“Founded in 1954, Bilderberg is an annual conference designed to foster dialogue between Europe and North America. Every year, between 120-150 political leaders and experts from industry, finance, academia and the media are invited to take part in the conference. About two thirds of the participants come from Europe and the rest from North America; approximately one third from politics and government and the rest from other fields.

The conference is a forum for informal discussions about major issues facing the world. The meetings are held under the Chatham House Rule, which states that participants are free to use the information received, but neither the identity nor the affiliation of the speaker(s) nor of any other participant may be revealed.

Thanks to the private nature of the conference, the participants are not bound by the conventions of their office or by pre-agreed positions. As such, they can take time to listen, reflect and gather insights.

There is no desired outcome, no resolutions are proposed, no votes are taken, and no policy statements are issued.” See <http://www.bilderbergmeetings.org/>
