[Global Research Wants to Hear From You!](#)

Data from the Vaccine Adverse Event Reporting System (VAERS) released Friday [May 3, 2024] show [1,637,411](#) adverse events following COVID-19 vaccines were reported between Dec. 14, 2020, and April 26, 2024. This includes [314,353](#) reports of serious injuries and [37,544](#) deaths.

Of the 37,544 reported deaths, [23,356 cases](#) are attributed to Pfizer, [10,754](#) to Moderna, and [2,878](#) to Johnson & Johnson. Of the [reported deaths](#), 9% occurred within 24 hours of vaccination, and 13% occurred within 48 hours.

VAERS is a voluntary reporting system managed by the U.S. Food and Drug Administration (FDA) and the Centers for Disease Control and Prevention (CDC). It is designed to detect vaccine safety signals, although it is [estimated](#) to represent less than 1 percent of actual adverse events.

According to the CDC, VAERS data [available to the public](#) include the initial reports to VAERS. Any updates or corrections to reports during follow-up are used by the government for analysis but are not made available to the public. In other words, we may see an initial report for a heart problem that later leads to death, but we will not see an updated report if a person dies, nor will that death be included in the statistics.

Excluding "[foreign reports](#)" to VAERS, [1,010,545 adverse events](#), including [18,862 deaths](#) and [117,476 serious injuries](#), were reported in the U.S. between Dec. 14, 2020, and April 26, 2024.

[Foreign reports](#) are reports from foreign subsidiaries sent to U.S. vaccine manufacturers. Under FDA regulations, if a manufacturer is notified of a foreign case report describing an event that is both serious and does not appear on the product's labeling, the manufacturer must submit the report to VAERS.

Data for 6-month-olds to 5-year-olds

- [7,725 adverse events](#), including [320 cases rated as serious](#) and [14 reported deaths](#).
- [5 reports](#) of myocarditis and pericarditis.
- [37 reports](#) of blood clotting disorders.
- [68 reports](#) of seizures.

Data for 5- to 11-year-olds

- [18,715 adverse events](#), including [908 rated as serious](#) and [34 reported deaths](#).
- [54 reports](#) of myocarditis and pericarditis.
- [81 reports](#) of blood clotting disorders.
- [208 reports](#) of seizures.

Data for 12- to 17-year-olds

- [43,517 adverse events](#), including [4,849 rated as serious](#) and [149 reported deaths](#).
- [286 reports](#) of anaphylaxis among 12- to 17-year-olds where the reaction was life-threatening, required treatment, or resulted in death.
- [1,409 reports](#) of myocarditis and pericarditis, with [1,230 cases](#) attributed to Pfizer's vaccine.
- [320 reports](#) of blood clotting disorders, with [290 cases](#) attributed to Pfizer.
- [42 cases](#) of postural orthostatic tachycardia syndrome (POTS) were attributed to Pfizer's vaccine.

Data for All Age Groups to VAERS

- At least 15% of deaths were related to cardiac disorders.
- 53% of those who [died were male](#), and 41% [were female](#). The remaining death reports do not list the gender of the deceased.
- The [average age](#) of death was 72.
- As of April 26, [9,386 pregnant women](#) reported adverse events related to COVID-19 vaccines, including [5,453 reports](#) of miscarriage or premature birth.
- Of the [18,054 cases of Bell's palsy](#) reported, 78% were attributed to Pfizer vaccinations and [21% to Moderna](#).
- [3,598 reports](#) of Guillain-Barré syndrome.
- [10,751 reports](#) of anaphylaxis where the reaction was life-threatening, required treatment, or resulted in death.
- [9,117 reports](#) of myocardial infarction and cardiac arrest.
- [49,942 reports](#) of blood-clotting disorders. Of those, [34,459 reports](#) were attributed to Pfizer and [11,332 reports](#) to Moderna.

[26,996 cases](#) of myocarditis and pericarditis, with [20,572 cases](#) attributed to Pfizer

and [5,880 cases](#) to Moderna.

The CDC uses a [narrowed case definition](#) of myocarditis. To meet the case definition, people must have “symptoms such as chest pain, shortness of breath and feelings of having a fast-beating, fluttering or pounding heart, and medical tests to support the diagnosis of myocarditis and rule out other causes.” This allows the CDC to exclude cases of cardiac arrest, ischemic strokes, and deaths due to heart problems that occur before one has the chance to seek medical attention or obtain a diagnosis.

The CDC website does not state what happens to these cases, but there is no indication they are tracked or included in the CDC’s myocarditis numbers.

- [91 cases](#) of Creutzfeldt-Jakob disease, with [76 cases](#) attributed to Pfizer and [15](#) to Moderna.
- [1,065 cases of POTS](#), with [703 cases](#) attributed to Pfizer.

Although healthcare providers are required by law to report vaccine adverse events to VAERS, research shows very few do. It is essential that anyone who experiences an adverse event [report their own injury](#).

The Worldwide Corona Crisis, Global Coup d’Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow

human beings and our children worldwide. Truth is a powerful instrument.”

Reviews

This is an in-depth resource of great interest if it is the wider perspective you are motivated to understand a little better, the author is very knowledgeable about geopolitics and this comes out in the way Covid is contextualized. —Dr. Mike Yeadon

In this war against humanity in which we find ourselves, in this singular, irregular and massive assault against liberty and the goodness of people, Chossudovsky’s book is a rock upon which to sustain our fight. —Dr. Emanuel Garcia

In fifteen concise science-based chapters, Michel traces the false covid pandemic, explaining how a PCR test, producing up to 97% proven false positives, combined with a relentless 24/7 fear campaign, was able to create a worldwide panic-laden “plandemic”; that this plandemic would never have been possible without the infamous DNA-modifying Polymerase Chain Reaction test – which to this day is being pushed on a majority of innocent people who have no clue. His conclusions are evidenced by renown scientists. —Peter Koenig

Professor Chossudovsky exposes the truth that “there is no causal relationship between the virus and economic variables.” In other words, it was not COVID-19 but, rather, the deliberate implementation of the illogical, scientifically baseless lockdowns that caused the shutdown of the global economy. —David Skripac

A reading of Chossudovsky’s book provides a comprehensive lesson in how there is a global coup d’état under way called “The Great Reset” that if not resisted and defeated by freedom loving people everywhere will result in a dystopian future not yet imagined. Pass on this free gift from Professor Chossudovsky before it’s too late. You will not find so much valuable information and analysis in one place. —Edward Curtin
