

Children Killed by COVID mRNA Vaccines: 17-year-old Aubrynn Grundy Had Two Pfizer mRNA Vaccines for School Trip June 2022 and Died August 2022 from Multi-Organ Failure

5 More Cases (50% fatality, 50% amputation)

[Aug. 6, 2022](#) - Redford, MI - 17 year old Aubrynn Grundy had 1st Pfizer mRNA on June 7, 2022 and 2nd Pfizer mRNA on June 28, 2022. She went on a school trip and started to feel sick. She suffered a heart attack in ER, was hospitalized, deteriorated rapidly and died on Aug. 6, 2022. Her death was blamed on COVID-19.

Aubrynn Grundy, my niece (17) is fighting for her life.

She was diagnosed with covid-19 while on a trip she earned through school. This trip was earned through a vote among teachers and students. Aubrynn and one other student were voted kindest in their school, specifically pertaining to human rights. She was picked for being kind, which makes it all the more heartbreaking.

It was an all expenses paid trip that would take her all over the country and to parts of Canada. But, after feeling sick in Canada, she had tested positive for Covid. In New York, Aubrynn was so weak and sick that my sister, Shanna, packed up the car with the family and drove the twelve hour round trip to get her.

Once home, she only got worse and her breathing was so low that they rushed her into the ER. While waiting, her breathing became faint and she collapsed on the floor. Her heart stopped for the first time.

She was put into a medically induced coma and onto a ventilator to help her breathe.

She was airlifted to Detroit Childrens Hospital where her dad, my sister and my sisters fiance would meet her. When they arrived, they were told that her heart had stopped again and that chest compressions and CPR were needed to bring her back.

Her blood pressure was so low, and her lungs so damaged, she couldn't get any oxygen to her blood.

Her heart stopped one more time before the doctors were able to administer heart surgery, putting her on a ECMO machine to keep oxygen flowing to her blood.

Her oxygen levels rose after that, deeming the procedure a success, her body would now be able to get the oxygen it needs while also taking stress off of her lungs.

They ended the night having her stable, but still on life support. The following days were filled with uncertainties as the doctors were tasked with countless obstacles. Her body was attacking itself in every way possible.

Through all of the pain, we have celebrated small victories. She had the hiccups after being motionless for over 24 hours and we all gushed.

She has attempted to move her arms, has opened her eyes and responded to questions the best she can. And she gets grumpy if she is moved or sponged bathed ☐

But, Aubrynn's fight is still dire.

The medicine they have her on prevents clotting in the brain which can then block the vessels in her hands and feet. It's a natural side effect but long term use can cause fingers and toes to die.

To save her life, doctors will need to amputate her limbs.

While Aubrynn fights, her mom and dad, (Shanna Pelton and Anthony Grundy) along side Aubrynn's step dad, (Adam Carroll) are fighting with her. Because her condition is so severe at the moment, Shanna and Anthony cannot and will not leave her side.

Until things are more stable, Adam will be at home with Aubrynn's three siblings.

This puts them all in a tough place as far as work, and loss of work. So, for the time being I'm asking for any and all help to take some financial stress off of this blended family.

As a family, we are overwhelmed with the love and support we have received during our darkest hour. Thank you all so much.

July 31st, 2022

As of today, July 31st, Aubrynn is still being kept under while her body fights to right itself.

She has been showing good neurological signs. When brought off sedation she follows commands with her eyes and shows signs of brain function. Her lungs are still damaged and they keep removing fluid when they can and they are treating the MRSA and the candida.

Her sweet heart is still the main focus and is showing signs of improvement, which is good. Her heart is not quivering anymore, which is amazing. Overall her numbers are still high across the board but they are coming down slowly.

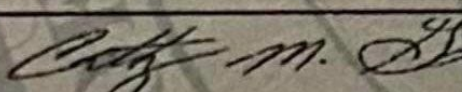

Right now everything is going to be on a day by day / week by week basis.

Aubrynn will need to be amputated above the elbow on her arms and above the knee on her legs. But first her body needs to be healthy enough.

