Our collective reality has reached a crossroads of unimaginable proportion, the world which we have all known is changing by the day.

Many still aggressively deny the rapidly unfolding changes, the same deniers often condemn those who are willing to acknowledge and speak out about what is unfolding.

The life support systems of our planet are being systematically ripped apart. Though there are many sources of damage to the biosphere, climate engineering is by far the greatest single assault on all life.

(Presentation was given in Sacramento, California, May 30, 2014)
