Amplly documented but rarely mentioned in mainstream news, ISIS is a creation of US intelligence, recruited, trained and financed by the US and its allies including Saudi Arabia, Qatar, Turkey, Israel and Jordan. Those who ordered the bombing campaign are those who are behind the Caliphate Project. The Islamic State militia, which has been the alleged target of a US-NATO bombing campaign under a "counter-terrorism" mandate, is supported covertly by the United States and its allies. What this means is that the ISIS terrorists are the foot soldiers of the Western alliance. While America claims to be targeting ISIS, in reality it is protecting ISIS. The air campaign is intent upon destroying Syria and Iraq rather than "going after the terrorists".

"The livelihood of millions of people throughout the World is at stake. It is my sincere hope that the truth will prevail and that the understanding provided in this detailed study will serve the cause of World peace. This objective, however, can only be reached by revealing the falsehoods behind America's "War on Terrorism" and questioning the legitimacy of the main political and military actors responsible for extensive war crimes." -Prof. Michel Chossudovsky

SYNOPSIS: [America's "War on Terrorism"](#)

In this expanded edition of Michel Chossudovsky's 2002 bestseller, the author blows away the smokescreen put up by the mainstream media, that 9/11 was an attack on America by "Islamic terrorists". Through meticulous research, the author uncovers a military-intelligence ploy behind the September 11 attacks, and the cover-up and complicity of key members of the Bush Administration.

The new edition, which includes twelve additional chapters, focuses on the use of 9/11 as a pretext for the invasion and illegal occupation of Iraq, the militarization of justice and law enforcement and the repeal of democracy.

According to Chossudovsky, the "war on terrorism" is a complete fabrication based on the illusion that one man, Osama bin Laden, outwitted the \$40 billion-a-year American intelligence apparatus. The "war on terrorism" is a war of conquest. Globalization is the final march to the "New World Order", dominated by Wall Street and the U.S. military-industrial complex.

September 11, 2001 provides a justification for waging a war without borders. Washington's agenda consists in extending the frontiers of the American Empire to facilitate complete U.S. corporate control, while installing within America the institutions of the Homeland Security State.

Reviews

"Chossudovsky starts by dispelling the fiction that the US and Al Qaeda have been long-term adversaries. [He] also probes US oil policy, which is obviously of particular concern to George W. Bush. Chossudovsky argues that the US has a much different relationship between Russia and China than is ever indicated in the mainstream (or progressive) press. Simply put, the US is moving into the countries which neighbor Russia and China in order to plunder natural resources and expand the reach of the US Empire. Pakistan's Directorate for Inter-Services Intelligence (ISI) has been playing a key role in destabilizing the region as well as offering support in other intelligence matters... War and Globalization is full of surprises, even for those of us who consider ourselves well-informed. Chossudovsky is examining the true nature of US foreign policy and arguing that the terrible events of 9/11/01 have changed little of it... Material this provocative and well-researched is ignored by the left at great peril." – Scott Loughrey, *The Baltimore Chronicle & Sentinel*

“Canadian professor of economics Michel Chossudovsky contains that rare gift of a writer who can compile massive documentary evidence, then propound it in a succinct, lucid manner. In this illuminating work the host of the critically acclaimed Global Research website takes widely acclaimed and often repeated media assumptions and sharply refutes them, providing a chronology and road map behind 9-11 and related events... A large part of the book involves a necessary topic area that has been nervously glossed over by conventional American media sources for good reason; it hits too close to home and indicts the largest international energy conglomerates. The author spends much time examining the link between big oil and public policy. In terms of providing vital information, this compact volume provides more valuable information in one chapter than so many contemporary volumes do with many pages on 9-11 and related events... Chossudovsky demonstrates that the frequently repeated and fallacious Bushie shibboleths of getting Saddam before he gets us are rhetorical sallies designed to inflame public opinion by skirting around the important truths that only a few courageous authors such as himself dare reveal... Its bullseye clarity cuts through the morass of Bush verbage, daring readers to examine the pure, unvarnished truth of a nation using its military and intelligence capabilities to control the global oil market on the pretext of making the world a safer place.” – William Hare, Florida United States
