On Wednesday, February 24th, 2021 at 10:15 PM, [REDACTED] wrote:

Dear Health Ministers,

I am writing to you on advice from the Australian Department of Health (the Department) to seek clarification on information requested in a Freedom of Information (FOI) request that was sent to the Department.

The Department's initial response on 24th August 2020 (attached: "Initial FOI 1937 Response"), stated: "To obtain the information you are seeking please direct your request to the various State and territory Departments of Health".

After further correspondence between the FOI author and the Department, a more formal response was given (attached: "FOI 1937"), yet the outcome remained the same.

I am therefore writing to you to on initial advice by the Department of Health to confirm whether you do hold the information requested in the original request to the Department, as shown in attachment "FOI 1937" and pasted again below:

*"All records in the possession, custody or control of The Department of Health describing the isolation of a SARS-COV-2 virus, directly from a sample taken from a diseased patient, where the patient sample was not first combined with any other source of genetic material (i.e. monkey kidney cells aka vero cells; lung cells from a lung cancer patient). Please note that I am using "isolation" in the every-day sense of the word: the act of separating a thing(s) from everything else. I am not requesting records where "isolation of SARS-COV-2" refers instead to:*

*the culturing of something,*

*or the performance of an amplification test (i.e. a PCR test),*

*or the sequencing of something.*

*Please also note that my request is not limited to records that were authored by The Department of Health or that pertain to work done by The Department of Health. My request includes any sort of record, for example (but not limited to) any published peer reviewed study that The Department of Health has downloaded or printed."*

I look forward to your response.
