last 6 months, age range 15 to 58.

Causes of death:

- 5 cardiac arrests and sudden deaths while playing a game
- 1 cardiac arrest while sitting on a terrace
- 1 cardiac arrest while at work
- 3 heart attacks
- 2 unknown causes
- 2 turbo cancers (skin, pancreas)

Just like with NFL players I wrote about yesterday, maybe not all of these deaths will be COVID-19 vaccine related but probably most of them will be.

This is the same pattern of “causes of deaths” we see with other COVID-19 vaccinated athletes. Fascinatingly, 5 deaths occurred while playing a game.

The Worldwide Corona Crisis, Global Coup d’Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”