[August 6th, 2022](#)

With a broken heart, I'm devastated to update you all that Aubrynn lost her battle tonight at 7:22 pm.

Autopsy Shows "Multi-organ Failure" and "COVID-19"

GENOCIDEBLOG.COM

My analysis and a look into medical literature — other similar COVID-19 mRNA vaccine-induced multi-organ failure cases:

I have seen several cases of children with these Clinical Presentations and features and I will

go over them:

- June 30, 2023 - 14 year old Mathias Uribe (soccer player)
- Jan 9, 2023 - 20 year old Levi Dewey (soccer player)
- Nov.9, 2022 - 18 year old Trista Martin
- Aug.10, 2022 - 14 year old Japanese girl (Nushida et al)
- Jan, 2022 - 20 year old Florida rock climber & model Claire Bridges

[June 30, 2023](#) - TN - 14 year old soccer player Mathias Uribe had flu like symptoms mid June and 2 weeks later was taken to hospital where he had cardiac arrest, was put on life support (ECMO), was diagnosed with Strep pneumonia and toxic shock syndrome and had to have his hands and feet amputated. He survived. He came out of pediatric ICU after 143 days on Nov. 20, 2023. Presumed COVID-19 vaccinated to play soccer.

#MiracleforMathias

Jesika Sanchez is organizing this fundraiser on behalf of Edgar Uribe.

We come to you with heavy hearts to share some difficult news about our beloved son. Mathias became ill with flu-like symptoms in mid-June, he was taken to the doctors twice and began treatment. **On June 30th our world fell apart. He was taken to the emergency room where his heart stopped and went into cardiac arrest. He needed life-saving support and was flown to two different hospitals. He was diagnosed with pneumonia and streptococcal toxic shock syndrome.**

He is currently in the ICU receiving treatment at Vanderbilt Children's Hospital where we were told he was the sickest child admitted at the time.

He was placed on ECMO in order to support his heart, lungs, and all vital organs on June 30th. On July 12, after 12 days the medical team decided to remove the ECMO therapy as

14-year-old boy has hands, legs amputated after flu-like symptoms turn deadly

By [Patrick Reilly](#)
Published Sep. 13, 2023, 11:35 p.m. ET

A 14-year-old boy's parents had to make the heart-wrenching decision to amputate all of their son's hands and feet after his normal flu-like symptoms suddenly turned deadly.

Mathias Uribe, of Tennessee, has been hospitalized at the Monroe Carrel Jr. Children's Hospital at Vanderbilt for more than two months after he was rushed to the hospital feeling deathly ill on June 30.

He was diagnosed with pneumonia and streptococcal toxic shock syndrome and went into cardiac arrest. [WSMV reported.](#)

Edgar Uribe
Beneficiary • November 21st,
2023

Conquering 143 days in the Pediatric
Intensive Care Unit
13 days of ECMO
23 Surgical Procedures
Countless hours of hard work.
Infinite moments of bravery and
strength.... [Show more](#)

[Jan 9, 2023](#) - 20 year old Levi Dewey (soccer player) went to hospital on Dec. 7, 2022 with flu like symptoms and breathing difficulties. His condition deteriorated and he went into septic shock with multi-organ failure. He spent 20 days on ECMO, 14 of which were in an induced coma. After 31 days he was taken off ventilator. He had to have below-knee amputation of both his legs.

[Nov. 9, 2022](#) - Broken Arrow, OK - 18 year old Trista Martin had a check-up in July 2022 and got a Pfizer COVID-19 mRNA vaccine (to attend a concert) but didn't tell her parents. 3.5 months later she died suddenly.

[On the morning of Nov. 9, 2022](#), Trista woke at her half-sisters home near the Martin family home and said that she felt like she was dying. She was encouraged to go back to sleep and get some more rest. Soon after, she was unresponsive. CPR was started and when paramedics arrived they were able to get Trista's heart beating again.

