

# Florida Surgeon General Calls for Halt of Covid-19 Vaccine. The Vaccine Affects Millions of Americans. It Should be the Object of Debate Prior to the 2024 Elections

By [Prof Michel Chossudovsky](#), [Florida Department of Health](#), and [FOX 4 Newsroom](#)

Global Research, October 19, 2024

Global Research, Florida Health Department, Fox News

*First published on October 12, 2024*

*The Covid 19 “Vaccine” narrative is being questioned in several countries, confirming what we have outlined and documented since the vaccine rollout in mid-December 2020.*

*We recall the recent courageous statement of Japan’s Former Minister of Internal Affairs **Kazuhiro Haraguchi**:*

***“You Were Right, Vaccines Are Killing Millions of Our Loved Ones”***

***“They are trying to block our freedom, our resistance, our power. But we will never lose.”***

*And now Florida’s Surgeon General **Dr. Joseph A. Ladapo** questions the legitimacy of the mRNA Vaccine, prior to the November 5, Presidential Elections:*

**The decision of the Surgeon General is carefully documented. The Florida Department of Health issued the following [advisory](#)**

**Based on the high rate of global immunity and currently available data, the State Surgeon General advises against the use of mRNA COVID-19 vaccines. Any provider concerned about the health risks associated with COVID-19 for patients over the age of 65 or with underlying health conditions should prioritize patient access to non-mRNA COVID-19 vaccines and treatment.**

## **Safety and Efficacy Concerns**

Providers and patients should be aware of outstanding mRNA COVID-19 vaccine safety and efficacy concerns:

- The mRNA COVID-19 vaccines present a risk of [subclinical](#) and

clinical [myocarditis](#) and other cardiovascular conditions among otherwise healthy individuals.

- The mRNA COVID-19 vaccine may be associated with an increased risk of [postural orthostatic tachycardia syndrome](#) (POTS).
  - The mRNA COVID-19 vaccine may be associated with an increased risk of [autoimmune diseases](#) including systemic lupus erythematosus (SLE), rheumatoid arthritis, and psoriasis.
  - Throughout the pandemic, studies across geographic regions found that the mRNA COVID-19 vaccines are associated with [negative effectiveness](#) after four to six months. As efficacy waned, studies showed that COVID-19 vaccinated individuals developed an [increased risk](#) for infection.
  - [Elevated levels](#) of mRNA and spike protein from the mRNA COVID-19 vaccine [persist](#) among some individuals for an indefinite period, which may carry [health risks](#).
  - Potential [DNA integration](#) from the mRNA COVID-19 vaccines pose unique and elevated risk to human health and to the integrity of the human genome, including the risk that DNA integrated into sperm or egg gametes could be passed onto offspring of mRNA COVID-19 vaccine recipients.
- **There is unknown risk of potential adverse impacts with each additional dose of the mRNA COVID-19 vaccine; currently individuals may have received five to seven doses (and counting) of this vaccine over a 3-year period.**

**Improving habits and overall health help manage and reduce the risk of heart disease, type 2 diabetes, and obesity, risk factors for serious illness from COVID-19.**

The State Surgeon General and the Department continue to encourage Floridians to prioritize their overall health by:

Staying physically active,

- Minimizing processed foods,
- Prioritizing vegetables and healthy fats, and
- Spending time outdoors to support necessary vitamin D levels.

**On September 13, 2023, State Surgeon General Dr. Joseph A. Ladapo provided [guidance](#) against COVID-19 boosters for individuals under 65 and**

younger.

In addition to aforementioned concerns, providers and patients should be aware of outstanding safety and efficacy concerns outlined in the State Surgeon General's previous booster guidance released in September 2023.

## People across America

The State of Florida has called for a halt of the use of mRNA Covid-19 Vaccines, setting a precedent for **the implementation of similar decisions not only across the United States, but Worldwide.**

The evidence is overwhelming.

Read the powerful message of Florida State Surgeon General Joseph A. Ladapo who has come to the rescue of 22 million people in Florida.

Joseph A. Ladapo, MD, PhD  
@FLSurgeonGen

I am calling for a halt to the use of mRNA COVID-19 vaccines.

We call upon people across the United States **to pressure State officials to cancel the mRNA Covid-19 once and for all.**

The evidence of mortality and morbidity resulting from vaccine inoculation both present (official data) and future (e.g. undetected microscopic blood clots) is overwhelming.

The official data (mortality and morbidity) as well as numerous scientific studies confirm the

nature of the Covid-19 mRNA vaccine which is being imposed on all humanity.

Contact your representative at the US Congress. The decision of the State of Florida must be the object of debate and analysis across the land. AND THIS SHOULD TAKE PLACE BEFORE THE NOVEMBER 5 ELECTIONS.

The media has remained mum on the dangers of the vaccine in the course of the last three years.

We invite the media to emulate Fox News, to provide coverage pertaining to the “failures” of the Covid-19 Vaccine and its implications, nationally and internationally.

In less than four weeks from now it's Election 2024. Let us actively debate the issue of the vaccine which has affected millions of Americans.

It is essential that the candidates for the Presidency of the United States take a stance regarding the Covid 19 mRNA vaccine which has been carefully documented by Florida's Surgeon **General Dr. Joseph A. Ladopo**.

