My Cancer Story!

I was diagnosed with stage 4 pancreatic cancer in August 2023, and without treatment, I had 3-6 months to sort out my affairs. I began my fenbendazole Protocol immediately. I nearly quit up since my quality of life had deteriorated dramatically. But I started to feel better. Less nausea. I had gained some weight back! Increased energy. My scan in November 2023 indicated that this severe cancer had neither grown or spread. My cancer marker dropped from over 100,000 to 35,000. As of January 2024, my new marker number was 18k!!! My oncologist was just scratching his head, and a family member said he seemed bewildered! And no, I did not inform him about the fenben.

I was terrified he'd drop me as a patient. I was quite appreciative for fenben and how it has helped me. I was feeling better and stronger. I had scans and bloodwork done in March, and my markers are now down to 6000. And the tumors were shrinking!!! Two weeks after my previous scan. I scanned again, and it returned NED.

THIS WAS MY PROTOCOL;

•MORNING

- Curcumin (600mg daily)
- Zinc (50mg)
- Milk thistle, As a food supplement, take 15 – 30 drops, 2–3 times daily in a little fruit juice or water. 7 days a week
- Serrapeptase (120,000lu)
- Fenbendazole (1000mg of Panacur C is advised to be taken seven days a week. It is recommended that it should be taken with a meal).

•NIGHT

- Curcumin (600mg tablet per day are recommended
- Berberine (600mg 2-3 times a day)
- Quercetin (500mg 1/day)
- Turkey Tail
- Vitamin E (800mg for 7 days a week)
- Fenbendazole (1000mg at night)
- Ivermectin 12mg daily 5/7days a week
- Limit sugar and processed food intake
- Drank green tea often

“My Cancer Story! I was diagnosed with stage 4 pancreatic cancer in August 2023, and without treatment, I had 3-6 months to sort out my affairs.

I began my fenbendazole protocol immediately.

I nearly quit up since my quality of life had deteriorated dramatically. But I started to feel better. Less nausea. I had gained some weight back! Increased energy. My scan in November 2023 indicated that this severe cancer had neither grown or spread. My cancer marker dropped from over 100,000 to 35,000. As of January 2024, my new

marker number was 18k!!! My oncologist was just scratching his head, and a family member said he seemed bewildered! And no, I did not inform him about the fenben.”

I was terrified he’d drop me as a patient. I was quite appreciative for fenben and how it has helped me. I was feeling better and stronger. I had scans and bloodwork done in March, and my markers are now down to 6000. And the tumors were shrinking!!! Two weeks after my previous scan. I scanned again, and it returned NED.

This was my protocol:

Morning

- Curcumin (600mg daily)
- Zinc (50mg)
- Milk thistle, As a food supplement, take 15 – 30 drops, 2-3 times daily in a little fruit juice or water. 7 days a week
- Serrapeptase (120,00IU)
- Fenbendazole (1000mg of Panacur C is advised to be taken seven days a week. It is recommended that it should be taken with a meal).

Night

- Curcumin (600mg tablet per day are recommended)
- Berberine (600mg 2-3 times a day)
- Quercetin (500mg 1/day)
- Turkey Tail
- Vitamin E (800mg for 7 days a week)
- Fenbendazole (1000mg at night)
- Ivermectin 12mg daily 5/7days a week
- Limit sugar and processed food intake
- Drank green tea often”

*

My Take...

This is an excellent protocol.
