*While cancer has long been considered a disease of old age, a surge in cases among Gen Z and millennials is gradually turning that trend on its head.*

Since 1990, cases of some types of cancers in young people have almost doubled in the US, even as rates have slowed or fallen in their parents and grandparents.

[Sydney](#) Towle, from [California](#), was just 23 when she was diagnosed with bile duct [cancer](#) in early August 2023 after doctors discovered a ‘sizable mass’ in her stomach that had been growing for four months.

‘I’m typically an [active person](#) but suddenly I started feeling short of breath, and this strange burning sensation took hold in my tummy,’ she shared.

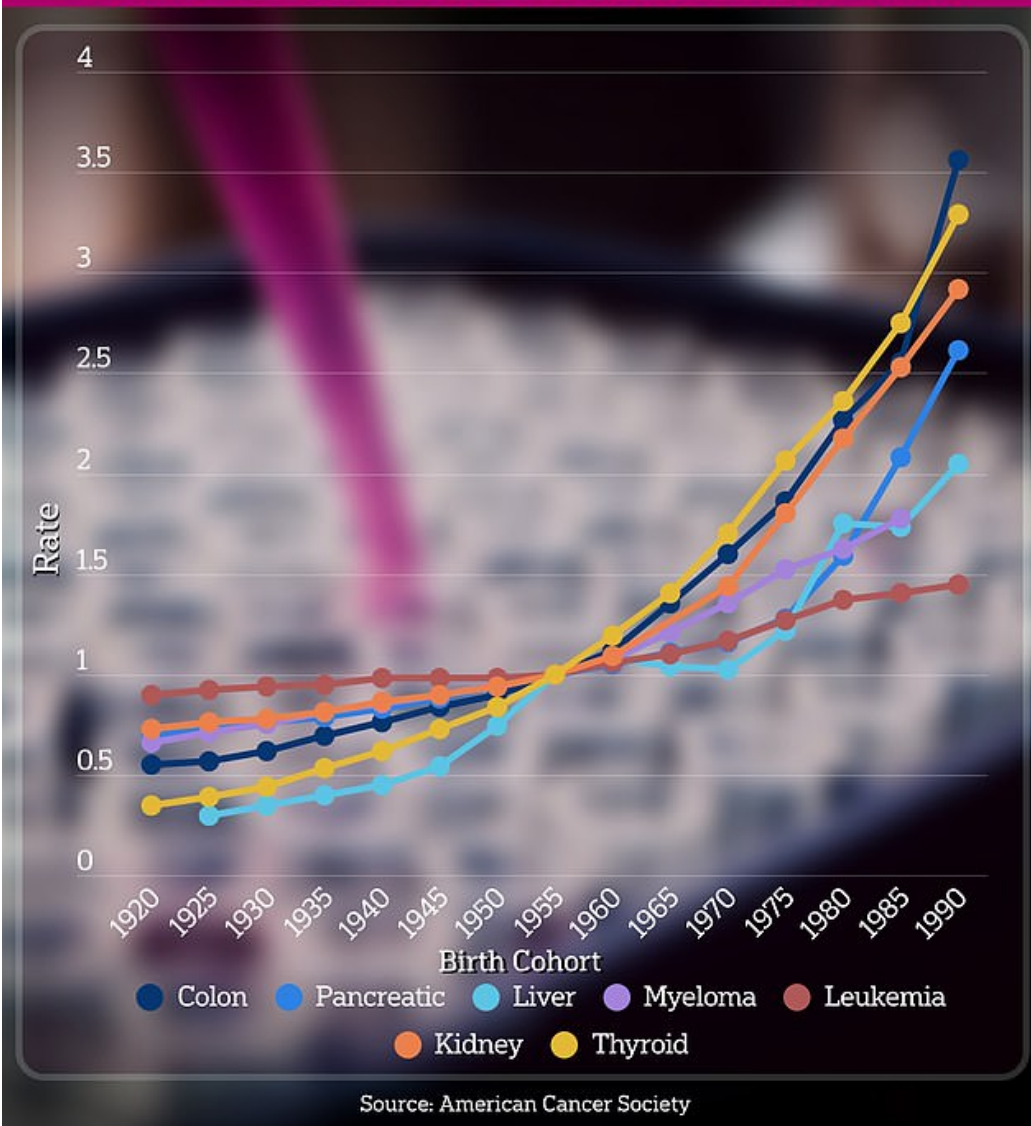

The young and ‘active’ Californian admitted that she had initially overlooked her symptoms and is now urging others via [social media](#) not to skip their regular health checkups.

Bile duct cancer, also known as cholangiocarcinoma, is an aggressive type of cancer that starts in the bile ducts.

It can affect people of different ages but it is more commonly diagnosed in adults over the age of 50.

# INCREASES IN CANCER DIAGNOSES BY BIRTH YEAR

Cases of some types of cancers in young people have almost doubled in the US, even as rates have slowed or fallen in their parents and grandparents

Ms Towle, whose tumor arose from a genetic mutation, admitted that the most challenging aspect of her journey has been dealing with the unknown.

‘It’s tough for me to plan for the future at all or expect anything when everything is so fragile around my diagnosis and treatment,’ she said.

‘It’s also really hard to plan in the short term, such as dinners or going out with friends, when I don’t know how I’ll feel physically or emotionally on a given day.

‘There are so many things I want to do now, given that I don’t know how much longer I have, but I can’t plan my bucket list or any fun trips while receiving treatment and not knowing where surgery will take me.’

Ms Towle, who recently fulfilled one of her dreams by moving to New York, is currently

undergoing aggressive treatment targeting the tumor with a variety of treatments, including chemotherapy and experimental drugs.

