(I was informed by inside sources that Andrew suspected the COVID-19 mRNA Vaccines as the cause of his pancreatic cancer)

[Obituary](#)

Well, it is kind of awesome to write your own obituary. It's not very often that someone has this opportunity. My symptoms initially manifested in November 2022 with relatively mild gastrointestinal issues. The doctors ran through their checklists and couldn't find a root cause. Biopsies came back with no sign of malignancy, blood work returned completely normal, and weight loss stopped. It was at this point, Thanksgiving, I might have had a chance with the Whipple surgery. However, I was not a good candidate based on all the normal tests. In hindsight, I was probably already dead and doing a Whipple could have sped my demise (due to recovery complications).

By December, I had developed a cough. Looking back, the cough was the indicator that the cancer had spread to the lungs. It's now July and I have seen and experienced much. I am thankful for the time I have received and I am thankful for everyone that has poured in their time to me and my family. We are truly blessed beyond measure.

Without further ado... here is my obituary:

Lieutenant Colonel Andrew James Lingenfelter, age 37, of Wright Patterson Air Force Base in Dayton, Ohio, passed away on July 19, 2023 after a courageous battle with pancreatic cancer. Andrew was surrounded by loved ones who will continue to honor his legacy by living their lives to the fullest.

Andrew was born on January 27, 1986 to Kimberly Marie (Miller) and Burton Paul Lingenfelter in Plainview, Nebraska. After Andrew graduated from Plainview Public Schools in 2004, he went on to study at the University of Nebraska in Lincoln on an Air Force ROTC scholarship.

After graduating with a degree in mechanical engineering, he started his first job at Eglin Air Force Base as a 2nd Lieutenant, kickstarting a fourteen plus year career in Air Force Acquisitions.

In 2005, Andrew met Lindsey at Northeast Community College where they were both taking summer courses. Andrew and Lindsey went on to have four biological children, Samson, Rhett, Sawyer, and Helena, and one adopted child, Otto.

Andrew was passionate about airplanes and working on his commercial pilot's license when diagnosed with cancer. He lived by the slogan on his favorite t-shirt: I'd rather be flying! Andrew was also infatuated with cooking meats on his Big Green Egg and was famous in all circles for smoked brisket, roasted leg of lamb, and pulled pork.

In 2011, Andrew earned a master's degree in industrial and systems engineering from the University of Florida. In 2016, Andrew earned a PhD in aeronautical engineering from the Air Force Institute of Technology.

Andrew loved his family and friends, the farm, food, flying, football, and fun - all the important f words. The doctor that delivered the diagnosis of pancreatic cancer told him it was the bad luck lottery of death - too young and zero risk factors. Andrew replied that it could be true, but he definitely had the good luck lottery of life with his relationships and accomplishments. Andrew won several Air Force awards for his research, papers, videos, and athletics and was proud to be lead snack officer at Wright Patt.

Andrew is survived by his children, Samson (15), Rhett (13), Sawyer (11), Helena (9), and Otto (6); his wife, Lindsey; his parents, Burton and Kimberly; his brother Luke (Kayla) of Overland Park, KS; his sister Mary (Tyler Abbenhaus) of Bloomfield, NE; his brother Benjamin (Alexis) of Overland Park, KS; his grandparents James and Sharon Miller of Hampton, NE; and many uncles, aunts, cousins, nieces, and nephews.

Services will be held in Ohio at Beaver Creek UCC on Tuesday, July 25, 2023 at 11:00 AM with visitation from 5:00-7:00 PM on Monday, July 24, 2023. Celebration of life and burial will be in Plainview, Nebraska at the Plainview United Church of Christ on Friday, August 4, 2023 at 2:00 PM. A short graveside ceremony will be held in Plainview following the service, followed by a BBQ, in honor of Lieutenant Colonel Lingenfelter, lead snack officer. Both services will have a patriotic theme. Memorial donations may be made to the Wright Patterson Fisher House, an organization dear to Andrew and the Lingenfelter family.

Fond memories and expressions of sympathy may be shared at www.tobias-fh.com for the Lingenfelter family.

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”

Reviews

This is an in-depth resource of great interest if it is the wider perspective you are motivated to understand a little better, the author is very knowledgeable about geopolitics and this comes out in the way Covid is contextualized. —Dr. Mike Yeadon

In this war against humanity in which we find ourselves, in this singular, irregular and massive assault against liberty and the goodness of people, Chossudovsky’s book is a rock upon which to sustain our fight. -Dr. Emanuel Garcia

In fifteen science-based chapters, Michel traces the false covid pandemic, exposed by a PCR test, producing up to 97% proven false positives, combined with a massive media campaign, was able to create a worldwide panic-laden “plandemic”; that this pandemic would never have been possible without the infamous DNA-modifying Polymerase Chain Reaction test - which to this day is being pushed on a majority of innocent people who have no clue. His conclusions are evidenced by renown scientists. —Peter Koenig

Professor Chossudovsky exposes the truth that “there is no causal relationship between the virus and economic variables.” In other words, it was not COVID-19 but, rather, the deliberate implementation of the illogical, scientifically baseless lockdowns that caused the shutdown of the global economy. -David Skripac

A reading of Chossudovsky’s book provides a comprehensive lesson in how there is a global

coup d'état under way called "The Great Reset" that if not resisted and defeated by freedom loving people everywhere will result in a dystopian future not yet imagined. Pass on this free gift from Professor Chossudovsky before it's too late. You will not find so much valuable information and analysis in one place. -Edward Curtin
