“The great enemy of the truth is very often not the lie — deliberate, contrived and dishonest — but the myth, persistent, persuasive, and unrealistic. Belief in myths allows the comfort of opinion without the discomfort of thought.” ~ John F. Kennedy

“A poorly trained, apathetic, and gullible media is one of the greatest national security and public health threats to the United States of America, because in such a world not only does there cease to be a watchdog against government, industry, and general hucksterism, but the media itself becomes prone to manipulation, deception, coercion, and outright recruitment by precisely those it is supposed to be watching for the good of the people.” — Marco Caceres Di Iorio

“The media hacks who push the pro-vaccine propaganda and hide the truth are complicit in crimes against humanity...The entire vaccine machine is built on lies of omission and fraudulent science. billions of dollars are quietly paid out by NVICP (National Vaccine Injury Compensation Program) to vaccine-injured people, but the overwhelming majority of vaccine injuries are never reported. Of the thousands that are reported, only a tiny few are compensated. Therefore, the real amounts that should have been paid out to vaccine injured people is in the trillions.” — William Christenson

“Fewer than 1% of vaccine adverse events are reported. The CDC’s entire vaccination propaganda campaign rests on their claim that side effects from vaccinations are exceedingly rare, but according to the blatantly pro-over-vaccination, Big Pharma-funded CDC, in 2016 alone, VAERS received 59,117 vaccine adverse event reports. Among those reports were 432 vaccine-related deaths, 1,091 permanent vaccine-related disabilities, 4,132 vaccine-related hospitalizations, and 10,274 vaccine-related emergency room visits. What if these numbers actually represent less than 1% of the total as this report asserts? You multiply those numbers by 100.” - William Christenson (2017)

“As of 1986, only 12.8% of American kids had chronic diseases. That number has grown to 54% among the vaccine generation (ie, Generation V, those children born after lawsuits against vaccine manufacturers were outlawed in 1986) in lockstep with the CDC’s and AAP’s expanding vaccine schedule.” — Robert F. Kennedy, Jr

“Safety testing, which typically requires months and years for other medical products, often lasts only a few days with vaccines – not nearly long enough to spot cancers or chronic conditions like autoimmune diseases (e.g. juvenile diabetes, rheumatoid arthritis, multiple sclerosis), allergic illnesses (e.g. food allergies, allergic rhinitis, eczema, asthma), or neurological and neurodevelopmental injuries (e.g. ADD, ADHD, narcolepsy, epilepsy, seizure disorders, and autism). Vaccine manufacturer’s vaccine inserts that accompany every vial of mandated vaccines include warnings about these and over 400 other injuries including many serious immune, neurological, and chronic illnesses for which FDA suspects that vaccines may be the cause.” – Robert F. Kennedy, Jr

“The children who comprise this vaccine-injured generation are now aging out of schools that needed to build quiet rooms and autism wings, install wobble chairs, hire security guards and hike special ed spending to 25% to accommodate them. They are landing on the social safety net which they threaten to sink. As Democratic lawmakers all around the nation vote to mandate more vaccines and call for the censorship of experts (including parents of vaccine-injured or killed children) that are expressing concerns about vaccine safety, Democratic Presidential candidates argue about how to fix America’s dysfunctional and unaffordable health care system without addressing the reality of the vaccine-related chronic disease and autoimmune disorder epidemic. The good news for Big Pharma, of course, is that many of these vaccine-injured children have lifelong dependencies on unaffordable blockbuster drugs like insulin, Adderall, anti-psychotic drugs, Epi-Pens, asthma inhalers, and diabetes, arthritis, and anti-seizure meds made by the same companies that made the vaccines.” – Robert F. Kennedy, Jr

“An overwhelming majority of the FDA officials directly charged with licensing vaccines, and the CDC officials who effectively mandate them for children, have personal financial entanglements with vaccine manufacturers. These ‘public servants’ are often shareholders in, grant recipients from, and/or paid consultants to vaccine manufacturers, and, occasionally, even patent holders of the very vaccines they vote to approve. Those conflicts of interest motivate them to recommend ever more vaccines with minimal support from evidence-based science” – Robert F. Kennedy, Jr.

