

Biden to Mandate Mask Wearing, Mandatory Mass Vaxxing to Follow?

By [Stephen Lendman](#)

Porous face masks offer no protection from minuscule covid spores.

Extended wearing is potentially hazardous to human health.

Mass vaxxing could be catastrophic if ordered.

Covid is a form of seasonal flu/influenza.

Protection comes from good health habits, including proper diet, regular exercise, a daily vitamin/mineral supplement with enough vitamin D, zinc, and plenty of vitamin C.

It does not come from mask-wearing or vaxxing. Both practices risk potentially serious harm to human health.

Defying reality, Biden called mask wearing “a patriotic act (sic),” adding:

“My first 100 days is going to require...I’m going to ask for a masking plan...everyone, for the first 100 days of my (regime), to wear a mask.”

“It will start with my signing an order on day one to require masks...”

Saying it’s “the single most effective thing we can do to stop the spread of COVID” defies science.

Everyone should practice what benefits human health, not what may harm it.

Will 100 days of mask-wearing lead to 200, 300, then making it permanent?

Seasonal flu/influenza shows up annually like clockwork, affecting millions in the US and abroad.

Until this year, it’s been unaccompanied by fear-mongering headlines and mass hysteria.

Mandated mask wearing has nothing to do with protecting human health — everything to do with social control.

Mass vaxxing with harmful to health toxins may be a diabolical depopulation scheme by inducing infertility and greater numbers of deaths among the elderly with weak immune systems.

Resistance is the only option. The alternative would be like Dante’s Inferno.

Abandon all hope henceforth — wrapped in the American flag.

PCR tests are a fear-mongering scam. They mostly result in false positives.

Dr. Pascal Sacre and other medical/scientific experts consider them a diabolical scheme to lock down society.

It's also a mass surveillance scheme by collecting human DNA, as well as a way to restrict free movement.

The result is clear. For 38 straight weeks since March, over a million working-age Americans applied for unemployment insurance (UI) benefits.

What's happening throughout most of 2020 is unprecedented in US history — with no end of it in prospect.

For the week ending Thursday, 853,000 Americans sought UI help.

Another 428,000 applied for Pandemic Unemployment Assistance (PUA) — 1.3 million in total.

Economist John Williams said “US economic collapse (keeps) hardening...”

Real US 2020 inflation is 8.8% through November, not the phony official 1.17%.

Real US unemployment is 26.3%, not the misleading BLS reported 6.7%.

For ordinary Americans, economic conditions are dismal.

Heading into the new year, they'll likely worsen — with scant federal help at most when far more is needed.

On Thursday, the Economic Collapse blog (TEC) reported that 48% of US small businesses fear they'll be forced to shut down “permanently” before yearend for lack of enough revenue to keep operating.

Layoffs are rising, not leveling off or declining.

The above data come from an Alignable survey of small businesses.

Largely local operations nationwide, they comprise “the heart and soul” of US private enterprise.

When they go down in unprecedented numbers like now, scant job opportunities remain for their let go workers.

When unemployment benefits expire, jobless Americans need federal aid in new forms.

Without it, they're unable to pay for food and other essentials to life.

According to the Epoch Times, “New Yorkers will no longer get to decide if they will receive a COVID-19 vaccine if a bill calling for...mandatory (vaxxing state-wise) gets approved.”

Introduced on December 4, it calls for administering mass vaxxing of state residents by New York's health department.

If enacted into law, it'll have nothing to do with "protect(ing) health," nothing to "ensure (that New York) residents are safe and protected against further spread."

It'll be a social control measure with inadequately tested experimental vaccines that may risk great harm.

Will other US states and the federal government follow New York's example?

We're in uncharted territory, a brave new world unfolding in real time beyond what Orwell and Huxley imagined.

Huxley noted that "(p)eople will come to love their oppression, to adore technologies that undue their capacities to think."

Orwell said "(y)ou must love Big Brother. It is not enough to obey him. You must love him."

Is this where things are heading in the US, West, and elsewhere?

Will ordinary people resist or accept control by a higher power, losing precious freedoms?

In the US, Republicans and Dems are on the same page in wanting to force-feed the above to unsuspecting people.

Covid is the vehicle — a form of seasonal flu/influenza falsely promoted as a potentially deadly andromeda strain to scare us into submission to members of the nation's ruling class.

It's for their benefit at our expense if we yield to what demands resistance.
