*Governments around the globe put a huge amount of faith in COVID-19 vaccines as their only intervention to reduce mortality. Yet, no prospective randomized, double-blind placebo-controlled trial demonstrated a reduction in death with COVID-19 vaccines. On the contrary, every single data system around the globe has reported increased mortality coinciding the the roll-out of the vaccines.*

Scherb and Hayashi used Japan and Germany for study of temporal trends in mortality. Both countries have excellent reporting systems.

For Japan (125.7 M) and Germany (83.2 M), the WHO indicates as of 18, June 2023, and 14 May 2023, a total of 392,346,325 and 193,232,623 vaccine doses, respectively have been administered.

This equates to 2-3 doses per person. They found a disturbing jump in mortality coinciding with the start of mass vaccination. At the end of a pandemic, since the frail and elderly have suffered disproportionate casualties, there is usually a culling effect and mortality should go down.

If the vaccines were effective, then certainly they should have dropped the death rate even more. The figures from Japan and Germany tell a different story.

## The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

*“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”*
