

Acoustic Evidence Proves Beyond All Doubt More Than One Shooter

I and others have pointed out astonishing voids in the Secret Service's protection of Trump. The voids are so egregious that they cannot be blamed on incompetence. Scott Ritter says that intent is the only explanation.

Now these conclusions are backed by acoustic evidence. The fact that bullets travel faster than sound means that the time between hearing the bullet pass the microphone and then the sound allows the calculation of the distance from which the bullet was fired. The time differences reveal different distances. Therefore the conclusion is unavoidable that there was more than one shooter.

Mike Adams walks us through one approximately 30 minute analysis, and Chris Martenson walks us through another 30 minute analysis.

Mike Adams concludes that there were 7 shots fired, 5 from the distance of Crooks' location, and 2 from two different longer distances.

Martenson makes the point that the shot at Trump that hit a man in the upper row was traveling on an upward trajectory, which implies it did not come from the top of the building where Crooks was positioned.

The first shots are easy to identify. Some of the following shots are polluted with echos and require careful attention.

Both Adams and Martenson provide competent reports. Both say that the analysis requires credentialed independent forensic experts and that the accuracy of the results can be tightened once the calibers of the weapons are known. As I said, let's hope the bullets were collected by honest and trustworthy authorities.

Keep in mind that expert acoustic analysis of Robert F. Kennedy's assassination definitely showed two different caliber of weapons fired. There is no doubt about this, but the official story remains "lone gunman."

The American whore media will brand the factual analysis a "conspiracy theory" and will endorse the official narrative as the truth.

However, at this point the FBI, CIA, Homeland Security, NSA and prostitute media have zero credibility. No one should believe a word they say.

Here are the videos:

My jaw is on the floor

This PhD did a scientific analysis of all bullet audio signatures from the Trump assassination footage

CONCLUSION: Raw Audio evidence proves there were **at least** two shooters firing different weapons in two locations to kill Trump pic.twitter.com/SLTpCrjAd9

— Benny Johnson (@bennyjohnson) [July 19, 2024](#)

In addition to the security failures and acoustic evidence, there is the absence of a Secret Service camera drone. The only reason not to have camera coverage is that it would have made Crooks obvious and other shooters obvious.

The only way the Democrats or the Deep State operating through the Democrats can get away with their attempted assassination of **Donald Trump** is for the Republicans to do nothing on the grounds that it would be divisive or too embarrassing to the US to admit a government plot against Trump. The Rinos will argue that the plot has to be covered up in order to save America's reputation. Trump will be told he has to unify the country, not divide it by holding his would be murderers accountable. No one will explain how good can be united with evil.
