Multiple local, state and federal agencies [are investigating](#) the Jan. 21 death of a California man several hours after receiving the COVID vaccine.

Placer County Sheriff's office said in a [Jan. 23 Facebook post](#) that agencies are "actively investigating this case." They also mentioned that the man had tested positive for [COVID](#) in December. The U.S. Centers for Disease Control and Prevention (CDC) recommends that individuals who have already had COVID and fully recovered should still get vaccinated.

The image shows a Facebook post from the Placer County Sheriff's Office. The post features a central graphic of the Placer County Sheriff-Coroner-Marshal badge, which is a gold star with a green banner across it that says "NEWS RELEASE". The badge also contains the text "PLACER COUNTY", "SHERIFF", "CORONER-MARSHAL", and "1851". The post text reads: "Placer County Public Health and the Placer County Sheriff-Coroner Division were recently notified of the death of an individual who tested positive for COVID-19 in late December. The individual was administered a COVID-19 vaccine several hours before their death on January 21, 2021. The vaccine was not administered by Placer County Public Health. There are multiple local, state, and federal agencies actively investigating this case; any reports surrounding the cause of death are premature, pending the outcome of the investigation. Our thoughts are with the family of the deceased." Below the text, there are engagement metrics: 571 likes, 711 comments, and 3K shares.

So far, in the U.S. only the [Pfizer-BioNTech](#) and [Moderna](#) vaccines have received [emergency use authorization](#). According to [news reports](#), it was unclear which [COVID vaccine](#) the man had received.

As of Jan. 15, [181 deaths](#) have been reported to the U.S.government’s [Vaccine Adverse Events Reporting System](#) as possibly being related to COVID vaccines. A [2010 study](#) by the U.S. Department of Health and Human Services concluded that “fewer than 1% of vaccine injuries” are reported to VAERS and [experts say](#) the government’s reporting system is “broken.”

From the 1/15/2021 release of VAERS data:

Found 181 cases where Vaccine targets COVID-19 (COVID19) and Patient Died

Table

↓	↑ ↓	
Age	Count	Percent
17-44 Years	5	2.76%
44-65 Years	29	16.02%
65-75 Years	25	13.81%
75+ Years	87	48.07%
Unknown	35	19.34%
TOTAL	181	100%

Earlier this month, [The Defender reported](#) on the death of a 56-year-old doctor 15 days after receiving the Pfizer vaccine, and on numerous deaths among the elderly in [Norway and Germany](#).

Meanwhile reports of injuries continue to surface in the media, including an [article in the Jerusalem Post](#) about a 17-year-old who was hospitalized in the intensive care unit after receiving the second dose of a COVID vaccine. Hospital officials told the Post they did not believe the boy’s illness was related to the vaccine.

Dr. Anthony Fauci [told reporters](#) last week that he was “knocked out” after receiving the second dose of the vaccine, but says he feels fine now. Fauci received the first dose of the Moderna vaccine in December on live television to boost the public’s confidence in the vaccine.

The CDC reported [21 cases](#) of anaphylaxis in people who received the COVID vaccine between Dec. 14 - 23, and [another 10](#) between Dec. 23 - Jan. 10. [Anaphylaxis](#) is a life-threatening allergic reaction.

Last week, [The Defender reported](#) that allergic reactions had caused California health officials to hit pause on a large batch of Moderna vaccines. A few days later, [Moderna said](#) it was okay to resume using that batch.

Today, multiple news outlets [reported](#) that Merck has ended its COVID-19 vaccine program after early trial data showed the vaccine maker’s two experimental vaccines failed to generate immune responses comparable to a natural infection or existing vaccines. [Bloomberg reported](#):

“The U.S. drug giant, which has a history of successfully developing vaccines, had adopted a different strategy from rivals Pfizer Inc., Moderna Inc. and [Johnson & Johnson](#), using a more

traditional approach of focusing on shots based on weakened viruses.”

[Children’s Health Defense](#) asks that anyone who suffers any side effect, from any vaccine, report it, [following these steps](#).
