

Alberta Mother Accuses Health Agency of Trying to Vaccinate Son Against Her Wishes

Alberta Health Services reportedly attempted to vaccinate a sixth grader during school hours despite his parents writing 'refused' on the permission form.

Alberta Health Services has been accused of attempting to vaccinate a child in school against his parent's wishes.

On November 6, Alberta Health Services staffers visited Edmonton Hardisty School where they [reportedly attempted](#) to vaccinate a grade 6 student despite his parents signing a form stating that they did not wish for him to receive the vaccines.

"It is clear they do not prioritize parental rights, and in not doing so, they traumatize students," the boy's mother Kerri Findling told the *Counter Signal*.

During the school visit, AHS planned to vaccinate sixth graders with the HPV and hepatitis B vaccines. Notably, both HPV and hepatitis B are vaccines given to prevent diseases normally transmitted sexually.

Among the chief concerns about the HPV vaccine has been the high number of adverse reactions reported after taking it, including a [case where](#) a 16 year-old Australian girl was made infertile due to the vaccine.

Additionally, in 2008, the U.S. Food and Drug Administration received [reports](#) of 28 deaths associated with the HPV vaccine. Among the 6,723 adverse reactions reported that year, 142 were deemed life-threatening and 1,061 were considered serious.

Children whose parents had written "refused" on their forms were supposed to return to the classroom when the rest of the class was called into the vaccination area.

However, in this case, Findling alleged that AHS staffers told her son to proceed to the vaccination area, despite seeing that she had written "refused" on his form.

When the boy asked if he could return to the classroom, as he was certain his parents did not intend for him to receive the shots, the staff reportedly said "no." However, he chose to return to the classroom anyway.

Shortly after, he was called into the office and taken back to the vaccination area. Findling said that her son then left the school building and braved the sub-zero temperatures to call his parents.

Following his parents' arrival at the school, AHS claimed the incident was a misunderstanding due to a "new hire," attesting that the mistake would have been caught before their son was vaccinated.

"If a student leaves the vaccination center without receiving the vaccine, it should be up to the parents to get the vaccine at a different time, if they so desire, not the school to enforce vaccination on behalf of AHS," Findling declared.

Findling's story comes just a few months after Alberta **Premier Danielle Smith** [promised](#) a new Bill of Rights affirming "God-given" parental authority over children.

A draft version of a forthcoming Alberta Bill of Rights provided to LifeSiteNews includes a provision beefing up parental rights, declaring the "freedom of parents to make informed decisions concerning the health, education, welfare and upbringing of their children."

Commentary by Dr. William Makis

Alberta Health Services will injure or kill your child, either through malice or incompetence. And as a parent, you will have no recourse.

Albertans, you need to push back on Premier Danielle Smith to not be so weak on Alberta Health Services corruption and incompetence.
