According to trusted military sources of Inside Syria Media Center source in Syria, after the U.S. Tomahawk strikes on the Shayrat air base on April 7, Russia has taken measures to guarantee more security for its military in case the attack is repeated.

Sources also claimed that two Russian all-purpose jets capable of spotting and intercepting cruise missiles are barraging in the Eastern Mediterranean.

If any attacks on the objects, where the Russian military are located (including the Hmeimim and Tartus bases), take place, the Russians are likely to carry out retaliatory strikes on the ships that launch cruise missiles.

As our source states, Russian military advisors have been stationed at the positions of all of the Syrian anti-aircraft defense systems to assist in intercepting cruise missiles.
