On July 29, [YouTube terminated Del Bigtree's "The Highwire"](#) account after he posted a video of Del and me discussing [my debate with Alan Dershowitz](#) on vaccine mandates. YouTube also purged hundreds of other truthful videos on vaccines.

YouTube's owner, Google, is effectively [a vaccine company](#). Two subsidiaries of Google's parent company, Alphabet, market and manufacture vaccines: Calico and Verily. [Arthur Levinson](#), [Genentech's](#) former CEO, runs [Calico](#), an anti-aging drug company while [Verily teams with Pharma](#) to conduct drug and vaccine clinical trials.

In 2016, Alphabet inked a [\\$715 million deal](#) with GlaxoSmithKline to create [Galvani](#), another venture to develop bioelectronic medicines and vaccines and to mine medical information from Google customers. Google's Customer Services President, [Mary Ellen Coe](#), sits on [Merck's board](#).

In 2016, Google partnered with Sanofi launching [Onduo](#), a virtual diabetes clinic and in 2018 in another business that uses analytics to develop [new drugs and vaccines](#).

In 2018, Google invested \$27,000,000 in [Vaccitech](#) to make vaccines for flu, MERS, and prostate cancer. Vaccitech calls itself "[the future of mass vaccine production](#)." In 2020, Vaccitech started work on a [COVID vaccine](#). Google claims to provide politically and commercially neutral searches, but it systemically [manipulates search results to suppress accurate vaccine safety](#) and efficacy information and steers users toward deceptive and fraudulent Pharma propaganda.

Google's algorithms censor negative information about COVID vaccines and positive information about [therapies like hydroxychloroquine](#) that compete with the vaccines in development. Google censors reports that diminish public panic about COVID-19. Google's definition of "misinformation" is "any information, even if accurate and true, which criticizes vaccination products." Facebook and Google hired "[FactChecker](#)" ([Politifact](#)) to censor vaccine misinformation.

[Politifact](#) was launched by a grant from the Gates Foundation, the world's largest vaccine promoter. Google's orchestrated censorship across social media is crippling legitimate debates over international vaccination policies. This is a crisis for liberal democracies.
