## My Take...

The collapse of the 18 year old World Cup soccer phenom Linda Caicedo may open a few more eyes. It's important to note that women athletes face similar risks with COVID-19 vaccine injuries to the heart, as men do.

While COVID-19 vaccine induced myocarditis is the main culprit for sudden collapses it's not the only vaccine injury process that can do this.

Blood clots to the heart or lungs, arrhythmias, seizures, strokes, brain aneurysms can also cause a sudden collapse.

While I believe all COVID-19 vaccinated athletes should be screened very thoroughly for myocarditis and blood clots, those who collapsed and survived should be the first in line for extensive work-ups as they're living on borrowed time.

## **The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity**

**by Michel Chossudovsky**

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

*“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”*