## **Below is a short review of the impacts of the Covid-19 Vaccine on Excess Mortality**

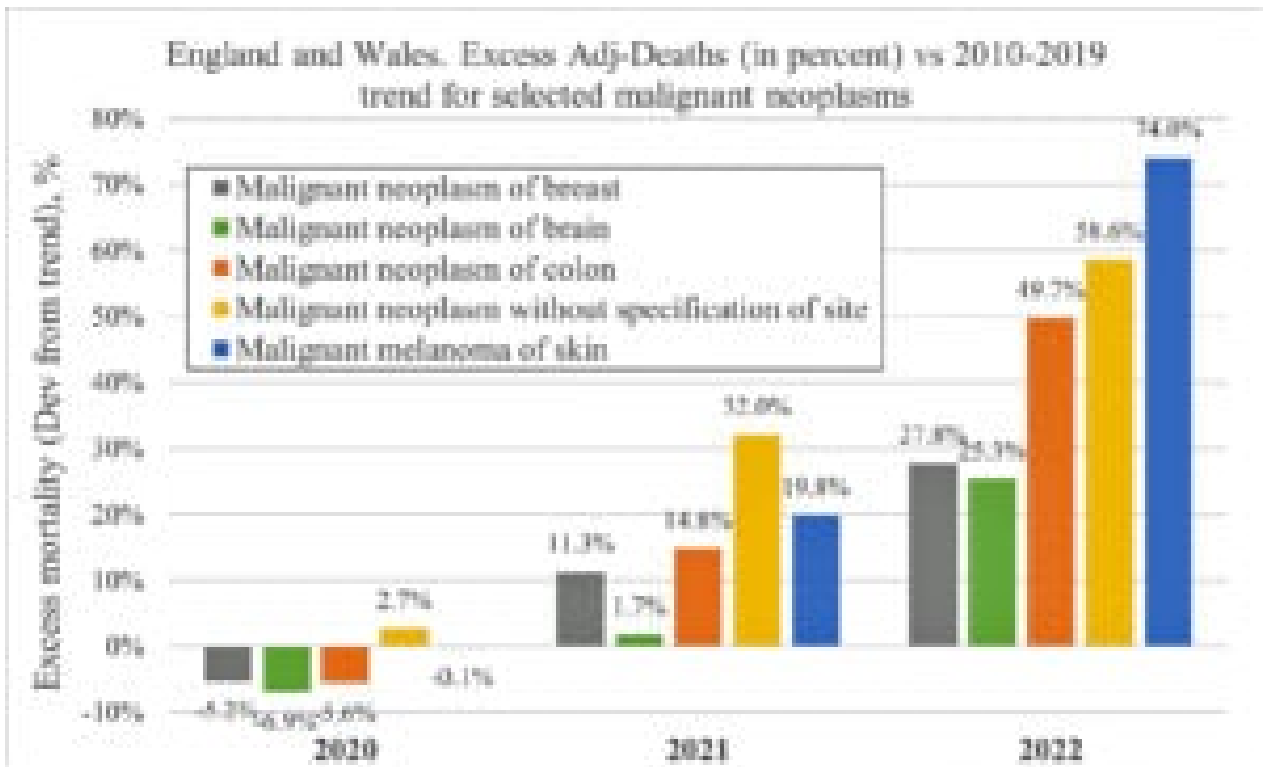

There are numerous studies on **vaccine related excess mortality**. Below is a summary of an incisive study pertaining to **Cancer Related Excess Mortality in England and Wales** resulting from the mRNA Vaccine conducted by the team of [Edward Dowd](#)

**The data for excess mortality in 2020 (the year prior to the vaccine) are negative** with the exception of “malignant neoplasm without specification of site”.

The COVID-19 vaccine was rolled-out in several phases in England and Wales [starting on December 8, 2020](#) and [extending into March-April 2021](#).

The upward movement in excess mortality (%) commences in 2021. The increase in excess mortality related to malignant neoplasm is tabulated for the **two first years of the vaccine**.

## England and Wales: Excess Mortality

Below is a similar table pertaining to **Excess Mortality in Germany**, which points to the Deviation of **Observed Mortality** from **Expected Mortality** (by age group) in 2020, 2021, and 2022.

Notice the upward shift in **excess mortality in 2021 and 2022** following the rollout of the Covid Vaccine in December 2020

## Germany: Excess Mortality

Germany: Excess Mortality by Age Group (%)

Figure 1 illustrates that the deviation of the observed mortality from the expected mortality is not uniform over the different age groups and that the pattern across the age groups changes from 2020 to 2021 and 2022.

Excess Mortality in **Red** by age group, Total Excess Mortality in **Gray**

### Japan: Excess Mortality

Japan. Excess Mortality (2020-2022): Jump in Excess mortality in 2021 and 2022 (January-October 2022)

## JAPAN: Age Adjusted Excess Deaths January 1 to October 30

- VAERS Reporting Requirements for Monkeypox vaccines >

[Click here for information on reporting to VAERS after COVID-19 vaccination](#)

**Knowingly filing a false VAERS report is a violation of Federal law (18 U.S. Code § 1001) punishable by fine and imprisonment.**

Two Ways to Submit an Online Report to VAERS

The graph below: [“All Deaths reported to Vaers by Year” starting in 1990.](#) (e.g. reported by the Victim’s family to VAERS). **These are official figures, deaths attributable to the Vaccine.** Only a **very small percentage of vaccine deaths is reported.** Nonetheless the graph below indicates **more than 19,000 Vaccine related deaths in 2021 in the U.S.** Neither the media nor the U.S government have informed the public. The 19,000 vaccine related deaths cannot be refuted.

What can be observed is that the number of **reported vaccine deaths** has increased dramatically in the course of 2021 corresponding to the first year of the Covid vaccine which was launched in the U.S. in mid December 2020.

The above are excerpts from my Article on the [Corona Virus Pandemic](#).