“The FDA receives 45% of its annual budget from the pharmaceutical industry. The World Health Organization (WHO) gets roughly half its budget from private sources, including Pharma and its allied foundations. And the CDC, frankly, is a vaccine company; it owns 56 vaccine patents and buys and distributes \$4.6 billion in vaccines annually through the Vaccines for Children program, which is over 40% of its total budget.” — Robert F. Kennedy, Jr

“The HHS (US Health and Human Services partners with vaccine makers to develop, approve, recommend, and pass mandates for new products and then shares profits from vaccine sales. HHS employees can personally collect up to \$150,000 annually in royalties for products they work on. For example, key HHS officials collect money on every sale of Merck’s controversial HPV vaccine Gardasil, which also yields tens of millions annually for the agency in patent royalties.” — Robert F. Kennedy, Jr

“In 1986, Congress—awash in Pharma money (the pharmaceutical industry is number one for both political campaign contributions and lobbying spending on legislators over the past 20 years) enacted a law granting vaccine makers blanket immunity from liability for injuries caused by vaccines. The subsequent gold rush by pharmaceutical companies boosted the number of recommended inoculations from twelve shots of five vaccines in 1986 to 54 shots

of 13 vaccines today. A billion-dollar sideline grew into the \$50 billion vaccine industry behemoth.” — Robert F. Kennedy, Jr

“Since vaccines are liability-free – and effectively compulsory to a captive market of 76 million children – there is meager market incentive for companies to make them safe. The public must rely on the moral scruples of Merck, GlaxoSmithKline, Sanofi, and Pfizer. But these companies have a long history of operating recklessly and dishonestly, even with (the many drug) products for which they can be sued for injuries. The four companies that make virtually all of the recommended vaccines are all convicted felons. Collectively they have paid over \$35 billion since 2009 for defrauding regulators, lying to and bribing government officials and physicians, falsifying science, and leaving a trail of (incurable chronic illnesses) injuries and deaths from products they knew to be dangerous and still sold under pretense of safety and efficacy.” – Robert F. Kennedy, Jr

“I ate breakfast last week with the president of a network news division at CBS) and he told me that during non-election years, 70% of the advertising revenues for his news division come from pharmaceutical ads. And if you go on TV any night and watch the network news, you’ll see they become just a vehicle for selling pharmaceuticals. He also told me that he would fire a host who brought onto his station a guest who lost him a pharmaceutical account.” — Robert F. Kennedy Jr. – See more [here](#).

“The public in both poor and rich countries has a right to scientifically-based evidence that international vaccine programs are as safe as possible and that they have been thoroughly safety-tested. The best metrics for measuring safety are studies comparing health outcomes of vaccinated versus unvaccinated cohorts. Yet, both the CDC and the WHO have aggressively discouraged the pursuit of such studies. – Robert F. Kennedy, Jr.

“I knew that MMR (GlaxoSmithKline’s Measles/Mumps/Rubella vaccine) was a mistake from the start. Within 10 seconds I could see that it was a bad idea. All the vaccinations prior to MMR could occur in nature; they had never been combined before. Normally, viruses can’t infect at the same time, so if you put more than one virus into a body at once you are making a grave error. Surely the point of vaccination is to make it safer for children, but with MMR a child could be overwhelmed, and might not recover. The deaths and severe reactions to MMR are just the tip of the iceberg.” – Dr Peter Mansfield – British general practitioner whose practice was dedicated to reducing his patient’s reliance on doctors by giving them the confidence and information to help themselves

“Even higher levels of aluminium have been found in the brains of individuals, diagnosed with an early-onset form of sporadic (usually late onset) Alzheimer’s disease, who have experienced an unusually high exposure to aluminium through the environment (e.g. Camelford) or through their workplace. This means that Alzheimer’s disease has a much earlier age of onset, for example, fifties or early sixties, in individuals who have been exposed to unusually high levels of aluminium in their everyday lives.” – Christopher Exley, PhD

“No vaccine manufacturer shall be liable...for damages arising from a vaccine-related injury or death.” – President Ronald Reagan, as he signed the National Childhood Vaccine Injury Act (NCVIA) of 1986, absolving drug companies from all medico-legal liability when children die or are disabled from vaccine injuries, thus reversing many of the intentions of original legislative action.

“...the NIH (National Institutes of Health) is incapable of conducting conflict-free research...it is clear that the system managing our vaccine program is corrupt beyond repair and needs a complete overhaul.” – Lori Mellwain, National Autism Association board chair

Safety Recommendation for Parents Who Choose or are Mandated to Vaccinate Their Children, Based on Guidelines of the Autism Research Institute:

1. Never vaccinate a sick child, even if just a runny nose from a viral infection, as all viruses are immunosuppressive, rendering the child more vulnerable to adverse vaccine reactions.
2. Never allow more than two vaccines per visit; avoid all combination vaccines.
3. Administer vitamin C before and after each vaccination, ideally in doses of 500 mgs every four hours during waking hours. Also give vitamin A in standard doses.
4. All forms of sugar should be avoided for several days before and after vaccines, as sugar has been shown to diminish the protective activities of the immune system by depressing white blood cells' ability to destroy bacteria.

