*Blood clots have been a major problem with all COVID-19 vaccines, including Pfizer and Moderna.*

I have written several substack articles about those who have died from clots:

- [April 30, 2023](#) - Blood clots - pulmonary emboli in young women - 14 cases
- [April 11, 2023](#) - Strokes are skyrocketing in young people
- [March 6, 2023](#) - Blood clots - young people having amputations

Those who have survived blood clots after COVID-19 vaccines are lucky to be alive but most have had a very difficult course.

June 23, 2023 - 55 year old NFL Hall of Famer and Colorado Buffaloes head coach Deion Sanders has struggled with blood clots in legs that resulted in 2 toes amputated. He recently had surgery to remove clots and avoid further amputation ([click here](#))

# Deion Sanders recovering after successful emergency surgery to repair blood clots in legs

Sanders told his family he expects to be released Sunday from the hospital after Friday's procedure

By [Cameron Salerno](#) Jun 25, 2023 at 7:49 am ET • 2 min read

Colorado football coach Deion Sanders is recovering after emergency surgery to treat persistent blood clots in his legs he announced in a video posted Saturday. The procedure was to correct blood-flow issues that have plagued Sanders dating back to his days coaching at Jackson State.

In the Instagram video, Sanders told his sons he expects to be released on Sunday, just two days after Friday's procedure.

"I had a big blood clot in my thigh that they got out, and I had some below my knee that they got out," Sanders said from his hospital bed. "Then I've got one in the right leg that they're going to get soon."

July 1, 2023 - 45 yo actor Tyler Labine is recovering from a stomach ache that "turns out to be a potentially fatal blood clot in your intestines and liver and you have to spend the next 3 days in the hospital trying not to die" (he was fully COVID-19 vaccinated)

**New Amsterdam's Tyler Labine is recovering from what could've been a "potentially fatal" blood clot**  
 The actor posted about the experience on Instagram, including an ambulance ride

**Tyler Labine**

Character actor Tyler Labine, possibly best known for *Tucker And Dale Vs. Evil* even though he spent five seasons on NBC doctor show *New Amsterdam*, has had what sounds like a pretty painful and frightening week after realizing he had a "potentially fatal blood clot" impacting his "intestines and liver." Labine posted about the experience on Instagram (via *Deadline*), complete with a video showing himself in a hospital gown and riding in an ambulance.

tlabine Sometimes it's a Tuesday and you're walking around with a tummy ache so you try to sleep it off. Then sometimes you wake up on a weds with a stomach ache so bad you decide to go to the ER at your local hospital. And then sometimes your tummy ache turns out to be a potentially fatal blood clot in your intestines and liver and you have to spend the next 3 days in the hospital trying not to die. Just sometimes.

I'm doing alright. Slow recovery but I'm here with my family supporting me

**Tyler Labine Getting His Second Covid-19 Shot On April 26, 2021**

June 6, 2023 – Elizabethton, Tennessee – Larry Bowers (works at James H. Quillen VA Medical Center) had clots removed from his leg. He is fully COVID-19 vaccinated and believes they were caused by COVID-19, not the vaccines.

**I GOT MY COVID-19 BOOSTER**

**WE CAN DO THIS**

This is the blood clots that they took out of my leg from Covid-19. I am lucky to be alive.

May 25, 2023 – Hartford, CT – Kristen Ann Mallinson, a business major, had Pfizer COVID-19 mRNA vaccines with 3 boosters. She was hospitalized 11 days with blood clots in lungs and heart, with a 6" blood clot in the heart (picture below). She regrets getting vaccines ([click here](#))

**Kristen Ann Mallinson** ▸ Open Heart Surgery Survivors "The Zipper Club" ...  
June 6 at 12:52 PM · 🌐

11 days in the hospital. 2 emergency surgeries. 1 blood transfusion. The first picture are the blood clots on my lungs. Then they found out I was allergic to Heparin, the primary blood thinner used for PEs. I formed a heparin induced thrombocytopenia pf4 antibody, meaning my body rejected the blood thinner and made more clots (basically fighting the heparin drug). A large clot traveled into the left and right chambers of the heart where they realized I was born with a hole in my heart. Usually it is closed where a blood clot won't travel to the left chamber. If it broke off it would go straight to my brain causing a stroke. This called for emergency open heart surgery. [The second picture shows the blood clot on my heart being over 6"](#)

I am now 5 weeks post OHS. I'm physically getting stronger but mentally still shocked. Joined to have a better support system!

