Passing out or losing consciousness is called "syncope" and in general has three causes: cardiac, neurological, or other category. The most serious cause is a cardiac arrest which commonly starts with an arrhythmia from the ventricles called ventricular tachycardia. The rhythm is sufficiently fast where the heart does not have time to fill with blood and so blood pressure drops precipitously and as a result the patient loses consciousness. In adolescents this could be hard to distinguish from a simple fainting spell (vasodepressor syncope) as a result of getting a needle in the arm or a blood draw. Han and coworkers report on a 17 year old girl who passed out after her first injection of the ineffective Pfizer COVID-19 vaccine.

Case report: Myocarditis with nonsustained ventricular tachycardia following COVID-19 mRNA vaccination in a female adolescent

frontiers | Frontiers in Pediatrics

She was hospitalized and found to have COVID-19 vaccine induced myocarditis (with left ventricular dysfunction) and during observation, ventricular tachycardia occurred that self-terminated (non-sustained). She spent over a month in the hospital. If that arrhythmia would have been prolonged a cardiac arrest would have ensued similar to that of so many of the athletes we have seen collapse on the playing field. This is an important paper since myocarditis is not mild nor transient and under direct observation can be manifest as a lethal arrhythmia.

So if someone you know has had palpitations or passed out in conjunction with ill-advised COVID-19 vaccination, be sure to suggest a cardiovascular evaluation. There should be no athletic activity until myocarditis is ruled out.

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”