The following 7 quotes are from Dr. Richard Moskowitz's brilliantly articulated article, “The Case Against Immunizations”:

“It is dangerously misleading, and indeed the exact opposite of the truth, to claim that a vaccine renders us ‘immune’ to or protects us against an acute disease, if in fact it only drives the disease deeper into the interior and causes us to harbor it chronically instead, with the result that our responses to it become progressively weaker but show less and less of a tendency to heal or resolve themselves spontaneously. What I propose, then, is to investigate as thoroughly and objectively as I can how the vaccines actually work inside the human body, and to begin by simply paying attention to the implications of what we already know. Consider the process of falling ill with and recovering from a typical acute disease, such as the measles, in contrast with what we can observe following (the intramuscular) administration of the measles vaccine.”

“...Once inhaled by a susceptible individual, the [measles] virus undergoes a prolonged period of silent multiplication, first in the tonsils, adenoids, and accessory lymphoid aggregations of the nasopharynx; later in the regional lymph nodes of the head and neck; and eventually, several days later, it passes into the blood and enters the spleen, the liver, the thymus, and the bone marrow, the ‘visceral’ organs of the immune system. Throughout this ‘incubation’ period, which lasts from 10 to 14 days, the patient typically feels quite well, and experiences few or no symptoms of any kind.”

“By the time that the first symptoms of measles appear, circulating antibodies are already detectable in the blood, and the height of the symptomatology coincides with the peak of the antibody response. In other words, the ‘illness’ that we call the measles is simply the definitive effort of the immune system to clear this virus from the blood. Notice also that this expulsion is accomplished by sneezing and coughing, i. e., via the same route through which it entered in the first place. It is abundantly clear from the above that the process of mounting and recovering from an acute illness like the measles involves a general mobilization of the immune system as a whole, including inflammation of the previously sensitized tissues at the portal(s) of entry, activation of leukocytes, macrophages, and the serum complement system, and a host of other mechanisms, of which the production of circulating antibodies is only one, and by no means the most important.”

“Such splendid outpourings indeed represent the decisive experiences in the normal physiological maturation of the immune system in the life of a healthy child. For recovery from the measles not only protects children from being susceptible to it again, no matter how many more times they may be exposed to it, but also prepares them to respond promptly and effectively to any other infections they may encounter in the future. The ability to mount a vigorous acute response to infection must therefore be reckoned among the most fundamental requirements of health and well-being that we all share.”

“By contrast, the live but artificially attenuated measles-virus vaccine is injected directly into the blood, by-passing the normal port of entry, and sets up at most a brief inflammatory reaction at the injection site, or perhaps in the regional lymph nodes, with no local sensitization at the normal portal of entry, no ‘incubation period,’ no generalized inflammatory response, and no generalized outpouring. By ‘tricking’ the body in this fashion, we have accomplished precisely what the entire immune system seems to have evolved to prevent: we have placed the virus directly into the blood and given it free and immediate access to the major immune organs and tissues, without any obvious mechanism or route for getting rid of it.”

“The result is the production of circulating antibodies against the virus, which can in fact be measured in the blood; but this antibody response occurs as an isolated technical feat, without any overt illness to recover from, or any noticeable improvement in the general health of the recipient. Indeed, I submit that exactly the opposite is true, that the price we have to pay for these antibodies is the persistence of viral elements in the blood for long periods of time, perhaps permanently, which in turn carries with it a systematic weakening of our capacity to mount an acute response, not only to the measles, but to other infections as well.”