## Commentary by Dr. William Makis

This is a type of “soft disclosure” – telling women to expect cancer in their 20s and 30s, without telling them that the COVID-19 mRNA vaccines are causing this phenomenon.

## **The Worldwide Corona Crisis, Global Coup d’Etat Against Humanity**

**by Michel Chossudovsky**

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

*“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”*

## **Reviews**

*This is an in-depth resource of great interest if it is the wider perspective you are motivated to understand a little better, the author is very knowledgeable about geopolitics and this*

comes out in the way Covid is contextualized. —**Dr. Mike Yeadon**

*In this war against humanity in which we find ourselves, in this singular, irregular and massive assault against liberty and the goodness of people, Chossudovsky's book is a rock upon which to sustain our fight.* -**Dr. Emanuel Garcia**

*In fifteen concise science-based chapters, Michel traces the false covid pandemic, explaining how a PCR test, producing up to 97% proven false positives, combined with a relentless 24/7 fear campaign, was able to create a worldwide panic-laden "plandemic"; that this plandemic would never have been possible without the infamous DNA-modifying Polymerase Chain Reaction test - which to this day is being pushed on a majority of innocent people who have no clue. His conclusions are evidenced by renown scientists.* —**Peter Koenig**

*Professor Chossudovsky exposes the truth that "there is no causal relationship between the virus and economic variables." In other words, it was not COVID-19 but, rather, the deliberate implementation of the illogical, scientifically baseless lockdowns that caused the shutdown of the global economy.* -**David Skripac**

*A reading of Chossudovsky's book provides a comprehensive lesson in how there is a global coup d'état under way called "The Great Reset" that if not resisted and defeated by freedom loving people everywhere will result in a dystopian future not yet imagined. Pass on this free gift from Professor Chossudovsky before it's too late. You will not find so much valuable information and analysis in one place.* -**Edward Curtin**

**ISBN:** 978-0-9879389-3-0, **Year:** 2022, PDF Ebook, **Pages:** 164, 15 Chapters

**Price:** \$11.50 FREE COPY! [Click here \(docsend\) and download.](#)
