Bill Gates has warned that the next pandemic will be worse than COVID-19 and it'll also be "man-made." The Microsoft co-founder said that the next one will be "much more brutal" than the mild cold symptoms experienced with the coronavirus.

Gates told the Lowy Institute think tank in Sydney on Monday that the ruling class needs to set aside their "differences" and work together to control the public to prepare for the next virus. He called for greater global cooperation using the Covid-19 pandemic as an example of how countries could improve their stranglehold on humanity and the slave class.

[According to The Daily Mail UK](#), Gates wants the world to model Australia's totalitarian control and psyop that had people willingly bowing to masters and voluntarily giving up their inalienable rights. "Compare the economic cost of being prepared for the next one to the cost of this one, over \$US10 trillion economic loss," he said. "With the pandemic, we were foolish not to have the tools, the practice, and global capacity to be on standby like we do with fire or earthquakes."

Gates praised Australia's policies in helping to keep infection rates low before vaccines were rolled out. "Some of the things that stand out are that Australia and about seven other countries did population scale diagnostics early on and had quarantine policies," he said.

Total control over the population means that COVID doesn't spread, apparently. "That meant you kept the level of infection low in that first year when there were no vaccines."

"The one thing that still hangs in the balance is will we have the global capacity and at the regional and country levels that would mean that when an (infectious disease) threat comes up we act in such a way that it doesn't go global," Gates said. "We need to be doing every five years a comprehensive exercise at both country and regional levels of pandemic preparedness and you need a global group that's scoring everybody."

Gates added that he thinks China's obvious slave system is good. "I see China's rise as a huge win for the world ... the current mentality of the US to China, and which is reciprocated, is kind of a lose-lose mentality." That means he thinks total control, and worse slavery than we are living under now will be a "win". But for whom? Certainly to those in slave class.