"Once in the hospital Trista repeatedly coded and it was during this time her father heard doctors and nurses discussing an enlarged heart. One of Trista's friends then told Allen Trista had gotten the vaccine,". "Doctors desperately work to keep Trista alive, but eventually her body was too broken to continue."

Trista had suffered multi organ failure and died on Nov. 9, 2022.

[Aug. 10, 2022](#) - 14 year old Japanese girl (Nushida et al)

14 year old Japanese girl had 3rd dose of Pfizer mRNA COVID-19 Vaccine on Aug.10, 2022.

Her sister, who had slept with her that night, reported that she woke up briefly because she was having difficulty in breathing, talked with her sister, and went to bed soon after.

The following morning, her mother noticed that she was not breathing and had a pale appearance, and she immediately called an ambulance.

The patient was in [cardiopulmonary arrest](#) when the ambulance crew arrived at their house and attempts to administer [advanced life support](#) were unsuccessful.

She died 45 h after the third vaccination.

Autopsy Findings: A diagnosis of vaccine-related multiple-organ inflammation was made based on the absence of bacterial or viral infection, lack of a [past medical history](#) suggestive of autoimmune disease, no [allergic reaction](#), and no drug exposure other than the vaccine.

Myopericarditis is a form of multiple-organ inflammation. Although pneumonia is involved, pneumonia alone is rarely a cause of sudden death, and the presence of erythrocyte-laden macrophages as well as congestive edema of the lungs on histology suggested signs of heart failure from the previous day.

Although the extent of inflammation was relatively narrow, the presence of foci centered on the atria and breathlessness are the findings that raise the suspicion of heart failure several hours before death.

This led to the diagnosis that the cause of death was vaccine-related myopericarditis, which led to severe [arrhythmias](#) and progressive heart failure.

[Jan. 2022](#) – 20 year old Florida model Claire Bridges

“In January 2022, Bridges was a 20-year-old model with her own apartment and a part-time job as a bartender in St. Petersburg, Florida. She was a vegan and “exceptionally healthy,” according to her mother.”

“When she caught Covid-19 that month, no one expected her to be hospitalized. She was fully vaccinated and boosted.”

But Bridges had been born with a common genetic heart defect...whether due to her heart or another unknown reason, COVID-19 hit Bridges hard.

“Extreme fatigue, cold sweats — progressively every single day it would get harder to try to eat or drink anything,” she recalled. “Then one day my mom found me unresponsive and rushed me to the hospital. I flatlined three times that night.”

“Diagnosed with myocarditis, rhabdomyolysis, mild pneumonia, cyanosis and acidosis – Claire was placed on dialysis to help her failing kidneys. The damage to her body, however, resulted in poor circulation to her lower limbs, leading to amputation.”

My Take...

I am not an Intensive Care Specialist or Critical Care Physician like Dr.Pierre Kory and this would be Dr.Kory's area of expertise.

However, here is the sequence of events that I see in these tragic cases:

5 children ages 14 to 20. 3 died. 2 survived but with amputations.

1. It started with COVID-19 mRNA Vaccine Immune System damage which predisposed the child to catch more infections.
2. Most of these emergency situations started with a flu-like illness.
3. It then led to a cardiac arrest. The idea here is that the heart has already been damaged by the COVID-19 Vaccines, through myopericarditis and scarring, and an infectious process would put strain on the heart which would lead to arrhythmia and then cardiac arrest:
 - A. 14 yo Mathias coded in emerg

- B. 18 yo Trista Martin coded in her room
 - C. 14 yo Japanese girl coded in her room
 - D. 20 yo Claire Bridges coded in her room and 3 more times in hospital
 - E. 17 yo Aubrynn Grundy coded in emerg
4. Once the cardiac arrest happens, this is where the situation spirals completely out of control. MULTIPLE ORGAN FAILURE occurs and the child must be put on life support and into an induced coma
- This is where Trista’s parents and doctors were completely caught off guard by the rapid deterioration of Trista’s situation.
 - This happened to Mathias and Levi, with Mathias staying 142 days in the ICU while Levi stayed 31 days. Claire also. All 3 needed amputation.
 - Aubrynn ended up on life support but couldn’t pull through. If she had, she also would have had amputation.
 - 14 yo Japanese girl never made it to the Hospital but on autopsy all her organs were failing. The authors called it: “vaccine-related multiple-organ inflammation”

This COVID-19 mRNA Vaccine Induced MULTI ORGAN FAILURE SYNDROME should have its own name.

