\*\*\*

On October 20, 2022, the [Advisory Committee on Immunization Practices](#) (ACIP) voted unanimously to include mRNA COVID-19 vaccines on the list of routine immunizations for adults and children 6 months and older. This sent young mothers and fathers into a panic since previously ACIP had been trusted as an advisor to pediatricians.

Parents knew babies were not a risk for serious COVID-19 outcomes. They were concerned the vaccines were genetic, long-lasting, produced the harmful Wuhan Spike protein, and had no long-term safety testing. If the shots were given on schedule every six months it meant a massive exposure to a brand new genetic biotechnology. This development has prompted so many parents to ask me about the necessity and the safety of the entire ACIP routine schedule. Conversely, they want to know: is it OK to go "natural" in the first year of life with no vaccines taken?
