The Trilateral Commission’s 50th anniversary marks the culmination of its self-proclaimed “New International Economic Order”. On March 12, the Trilateral Commission held its plenary meeting in New Delhi, India to discuss issues relating to globalization. Trilateral Commission co-founder Zbigniew Brzezinski’s “Technetronic Era” has apparently officially arrived.

Amid the new world alliances that are forming as India and China seek to normalize relations and as China just brokered a relationship between Saudi Arabia and Iran, the globalist narrative has opened a new, and possibly final, chapter. According to [Nikkei Asia](#), one unnamed Trilateral Commission member addressed the plenary meeting and stated,

“Three decades of globalization — defined as integrated, free-market based and deflationary — has been replaced by what will be a multidecade period of globalization defined as fragmented, not-free-market-based but industrial-policy based and structurally inflationary. This year, 2023, is Year One of this new global order.”

This reflects Brzezinski’s early strategy to transform the world as he wrote in *Between Two Ages: America’s Role in the Technetronic Era*:

“The nation-state as a fundamental unit of man’s organized life has ceased to be the principal creative force: International banks and multinational corporations are acting and planning in terms that are far in advance of the political concepts of the nation-state.”

Welcome to the “new global order”.

The Trilateral Commission Gives The Signal To the WEF

Klaus Schwab, founder of the World Economic Forum (WEF), stated in 2020, “The pandemic represents a rare but narrow window of opportunity to reflect, reimagine, and reset our world”. This followed my analysis that the so-called pandemic was Technocracy’s coup d’état that had been building up for over 45 years at the hands of the Trilateral Commission. In fact, I have argued consistently that the Commission’s original “New International Economic Order” was nothing more than Technocracy warmed over from the 1930s. It was Brzezinski’s Technetronic Era. It was the United Nations’ Sustainable Development. It was Biden’s Green New Deal – all one and the same and all strategized by members of the Trilateral Commission starting in 1973.

The WEF is thoroughly intertwined with the United Nations and vigorously promotes its Sustainable Development Goals. The WEF website states,

The COVID-19 pandemic has presented its fair share of challenges but has also offered opportunities. The World Economic Forum has assembled physical events for over 50 years, but we now have a unique opportunity to take the experience online.

As part of the Sustainable Development Impact Summit 2020, the World Economic Forum is experimenting with a 3D environment that allows spacial exploration of the Sustainable Development Goals, SDG-specific content discovery, and experiencing the ambience of a physical event from your computer. Watch the video below for a sneak peek of our exploration.

When Schwab says that the WEF is “reimagining the future”, he is flatly misleading. The future was already reimagined by early members of the Trilateral Commission such as Zbigniew Brzezinski, David Rockefeller, Richard Gardner and, Henry Kissinger (all founding members).

On June 3, 2020, Schwab wrote on the WEF [blog](#),

To achieve a better outcome, the world must act jointly and swiftly to revamp all aspects of our societies and economies, from education to social contracts and working conditions. Every country, from the United States to China, must participate, and every industry, from oil and gas to tech, must be transformed. In short, we need a “Great Reset” of capitalism.

Now the Trilateral Commission, acting as quarterback, has relayed the call to the WEF that *“This year, 2023, is Year One of this new global order.”* In other words, pull out all the stops. The Great Reset has arrived. Execute the battle plan to terminate capitalism and free market economics.

What does this mean for 2023?

As I have written, we are already experiencing a “polycrisis of doom” where multiple crisis are descending upon us at the same time. There is a man-made energy crisis that is warring against coal, oil and natural gas. There is a man-made food crisis that is warring against all traditional food systems. There is a man-made financial crisis that threatens total collapse of the existing financial system. There is a man-made military conflict between Russia and Ukraine that threatens WWII.

Any one of these pending crisis could be seen as a “scorched-earth” policy where total destruction is possible down the the ground level. If all four are unleashed at the same time, it would be the equivalent of atomic warfare resulting in a literal “dark winter”. Such a collapsed world would then be ripe for total capture and rebuilding into Technocracy’s dystopia.

Don’t shrug your shoulders

It is unfortunate that hardly anyone has given any credence to the Trilateral Commission over the years. I will say pointedly that the first person to bust them was the late scholar and professor Antony C. Sutton, with whom I co-authored *Trilaterals Over Washington, Volumes I and II* between 1978-1981. Few paid attention back then, just as few pay attention today. We were mercilessly censored back then, just as I am censored today. Nevertheless, our work has stood the test of time and now the endgame is at hand.

If you feel like you are in the dark on this, now is the time to start reading and studying Sutton’s and my combined works.

Trilaterals Over Washington, Volumes I and II are available [here](#) and [here](#).

Each of my three books on Technocracy (available [here](#) and [here](#)) chronicle the Trilateral Commission’s role in creating this new order.
