

Cardiac Arrest Due to Spontaneous Coronary Artery Dissection - A Tear in an Artery

Case of 39-year-old COVID-19 vaccinated Alberta nurse I know, who had a cardiac arrest while driving!

Major PSA coming at you!
I've been a bit hesitant posting this on social media, mainly because I've been in a state of [insert every possible emotion here], but the more I think of it, THIS needs to be shared, especially amongst the majority of people on here - my fellow young, healthy, active females, many whom are busy mamas to boot.

A few weeks ago, it was a typical day of running errands and chasing after a large "to do" list. As I was driving, I suddenly felt a sharp pain from my neck to my shoulder, and although it was a very different feeling from anything I've ever experienced, I shrugged it off as a pulled muscle or a pinched nerve. I continued to drive until the pain radiated across my chest, back, and towards the other arm. The pain became so unbearable and panic set in when I was fighting to catch a breath. I drove myself to the hospital just in time as it turned out, I was having a HEART ATTACK ❤️

With the quick action of the ER staff, I was rushed in, stabilized and admitted to the Coronary Care Unit. A week went by and after numerous tests, I was diagnosed with SCAD - Spontaneous Coronary Artery Dissection. A rare condition causing a tear in the artery and leading to cardiac arrest.

Trust me when I say that I didn't believe it.
I'm still in a denial.

I'm not yet 40, an active runner, cyclist, nurse, wife and mama. But that's the thing. It could happen to ANYONE. The cause of SCAD is mainly unknown but occurs in healthy, active females between the ages of 35-50, with no previous health conditions. There have been some studies however, of higher risk in females recently post partum, and hormone and stress related linkages, so at the end of the day ladies, LISTEN to your body and DON'T shrug off that "weird" feeling you've been having. Everything else can wait!

The next few months will be a complete 180 physically and mentally as I heal and overcome what has happened, but I'm starting to see this as a blessing in disguise. A friend recently reminded me that the universe is always whispering, but sometimes it just needs to yell. So that's where I'll be. Listening to the universe ❤️

- “As I was driving, I suddenly felt a sharp pain from my neck to my shoulder...the pain became so unbearable and panic set in...I drove myself to the hospital just in time as it turned out , I was having a heart attack”
- “I’m not yet 40, an active runner, cyclist, nurse, wife and mama. But that’s the thing. It could happen to ANYONE”
- “I was diagnosed with SCAD – Spontaneous Coronary Artery Dissection”

My Take...

This Edmonton nurse is in my medical circle. She is fully COVID-19 Vaccinated.

Why is this case important?

1. COVID-19 mRNA Vaccinated women are being decimated by cardiac injuries and deaths. She has discovered this herself (although hasn't connected the dots all the way to the mRNA jab):

Say what now?? Every 22 minutes in Canada, a female dies from heart disease. And most don't have to!

SCAD doesn't necessarily fall into the major categories of heart disease, but since my heart attack I am so much more aware (and truly shocked) about the **under diagnosed and under researched areas of cardiovascular health in women.** The mortality rate in this area is shockingly high but CAN BE PREVENTED!

This aired on CBC's The National last night.

The piece highlights many good points, especially self advocacy when it comes to your health and body 🙌

2. These cardiac arrests can happen while driving and they're extremely dangerous.
3. She had her artery dissection when she started running again (the dangers of exercising when you're COVID-19 Vaccinated)

Had my SCAD when I just started running again. This one hit home....

RUNNINGMAGAZINE.CA

**Female runners: how to recognize the signs of heart attack
- Canadian Running Magazine**

4. She was diagnosed with SCAD – Spontaneous Coronary Artery Dissection that lead to a cardiac arrest. “A rare condition leading to a tear in the artery”. This is not a congenital condition – spontaneous means it happened out of the blue and could happen to anyone.
5. COVID-19 mRNA Vaccines damage blood vessels, which has been proven in many published cases with autopsy. There are two types of blood vessel damage they can case:
 - A. aneurysms
 - B. dissections

[Nov. 2022 \(Takashi et al\)](#) – An autopsy case report of aortic dissection complicated with histiolymphocytic pericarditis and aortic inflammation after mRNA COVID-19 vaccination.

- 90s year old Japanese man had his 3rd Pfizer dose.
- He presented to doctor a week later for fatigue and dyspnea and was sent home with meds
- He was found dead in the kitchen 4 days after the doctor visit.

- Autopsy found: The ascending aorta had a 2.5 cm intimal tear at 4 cm above the aortic annulus. The aortic media was dissected, and the adventitia was perforated within the pericardial cavity
- The aortic tear is shown below (the ascending aorta was dissected. The aortic intima was ruptured horizontally (white arrows))

[Mar. 2022 \(Chida et al\)](#) - Rupture of Vertebral Artery Dissecting Aneurysm after mRNA Anti-COVID-19 Vaccination: A Report of Two Cases.

- mRNA jabs also damage blood vessels in the brain
- Case 1: 60-year-old woman developed ruptured vertebral artery dissecting aneurysm (VADA), the day after her 1st Moderna mRNA
- Case 2: 72-year-old woman developed ruptured vertebral artery dissecting aneurysm (VADA), 7 days after the first dose of the Pfizer mRNA
- both cases survived and underwent stent-assisted coil embolization under general anesthesia

Conclusion

COVID-19 mRNA Vaccine Induced sudden cardiac arrest doesn't have to be just due to myocarditis, or pericarditis.

COVID-19 mRNA Vaccines damage blood vessels due to inappropriate spike protein expression in vessel walls, and resulting aberrant immune response and inflammation.

Damage to blood vessels can happen anywhere in the body, however, aortic dissection is probably the most dangerous.

AORTIC DISSECTION

Stages of Aortic Dissection

Does Terry realize she is COVID-19 mRNA Vaccine injured and almost died due to a mRNA injury? She doesn't. At least, not yet.

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”

Reviews

This is an in-depth resource of great interest if it is the wider perspective you are motivated to understand a little better, the author is very knowledgeable about geopolitics and this comes out in the way Covid is contextualized. —Dr. Mike Yeadon

In this war against humanity in which we find ourselves, in this singular, irregular and massive assault against liberty and the goodness of people, Chossudovsky’s book is a rock upon which to sustain our fight. —Dr. Emanuel Garcia

In fifteen concise science-based chapters, Michel traces the false covid pandemic, explaining how a PCR test, producing up to 97% proven false positives, combined with a massive media campaign, was able to create a worldwide panic-laden “plandemic”; that this could have never been possible without the infamous DNA-modifying Polymerase Chain Reaction test - which to this day is being pushed on a majority of innocent people who have no clue. His conclusions are evidenced by renown scientists.

—Peter Koenig

Professor Chossudovsky exposes the truth that “there is no causal relationship between the virus and economic variables.” In other words, it was not COVID-19 but, rather, the deliberate implementation of the illogical, scientifically baseless lockdowns that caused the shutdown of the global economy. —David Skripac

A reading of Chossudovsky’s book provides a comprehensive lesson in how there is a global coup d’état under way called “The Great Reset” that if not resisted and defeated by freedom

loving people everywhere will result in a dystopian future not yet imagined. Pass on this free gift from Professor Chossudovsky before it's too late. You will not find so much valuable information and analysis in one place. -Edward Curtin
