Twitter user [Brad Pilon](#) has noted some concerning statistics from Canadian Public Health [\[DATA HERE\]](#) regarding adverse events for 12 to 17-year-old males as the vaccination rates increase. Myocarditis has almost doubled from 1 in 10,000 (August) to 1 in 5,000 in two months:

- Oct 17th 1 in 5,208
- Oct 10th 1 in 5,491
- Oct 3rd 1 in 5,543
- Sep 26th 1 in 5,938
- Sep 18th 1 in 6,414
- Sep 11th 1 in 6,640
- Sep 4th 1 in 6,752
- Aug 28th 1 in 6,973
- Aug 21st 1 in 7,880
- Aug 14th 1 in 8,361
- Aug 7th 1 in 10,060
- [\[DATA LINK\]](#)

Myocarditis is an inflammation of the heart muscle (myocardium). The inflammation can reduce your heart’s ability to pump and cause rapid or abnormal heart rhythms (arrhythmias). Unfortunately, this trend follows a presentation that was made during an FDA hearing in September (video below):

Many academic institutions and athletic organizations are requiring vaccinations as a condition of participation. This puts increased pressure on teens and young adults to take the vaccine despite any concerns of side effects. Many parents are also willing and eager to face the risks. The following noted exchange is an almost unfathomable cognitive disconnect in taking risks, and shared only to highlight how far some vaccine advocates are willing to go:

A week ago today my brother's 13-year-old son had his 2nd covid shot. Less than 3 days later he died.

The initial autopsy results (done Friday) were that his heart was enlarged and there was some fluid surrounding it. He had no known health problems. Was on no medications.

I'm so very sorry for your devastating loss. My eldest granddaughter is 12 and is about to have her 2nd vaccination. I planned to take her to hang out with me for a couple weeks. Now I'm worried.

I would definitely still get her vaccinated. If hadn't already vaccinated my 14-year-old, I would still do it. BUT: Especially for boys, I would monitor heart rate very frequently for the following week. I would even get up in the middle of the night to do it.

I struggle to understand this level of thinking...
