*Today's news is a sudden and unexpected plunge in birth rates in Australia.*

7NEWS Sydney

@7NewsSydney

Australia appears to be suffering a baby drought with latest figures showing fertility rates are nearing historic lows. It's currently at around 1.7 below the 2.1 rate needed for a stable population. [7NEWS.com.au](https://www.7news.com.au)

Australia's News.Com.Au [has an article](#) about it, and they blame... climate change!

Australian National University demographer Dr Liz Allen said the drop in births was due to a combination of factors, both personal and external - in particular, concerns about housing, cost of living, **and climate change**. **"Climate change has been cited by young people in Australia**, and other similar countries, as a major concern and barrier to having children," Dr Allen told news.com.au.

**"The fear of uncertainty owing to growing weather and climate extremes means young people are calling it quits on children citing ethical concerns."**

I am unsure if Dr. Allen realizes or cares that "climate concerns" are anything but new. What is new is the "safe and effective" Covid vaccine forced on young Australian men and women in 2021 and 2022, but I digress.

## Expert hits back at anti-vaxxers for hijacking birth data for 'faux science'

The number of babies born in some public hospitals has dropped to their lowest levels in more than a decade - sparking a conspiracy.

The real ire of the article is directed at antivaxxers, who are cunningly trying to *hijack this story* and point out that Covid vaccine is to blame.

Antivaxxers, you see, are the real culprits here! These ignorant, conspiracy-minded, science-denying vaccine skeptics, the newspaper explains, falsely blame Covid vaccines and are saying, **"We told you so."**

Her **expert analysis was hijacked by anti-vaxxers** who falsely claimed Covid vaccines were the reason for the decline. Taking to Twitter, controversial Gold Coast entrepreneur Jamie McIntyre rejected Dr Allen's analysis that concern for climate change had factored into family planning. McIntyre - a "self-help guru and motivational speaker" - claimed the **"dramatic drop off in births" had come "since a certain not so safe, effective, or necessary vaccine was forced upon the elderly, pregnant mums, and even children"**.

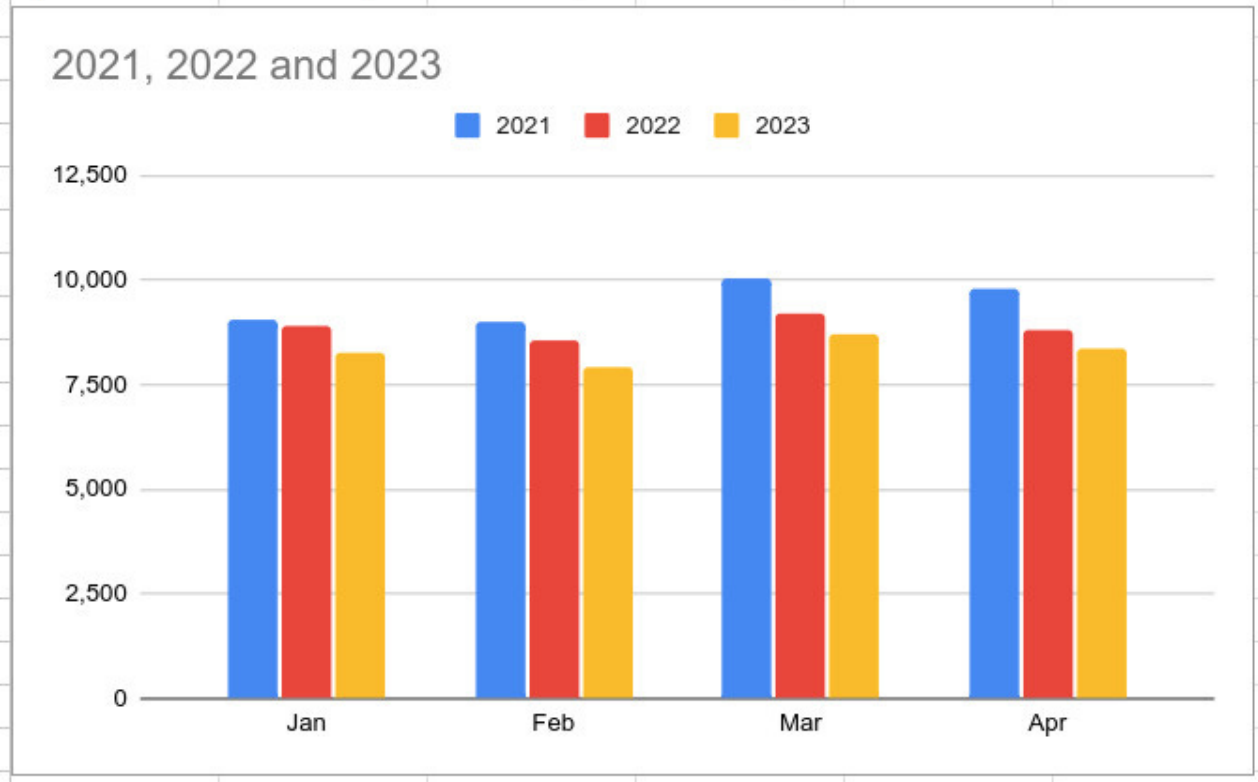

### Australia is not alone - Look at Sweden.

Not many countries report births in a timely manner. Sweden does. Regrettably, [Swedish birth rates](#) are also down significantly. Not only are they down, but the 2023 births are much worse than the 2022 births, which were also depressed.

I tabulated this data for you so you can see the decline:

	2021	2022	2023
Jan	9,071	8,917	8,277
Feb	8,989	8,546	7,928
Mar	10,067	9,194	8,727
Apr	9,823	8,816	8,383

So, both Australia, as well as Sweden are experiencing similar birth declines.

Things have worsened since my last update on plummeting birth rates.

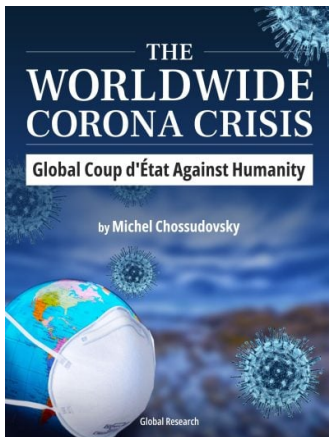

It must be climate change, right? I mean, what else could it be?

## **The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity**

**by Michel Chossudovsky**

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

*“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”*