I believe it ultimately comes down to a perfect storm of a combination of Immune system damage combined with severe cardiac injury.

I have seen this mRNA MULTI ORGAN FAILURE SYNDROME in adults as well.

For completeness, I will include these cases below:

Oct. 24, 2022 - Texas - 29 year old Krystina Pacheco suffered septic shock. Two days after giving birth to a girl, she developed shortness of breath, vomiting, stomach pains, was hospitalized with septic shock. Sedated for 2 weeks she nearly died and had to have her hands and feet amputated ([click here](#)).

Jan. 1, 2023 - UK Piano Teacher Julianna Bransden suffered catastrophic injuries starting Jan. 1, 2023 ([click here](#)).

Julianna was a dedicated and popular teacher and musician. Since becoming a teacher 19 years ago in Aylesbury, Julianna devoted the last 10 years to the rural school of Llanmiloe in South Wales.

Julianna was fully COVID-19 vaccinated. On Dec.23, 2022 she developed flu like symptoms and on Jan.1, 2023 she had two cardiac arrests, went into septic shock, multiple systemic organ failure, needing full life support.

She was diagnosed with sepsis resulting from an aggressive form of pneumonia.

After weeks of fighting, she had to undergo surgery to amputate both of her legs below the knee and will lose most of her fingers.

“The pneumonia was caused by a combination of both invasive Strep A and Influenza, resulting in a level of sickness that several experienced ICU nurses said they had never seen anyone manage to recover from before.”

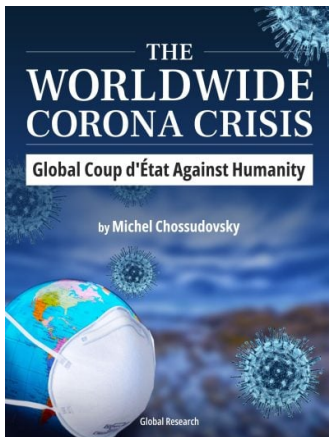

COVID-19 mRNA Vaccines must be taken off the market immediately.

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”

Reviews

This is an in-depth resource of great interest if it is the wider perspective you are motivated to understand a little better, the author is very knowledgeable about geopolitics and this comes out in the way Covid is contextualized. —Dr. Mike Yeadon

In this war against humanity in which we find ourselves, in this singular, irregular and massive assault against liberty and the goodness of people, Chossudovsky’s book is a rock upon which to sustain our fight. —Dr. Emanuel Garcia

In fifteen concise science-based chapters, Michel traces the false covid pandemic, explaining how a PCR test, producing up to 97% proven false positives, combined with a relentless 24/7 fear campaign, was able to create a worldwide panic-laden “plandemic”; that this plandemic would never have been possible without the infamous DNA-modifying Polymerase Chain Reaction test - which to this day is being pushed on a majority of innocent people who have no clue. His conclusions are evidenced by renown scientists. —Peter Koenig

Professor Chossudovsky exposes the truth that “there is no causal relationship between the virus and economic variables.” In other words, it was not COVID-19 but, rather, the deliberate implementation of the illogical, scientifically baseless lockdowns that caused the shutdown of the global economy. —David Skripac

A reading of Chossudovsky’s book provides a comprehensive lesson in how there is a global coup d’état under way called “The Great Reset” that if not resisted and defeated by freedom

loving people everywhere will result in a dystopian future not yet imagined. Pass on this free gift from Professor Chossudovsky before it's too late. You will not find so much valuable information and analysis in one place. -Edward Curtin
