

Biden's New NIH Director Nominee, Who Was Selected by Fauci, Received \$290 Million in Grant Funding from Pfizer

The ultimate red flag: Fauci personally advocated for Dr Monica Bertagnolli to become the nominee.

The White House has nominated a Pfizer-tied doctor to become the next director of the National Institutes of Health (NIH).

In a statement released by the White House, President Biden declared **Dr. Monica Bertagnolli** "a world-class physician-scientist whose vision and leadership will ensure NIH continues to be an engine of innovation to improve the health of the American people."

The NIH is currently led by Lawrence Tabak, a Bill Gates [stooge](#) who replaced longtime NIH chief Francis Collins.

Collins resigned after emails surfaced that he and Anthony Fauci, among others, coordinated with other influential figures to silence doctors and scientists who opposed the covid hysteria narratives.

Dr Bertagnolli has received a stunning \$290.8 million in research funding from Pfizer.

The Daily Signal, a project of the Heritage Foundation, [reported](#) that from 2015 through 2021, she "received more than 116 grants from Pfizer, totaling \$290.8 million, making up 89% of her research grants."

Anthony Fauci, [who remains on salary at the NIH and has a taxpayer-funded U.S. Marshals security detail](#), [told The Washington Post](#) that he personally advocated for her selection as the next NIH director.

If Bertagnolli gets the Senate’s stamp of approval, the hard part will really begin: Running the nation’s sprawling research agency. Anthony Fauci — the nation’s former top infectious-disease expert [who stepped down last year](#) — said he’d advocated for Bertagnolli to be selected as the new NIH director, believing she has a “very solid academic record” as well as the right leadership style to helm the agency.

- “She's got the kind of personality that I think is important for the director of NIH,” Fauci said in an interview. “She’s firm in her principles, but she is a very likable, easy to get along with, people person.”

Bertagnolli has also received \$17.4 million in grant funding from Janssen Research & Development LLC, a subsidiary of Johnson & Johnson.

The revolving door strikes again, now more in your face than ever before.