“Far from producing a genuine immunity, then, my suspicion and my fear is that vaccines act by interfering with and even suppressing the immune response as a whole, in much the same way that radiation, chemotherapy, corticosteroids, and other anti-inflammatory drugs do. Artificial ‘immunization’ focuses on antibody production, a single aspect of the immune process, disarticulates it, and allows it to stand for the whole, in much the same way as chemical suppression of an elevated blood pressure is accepted as a valid substitute for genuine healing or cure of the patient whose blood pressure has risen. It is the frosting on the cake, without the cake. The worst part of this counterfeiting is that it becomes more difficult, if not impossible, for vaccinated children to mount a normally acute and vigorous response to infection, by substituting for it a much weaker, essentially chronic response, with little or no tendency to heal itself spontaneously.” – Dr Richard Moskowitz – from “The Case Against Immunizations”

“The number of ‘cases’ in turn is dependent on the numbers of ‘positive’ PCR tests. You may have seen the term ‘casedemic’ being used to describe the situation, and while that term can also be misused, it legitimately calls attention to the problem of using PCR tests for diagnostic purposes and justifying policies based on ‘cases’...While PCR tests can be useful to confirm a diagnosis of COVID-19, they should never be used by themselves as a diagnostic tool. Yet, in ‘case’ counts, that is precisely what’s been done: people who do not have the disease and are not contagious are being counted as COVID-19 ‘cases’, and these numbers in turn are being cited to justify continued lockdown measures.” – Jeremy R. Hammond, Independent Journalist and Author – www.jeremyrhammond.com

“Covid-19 ‘cases’ are a practically meaningless metric, especially in light of how their numbers are determined by counting ‘positive’ results from RT-PCR tests that do not

distinguish between viable virus and non-infectious viral RNA. Even the lockdown-loving New York Times has admitted that 90% of so-called ‘cases’ in the US have been individuals who were probably not contagious.” — Jeremy R. Hammond

“Just as there are professional propagandists masquerading as ‘journalists’, so are there propagandists dutifully masquerading in their role as ‘scientists’ to deceive the public in order to manufacture consent for harmful authoritarian policies.” – Jeremy R. Hammond

“...if a person gets a “positive” PCR test result at a cycle threshold of 35 or higher (as applied in most US labs and many European labs), the chance that the person is infectious is less than 3%. The chance that the person received a “false positive” result is 97% or higher.” – Swiss Policy Research

“There’s no reason to be walking around with a mask...While masks may block some droplets, they do not provide the level of protection people think they do. Wearing a mask may also have unintended consequences: People who wear masks tend to touch their face more often to adjust them, which can spread germs from their hands.” — Dr. Anthony Fauci (60 Minutes interview – March 8, 2020)

“Aluminum adjuvants (which are present in many vaccines) cause behavioral abnormalities, abnormal weight gain, learning and memory impairment, motor neuron death/apoptosis, neuromuscular strength deficits, chronic microglial activation/brain inflammation and large increases in brain and spinal cord aluminum content. These adverse effects occur at dosages less than or approximately equal to dosages received by infants according to the CDC vaccine schedule.” – [Informed Consent Action Network](#)

“The medical profession is being bought by the pharmaceutical industry, not only in terms of the practice of medicine, but also in terms of teaching and research. The academic institutions of this country are allowing themselves to be the paid agents of the pharmaceutical industry. I think it’s disgraceful.” – Arnold Seymour Relman, MD (1923-2014), Harvard Professor of Medicine and former Editor-in-Chief of the New England Journal of Medicine

(The American Academy of Pediatrics (AAP) derives a majority of its outside contributions – estimated at more than \$25 million per year – from pharmaceutical companies that make vaccines. The pediatricians that the AAP represents derive the majority of their annual revenues from the administration of vaccines to their pediatric patients.) — J.B. Handley

“The majority of studies that authorities point to as proof that vaccines do not cause autism have been published in a journal called Pediatrics, the official journal of the American Academy of Pediatrics. As we know, the AAP is a trade union for pediatricians.” – J.B. Handley

“You’d be amazed at the number of physicians who don’t know what’s in a vaccine. They’ll say, well, there’s the bacteria, the virus you want to vaccinate against, and then there’s a little immune stimulant in there to help stimulate the immunity so they react against those viral antigens. They don’t know about these other chemicals in there like aluminum, mercury, formaldehyde, special proteins, special lipids that are known to be brain toxic, that are known to induce autoimmunity in the brain. They’re not aware of that. They don’t know that MSG is in a lot of vaccines—monosodium glutamate, a brain excitotoxin. They’re not aware of what’s in the vaccine they’re giving! — Russell Blaylock, MD

“Most physicians haven’t got a clue about vaccines. Physicians are undeservedly endowed with a mantle of authority and therefore most of their patients think vaccines are simple, safe and effective. And therefore, there is nothing much to know about vaccines except that they somehow illicit an immune response and magical antibodies will protect the inoculated patient for life. Total ignorance. But that’s what ‘The Snake’ tells physicians starting in medical school; and, since medical school (and nursing school) professors are also undeservedly endowed with a mantle of authority, both of whose healthcare professional groups believed it from the start. Until they get bit.” - Anonymous Anti-Over-Vaccination activist parent

