

5G Roll-out: A High Tech EMF Front in the War Against Humanity?

By [Michael Welch](#) and [Claire Edwards](#)
Global Research, January 27, 2020

Region: [Europe](#), [USA](#), [World](#)
Theme: [Crimes against Humanity](#), [GLOBAL RESEARCH NEWS HOUR](#), [Media Disinformation](#), [Military and WMD](#), [Science](#), [United Nations](#), [US NATO War Agenda](#)

"The people from the insurance industry, they all said that for them it was not the question of whether this was dangerous or not, they knew it was dangerous. The only question for them was who is going to pay for the party in the future, and they will not do it."

- Professor Olle Johansson (from this week's interview).

In spite of health regulators' and telecom industry professionals' assurances that the looming 5G roll-out is safe, the general public has started viewing these technological marvels with some suspicion. [1][2][3][4]

Cities around the world, from Brussels, to Portland to Florence, to Geneva and even whole countries, including Australia, France, and the Netherlands are putting the brakes on the installation of the new generation of wireless networks citing the potential harm caused to human health by the radiation this new infrastructure would entail. [5]

Thanks to the internet, independent news sites like this one, and hard-working activists around the globe, word of the harmful effects of electromagnetic field (EMF) radiation has begun to trickle out and inform more and more people. Citizens are coming together, forming discussion groups, sharing information and are engaging in grass-roots lobbying efforts. Public events, including a '[Global day of Action](#)' on January 25th are becoming impossible to dismiss.

Consequently, a number of authoritative-looking articles began popping up in major publications throughout 2019 appearing to make light of the concerns. [6][7][8] [Satellites are being launched](#) with the intention of integrating them into the 5G infrastructure. Furious lobbying - [over \\$1.2 billion on the U.S. Congress alone](#) - has been mustered in the name of faster downloads, self-driving cars, and an Internet of Things.

This week's Global Research News Hour radio program returns to the topic of wireless technology and the 5G roll-out and attempts to ascertain which interests are really being

served by this Brave New World order we are being dragged into.

Our first interview, Professor Olle Johansson, has researched EMF radiation and its effects since the 1970s and can speak with authority as to its harmful impacts not only on humans but on all biological systems. Professor Johansson also touches on the insurance industry's response and to the failures of regulators and other official bodies to address the science indicating harm. In our second half hour, Claire Edwards, a former UN staffer turned campaigner against wireless and 5G talks about anecdotal evidence of casualties among UN staff from its wireless infrastructure, systemic obstacles to responding to the health threat, the role of satellites in expanding the 5G infrastructure, and the concerns about the technology beyond the health ramifications.

Olle Johansson, PhD is a past associate professor at the Karolinska Institute, Department of Neuroscience, and head of The Experimental Dermatology Unit as well as a guest and adjunct professor in basic and clinical neuroscience at the Royal Institute of Technology, Stockholm. He has published more than 600 original articles, reviews, book chapters and conference reports within the fields of basic and applied neuroscience, dermatology, epidemiology, and biophysiology. He is a global authority in the field of EMF radiation and health effects.

Claire Edwards, BA Hons, MA worked for the United Nations as Editor and Trainer in Intercultural Writing from 1999 to 2017. Claire [warned the Secretary-General](#) about the dangers of 5G during a meeting with UN staff in May 2018, calling for a halt to its rollout at UN duty stations. Her own health had been compromised by the installation of public access points for WiFi and cell phone access in December 2015. She part-authored, designed, administered the 30 language versions, and edited the entirety of the International Appeal to Stop 5G on Earth and in Space (www.5gspaceappeal.org) and vigorously campaigned to promote it throughout 2019. She has since severed her connection with the Appeal and its administrator Arthur Firstenberg, but continues to campaign against 5G and existing wireless technology. She is a frequent contributor to Global Research.

LISTEN TO THE SHOW

[Click to download the audio \(MP3 format\)](#)

The [Global Research News Hour](#) airs every Friday at 1pm CT on [CKUW 95.9FM](#) out of the University of Winnipeg. The programme is also podcast at globalresearch.ca.

The Global Research News Hour now airs Fridays at 6pm PST, 8pm CST and 9pm EST on Alternative Current Radio (alternativecurrentradio.com)

Community Radio Stations carrying the Global Research News Hour:

[CHLY 101.7fm](#) in Nanaimo, B.C - Thursdays at 1pm PT

[Port Perry Radio](#) in Port Perry, Ontario -1 Thursdays at 1pm ET

[Burnaby Radio Station CJSF](#) out of Simon Fraser University. 90.1FM to most of Greater Vancouver, from Langley to Point Grey and from the North Shore to the US Border.

It is also available on 93.9 FM cable in the communities of SFU, Burnaby, New Westminister, Coquitlam, Port Coquitlam, Port Moody, Surrey and Delta, in British Columbia, Canada. – Tune in at its new time – Wednesdays at 4pm PT.

Radio station [CFUV 101.9FM](#) based at the University of Victoria airs the Global Research News Hour every Sunday from 7 to 8am PT.

[CORTES COMMUNITY RADIO CKTZ 89.5](#) out of Manson's Landing, B.C airs the show Tuesday mornings at 10am Pacific time.

[Cowichan Valley Community Radio CICV 98.7 FM](#) serving the [Cowichan Lake](#) area of Vancouver Island, BC airs the program Thursdays at 6am pacific time.

Campus and community radio [CFMH 107.3fm](#) in Saint John, N.B. airs the Global Research News Hour Fridays at 10am.

Caper Radio CJBU 107.3FM in Sydney, [Cape Breton](#), Nova Scotia airs the Global Research News Hour starting Wednesday Morning from 8:00 to 9:00am. Find more details at www.caperradio.ca

RIOT RADIO, the visual radio station based out of [Durham College](#) in Oshawa, Ontario has begun airing the Global Research News Hour on an occasional basis. Tune in at dcstudentsinc.ca/services/riot-radio/

Radio Fanshawe: [Fanshawe's 106.9 The X \(CIXX-FM\)](#) out of London, Ontario airs the Global Research News Hour Sundays at 6am with an encore at 3pm.

Los Angeles, California based Thepowerofvoices.com airs the Global Research News Hour every Monday from 6-7pm Pacific time.
