

Behind “The Great Reset” and “The Green Pass” Is Big Finance: Plan for Power Consolidation and Social Control: Manlio Dinucci

The BlackRock, Vanguard and State Street Investment Giants

The main vaccines used in Italy in the “Covid-19 vaccine plan” are produced by three U.S. pharmaceutical companies – Pfizer, Moderna and Johnson & Johnson – owned and controlled by the three largest U.S. investment companies: BlackRock, the largest in the world, Vanguard and State Street. These three financial firms also own and control the U.S. pharmaceutical company Merck, which first produced the “anti-Covid pill.”

BlackRock, headed by Larry Fink, has thousands of companies from all sectors in its portfolio. The capital it manages has grown in the last ten years from 3,500 to 9,500 billion dollars (more than 5 times the GDP of Italy) and is increasing further. In this way, BlackRock, Vanguard and State Street have a decision-making voice in the boards of directors of the major multinationals and banks, including central banks. The largest U.S. investment bank, Goldman Sachs (of which Mario Draghi was vice-president), is owned and controlled by the same “Big Three”. The same is true of Standard & Poor Global, the rating agency that monitors the world’s economies, failing or promoting them.

These facts show that behind the Great Reset there is Big Finance, which is implementing a plan to centralize power and social control with tools such as the “green pass”.

To these are now added others that leverage, in addition to the “pandemic risk”, the “climate risk”. As BlackRock states, “climate risk will fundamentally reshape finance and drive a significant reallocation of capital.”

To that end, while making a spectacle of global warming by announcing imminent catastrophe, they ignore the continuing deterioration of air quality, which, according to the European Environment Agency's 2021 report, causes about 65,000 deaths per year in Italy, roughly the same number attributed to Covid-19.

The episode of Grandangolo can also be seen on [this website](#).