“The true mortality rate of Corona virus is less than one in 100,000, or $\leq 0.001\%$, which is even 10 times less than the whistleblowers explain why they died. Therefore, it was not the Corona/COVID-19 virus that killed them. Professor Püschel concludes strongly that we have absolutely no reason to fear that the virus will kill us. The average age of the Corona/COVID-19 dead that Professor Püschel did autopsies on was 80 years old, and they all had one or more severe diseases that could explain why they died. Therefore, it was not the Corona/COVID-19 virus that killed them. Prof Püschel concludes strongly, that we have absolutely no reason to fear that the virus will kill us.” — Søren Ventegodt, MD, Copenhagen, Denmark

“The pharmaceutical industry obviously benefits from the panic over the COVID-19 pandemic. Could it be that the pharmaceutical companies have influenced how the mortality is measured and how the statistics are interpreted? Could commercial interests from the pharmaceutical companies producing vaccines for the world influence the way the World Health Organization (WHO) operates, the information it provided, the advice and guidance it offers to the world? Yes, it is possible, and it could explain how this whole Corona alarm and panic started. The stronger the interest, the less you can trust the data. If there is money involved, you need to be especially skeptical.

“A medical statistic made by a provider or manufacturer of a drug or a vaccine is normally flawed and manipulated to such an extent that you cannot believe in the statistics. To answer this question about how big the influence of the pharma industry might be we need a deep exploration of the WHO, its peoples, the communication between internal organizations in the WHO, and with the industry and people related to the pharmaceutical industry. We need total transparency and full access to all communication in and with the WHO. The lack of openness has earlier made it difficult to investigate the WHO’s Processes.” — see [this](#)

“Do you remember the “Swine Flu Scandal” of 2009 and the World Health Organization’s (and the CDC’s) panicky pandemic prognosis at that time? The definition of ‘pandemic’ was changed by WHO 12 years ago to ‘just a worldwide disease’. Many serious illnesses and many deaths were not required anymore, to announce a pandemic. Due to this change the WHO was able to declare the swine flu pandemic in 2009, with the result that (fast-tracked, poorly tested, and therefore dangerous) vaccines were produced and sold worldwide, on the basis of contracts that have been kept secret until today. During the swine flu in 2009, Drosten was one of those who stirred up panic in the population; repeating over and over again that the swine flu would claim many hundreds of thousands, even millions of deaths, all over the world. Thanks to Germany’s Dr Wolfgang Wodarg, this hoax was brought to an end before it would lead to even more serious consequences.” — Dr Reiner Fuellmich

“Also remember that the WHO has lied before, in 2009, when they said the swine flu was

dangerous and millions would die, and based on this, most governments bought many vaccines. It turned out that the swine flu was just the normal flu, and what is even more worrying, the vaccines the governments had bought had to be destroyed because of negative side effects. Many children became handicapped because of the swine flu vaccines. There is a conflict of interests in WHO (and the world's CDCs) because they are sponsored by pharmaceutical industries. The swine flu scandal is documented." — Dr Reiner Fuellmich

Dr Gary G. Kohls is a retired American family physician who practiced holistic (non-drug) mental health care during the last decade of his professional career. His patients came to see him asking for help in getting off the psychotropic drugs to which they were addicted and which they knew had sickened them and disabled their brains and bodies. He was successful in helping significant numbers of his patients get off or cut down on their cocktails of drugs using a time-consuming program that was based on psychoeducational psychotherapy, brain nutrient therapy and a program of gradual, closely monitored drug withdrawal.

He warns against the abrupt discontinuation of any psychiatric drug - legal or illicit - because of the common, often serious withdrawal symptoms that can occur in patients who have been taking such drugs. It is important to be treated by an aware, informed physician who is familiar with treating drug withdrawal syndromes and brain nutritional needs.

Dr Kohls lives in Duluth, MN, USA and writes a weekly column for the Duluth Reader, the area's alternative newsweekly magazine. His columns deal with the dangers of American fascism, corporatism, militarism, racism, malnutrition, Big Pharma's psychiatric drugging and over-vaccination regimens, and other movements that threaten the environment, prosperity, democracy, civility and the health and longevity of the planet and the populace.

Many of Dr Kohls' columns have been archived at a number of websites around the world, including these five:
