Which equals A LOT of dough

Estimated annual value of global criminal markets in the 2000's

Cocaine: \$88 billion USD

Opiates: \$65 billion USD

By comparison, only \$1 billion in criminal firearms markets.

That's 153 times bigger than the criminal firearms trade.

- (And that's only counting Cocaine and Opiates)

By Value, most drugs originate in 3 nations.

Afghanistan, Colombia, and Peru manufacture a majority of cocaine and heroine.

Top destinations for Afghani Heroin:

1. Europe
2. Russian Federation
3. China
4. The Americas
5. Africa

Top destinations for Afghani Opium

1. Iran
2. Europe

3. Afghanistan
4. Pakistan
5. Africa

Top destinations for Peruvian and Colombian Cocaine:

1. North America (40% of global annual users)
2. EU
3. South America/Central America/Caribbean
4. Africa
5. Asia

Once the money gets rolling...

Cocaine:

Pan-American Route:

With drugs, you pay for risk, as much as the product itself.

1 kilo = \$2,000 in Colombia or Peru

1 kilo = \$10,000 in Mexico

1 kilo = \$30,000 in the U.S.

Or broken up into grams = \$100,000 in U.S.

There's no stopping it.

Even with a wall at the border drug traffickers use:

Catapults (to throw packages over the wall)

Planes (over the wall)

-Cesnas to 747's.[2]

(747's can carry 13 tons of cocaine)

(that's \$1.179 billion in cocaine once it's in America and parceled out)

Boats (around the wall)

Tunnels (below the wall)

Sandbag Bridges (over rivers)

When your trafficking a 100 kilos, a wrecked Cessna, a sunk boat, or a broken tunnel is a cost you can deal with.

The U.S. is the single largest customer base of drugs worldwide.

Estimates for US drug expenditures:[in billions USD]

Cocaine: 28

Heroin: 27

Marijuana: 41

Meth: 13

Former Mexican President Porfirio Diaz—"Poor Mexico, so far from God and so close to the United States." [2]

Colombian and Mexican Cartels take in \$18-\$39 billion from US sales each year.

\$6.6 billion = Mexican Cartel gross revenue.

50% of this is made by the Sinaloa Cartel

Equals \$3 billion in revenue.
About 1/2 of Facebook's revenue
Close to Netflix's revenue
And that's just the cartels of two countries.

These are some massive players.

With several drug kingpins landing on Forbes richest in the world list in recent years.

Drug Kingpins:

El Chapo Guzman:[2]

Forbes billionaire list: 2009-2012

Chicago's Public Enemy No. 1

Notable Achievements:

1st to traffic drugs through tunnel underneath border.

Known for using a catapult to throw drugs over the border.

Had a large pot farm guarded by armed guards in northern Wisconsin.

Escaped from a high security Mexican prison in a laundry basket.

Saw the future with methamphetamine, gave it away for free to establish a customer base.

Zhenli Ye Gon[2]

A Chinese-Mexican businessman believed to have sold precursors of meth to cartels.

And this is a lot of meth.

Meth ingredient seizures at ports:

22 tons in October 2009; 88 tons in May 2010; 252 tons December 2012

Zhenli is a notorious gambler. [2]

Losing so much at a casino that they gifted him a Rolls-Royce.

How much do you have to lose to be given a Rolls-Royce?

\$72 million was how much Zhenli lost at one casino that year.

Pablo Escobar:[4]

At his height had a fleet of:

16 planes

1 Learjet

6 helicopters

Boats

Remote control submarines.

Largest load: sent 25 tons of cocaine on a boat.

Spent \$2,500 a month on rubber bands to stack money.

Wrote off 10% of income from "spoilage" by rats nibbling at stacks of money.

This is too much money to ignore. In the drug trade, if you can make it, users will always come.