**Michael Bowes**  
When did you get your Covid vaccine and latest booster shot? Glad you are doing better! Those are scary clots! ...

May 21, 2022 - Brisbane, Australia - 26 yo Dani Duchatel died suddenly in front of her family while playing cards after dinner. Doctors believe a blood clot from a recent operation on her leg travelled to her lung causing a pulmonary embolism. Nonsense. ([click here](#))

**A WOMAN died suddenly in front of her family while playing cards after dinner.**

Dani Duchatel, 26, went into [cardiac arrest](#) and collapsed at her parents' home on Sunday night.

Dani Duchatel died following a family dinner on May 21 Credit: Facebook

**The 26-year-old went into cardiac arrest just weeks after surgery for a broken leg**  
Credit: Facebook

She had been staying there while recovering from surgery for a broken leg several weeks earlier.

Dani's mum Kay desperately performed [CPR](#) but she could not be saved.

Doctors believe a blood clot from the operation on her leg travelled to her lung, causing a [pulmonary embolism](#) - or blocked artery.

Dani's aunt Sharon Glover described her niece as her "darling girl".

She said alongside a photo of the two of them: "Of all the many blessings I've had in this world, the greatest one was the honour of being your aunt.

"The tears on my face I can wipe away but the ache in my heart will last forever.

"Fly high my darling girl. Love you always."

Dani, from [Brisbane, Australia](#), had just bought a house in Albion and said she was "so excited and nervous to start this new chapter".

Feb. 1, 2023 - Willington, UK - 20 year old footballer Levi Dewey went to hospital with flu symptoms, then suffered severe sepsis and had to have both legs amputated after suffering multiple organ failure ([click here](#))

Jan. 1, 2023 - UK Piano Teacher Julianna Bransden suffered catastrophic injuries after COVID-19 vaccines ([click here](#))

Julianna was fully COVID-19 vaccinated. On Dec. 23, 2022 she developed flu like symptoms and on Jan. 1, 2023 she had two cardiac arrests, went into septic shock, multiple systemic organ failure, needing full life support.

She was diagnosed with sepsis resulting from an aggressive form of pneumonia. After weeks of fighting, she had to undergo surgery to amputate both of her legs below the knee and will lose most of her fingers.

Oct. 24, 2022 - 29 year old Krystina Pacheco suffered toxic shock syndrome after giving birth to her daughter on Oct. 24, 2022, resulting in the amputation of her hands and feet days later.

Dec. 2021 - 40 year old Twitter user regrets getting COVID-19 vaccines ([click here](#))

**JROCKETT**  
@JROCKETT6

Vaxxed & regret it. On blood thinners for the rest of my life (I'm in my early 40's) because I developed a rare blood clot in my artery behind my knee two weeks after my first jab. Had to have a bypass; Surgery Dec 2021. More Drs appts now than ever before.

5:56 AM · Dec 8, 2022

Nov. 2021 - Bryant, AR - Brandy Byrd-Brazeale, a 5th grade teacher took two Pfizer mRNA vaccines hesitantly and 2 months later developed DVT in her right leg which ultimately led to a pulmonary embolism in her right lung ([click here](#))

April 2021 – Sherri Whiting is a licensed realtor. A friend of hers got a Moderna shot and 2 weeks later they thought she was having a stroke. It was a blood clot that went from her elbow to her shoulder ([click here](#))

## My Take...

All COVID-19 vaccines are thrombogenic (cause blood clots): Pfizer, Moderna, AstraZeneca, J&J. The latter two were taken off the market for causing blood clots.

WHO's VigiAccess database lists 5.1 million adverse reactions to COVID-19 vaccines, including: 29751 Pulmonary Embolism, 20251 thrombosis, 20017 DVT, 18077 cerebrovascular accident, 9695 MI, 5308 Ischemic stroke, 4807 cerebral infarction, 3255 SVT, 2495 cerebral venous sinus thrombosis, 2204 venous thrombosis limb

That's over 100,000 reported blood clot events in one adverse event reporting system. Apply an under-reporting factor of 10x or 100x and that means there are between 1 million and 10 million COVID-19 vaccinated people with blood clots.

Some of them fatal.

# The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

*“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”*
