The U.S. [CDC announced today](#) that they have “new data” that they claim shows that the COVID-19 experimental injections are now safe for pregnant women.

Of course they have been recommending all along that pregnant women get the experimental injections, so it appears that this is just a new marketing strategy to get more pregnant women to get the shots.

The CDC admits that this “new study” of nearly 2,500 pregnant women who received an mRNA COVID-19 injection before 20 weeks of pregnancy had 13% of them suffer miscarriages. They concluded that:

the known severe risks of COVID-19 during pregnancy demonstrate that the benefits of receiving a COVID-19 vaccine for pregnant people outweigh any known or potential risks. ([Source](#).)

A search of the CDC Vaccine Adverse Event Reporting System (VAERS) lists 1,270 premature fetal deaths in pregnant women following one of the experimental, non-FDA approved COVID-19 injections. ([Source](#).)

From the 7/30/2021 release of VAERS data:

Found 1,270 cases where Vaccine is COVID19 and Symptom is Aborted pregnancy or Abortion or Abortion complete or Abortion early or Abortion incomplete or Abortion induced or Abortion late or Abortion missed or Abortion of ectopic pregnancy or Abortion spontaneous or Abortion spontaneous complete or Abortion spontaneous incomplete or Foetal cardiac arrest or Foetal death or Premature baby death or Premature delivery or Stillbirth

Table

 Age	 Count	 Percent
17-44 Years	913	71.89%
44-65 Years	15	1.18%
Unknown	342	26.93%
TOTAL	1,270	100%

As we have previously reported here at *Health Impact News*, a [pro-life group out of New Mexico](#) has reported that a whistleblower who sits on a COVID-19 task force is claiming that many pregnancy complications, including preterm birth, miscarriage, and spontaneous abortions following COVID vaccines are being concealed from the public. See: [Whistleblower Reveals Many Pregnancy Complications following Experimental COVID Injections - "Vaccine Leaving a Trail of Devastated Mothers"](#)

This whistleblower has uncovered documents that Pfizer had supplied to the European Medicines Agency (EMA) that shows their mRNA COVID vaccines did have animal trials that showed serious birth defects occurred in the rat specimens. See: [EMA Pfizer Documents on Experimental COVID-19 mRNA Shots Reveal Animal Studies were Conducted during Trials - Risks to Pregnancy being Concealed but Verified by VAERS Data](#)

Also, at the Advisory Commission on Childhood Vaccines (ACCV) [last quarterly meeting](#), on March 4, 2021, the CDC supplied a report on "Maternal vaccination safety summary" for the COVID vaccines that had been granted emergency use authorization.

You can [view it here](#).

The CDC's own report stated:

Maternal vaccination safety summary

- * Pregnant women were not specifically included in pre-authorization clinical trials of COVID-19 vaccines
- Post-authorization safety monitoring and research are the primary ways to obtain safety data on COVID-19 vaccination during pregnancy
- * Larger than expected numbers of self-reported pregnant women have registered in v-

safe

- * The reactogenicity profile and adverse events observed among pregnant women in v-safe did not indicate any safety problems
- * Most reports to VAERS among pregnant women (73%) involved non-pregnancy specific adverse events (e.g., local and systemic reactions)
- * Miscarriage was the most frequently reported pregnancy-specific adverse event to VAERS; numbers are within the known background rates based on presumed COVID-19 vaccine doses administered to pregnant women

So even though there were “*larger than expected numbers of self-reported pregnant women*” reporting adverse reactions to the experimental vaccines, and even though “*miscarriage was the most frequently reported pregnancy-specific adverse event,*” the CDC concluded that this “did not indicate any safety problems.”

And that is what they are doing with this study, which they admit caused miscarriages in 13% of the women.

They brush all these fetal deaths aside by stating:

the known severe risks of COVID-19 during pregnancy demonstrate that the benefits of receiving a COVID-19 vaccine for pregnant people outweigh any known or potential risks. ([Source.](#))

But what exactly are these “benefits” of receiving a COVID-19 “vaccine” that “outweigh the risks?” They admit they don’t stop transmission, they admit you can still get COVID-19 after being vaccinated, and they admit that people who are fully vaccinated are still dying.

Do You Trust the CDC?

As we have reported numerous times here at *Health Impact News*, the CDC is a corrupt organization that cannot be trusted. They are the largest purchaser and distributor of vaccines in the world, allocating over \$5 BILLION in their budget (supplied by American taxpayers) each year to purchase and distribute vaccines from Big Pharma. See: [Should the CDC Oversee Vaccine Safety When They Purchase Over \\$5 Billion of Vaccines from Big Pharma?](#)

The CDC also owns over 56 patents on vaccines, and many of their scientists earn royalties from the sale of vaccines. ([Source.](#))

The CDC has a long history of corruption, and over the years many of their own scientists have tried to blow the whistle on this corruption only to be silenced. See some of our previous coverage on CDC corruption:

- [Can We Trust the CDC? British Medical Journal Reveals CDC Lies About Ties to Big Pharma](#)
- [CDC Scientist Whistleblowers Confirm Corruption Within the CDC](#)
- [CDC Whistleblower: CDC Covered Up MMR Vaccine Link to Autism in African American Boys](#)
- [The CDC’s History of Research Fraud Regarding Vaccines and Autism](#)

In addition, many of the directors running the CDC go on to work for Big Pharma developing

vaccines after they complete their term at the CDC. See: [Former CDC Director that Approved Gardasil Vaccine and Became Head of Merck's Vaccine Division Named "Woman of the Year"](#)

The CDC protects the pharmaceutical industry. They get caught lying all the time. They are not your friend, they don't care about your health, and they don't care if your unborn baby lives or dies.
