190 scientists from 38 nations have submitted the International EMF Scientist Appeal to the United Nations, UN member states and the World Health Organization (WHO) requesting they adopt more protective exposure guidelines for electromagnetic fields (EMF) and wireless technology in the face of [increasing evidence of risk](#) from this rapidly increasing environmental pollutant.

The scientists who have signed the Appeal have collectively published over 2,000 peer-reviewed papers on the biological or health effects of non-ionizing radiation. It was submitted on 11 May 2015 to His Excellency Ban Ki-moon, Secretary-General of the United Nations, to Dr. Margaret Chan, MD, Director General of the World Health Organization, and to the United Nations Member States.

Here is Dr. Martin Blank's three-minute video announcing the Appeal. Dr. Blank has had over 30 years of experience conducting EMF research at Columbia University and is a past president of the International Bioelectromagnetics Society.

In his own words, Dr. Blank gives a compelling explanation of the major health crisis we are facing due to increasing levels of environmental pollution from growing and expanding EMF sources.

We encourage you to read quotes about the importance of this Appeal by some of the scientists who signed it: <http://www.emfscientist.org/index.php/science-policy/expert-emf-scientist-quotations>
