Licence of Sask. Doctor Who Prescribed Ivermectin for COVID-19 to be Suspended

Dr. Tshipita Kabongo faced two sets of charges relating to unprofessional conduct, brought by the College of Physicians and Surgeons of Saskatchewan.

By Brandon Harder, [Regina Leader Post](#)

Regina doctor Tshipita Kabongo has admitted to unprofessional conduct in relation to two sets of charges brought against him by the oversight body for Saskatchewan physicians.

That's according to Bryan Salte, associate registrar for the College of Physicians and Surgeons of Saskatchewan (CPSS).

Kabongo had [one such charge brought against him in March of 2023](#) in relation to his failing to know and/or follow the [CPSS Policy on Complementary and Alternative Therapies](#) when he prescribed Ivermectin, an anti-parasitic drug, to treat COVID-19.

He also faced [four additional professional charges, brought against him in March of 2024](#). Of those, three pertained to his work with specific patients, alleging he "failed to maintain the standard of practice of the profession," while the fourth charge was in relation to billing for his services.

The 2024 charges also made reference to inappropriate prescription of Ivermectin, as well as cannabinoids, benzodiazepines, Vitamin B12, and supplements.

Charges brought by that oversight body are not criminal charges but pertain to conduct that does not comply with the rules that govern its members.

Salte advised, via email, that a hearing was held with regard to Kabongo's matters in June, and a penalty was imposed on him.

With regard to penalty, the CPSS council decided Kabongo is to receive a written reprimand.

In addition, his licence is to be suspended for one month, starting Aug. 1, 2024.

He is to practice only under the supervision of "a duly qualified medical practitioner approved by the Registrar."

"The requirement for supervision will continue until the Registrar concludes that Dr. Kabongo is no longer required to practise under supervision," the council decision states.

The supervisor is to provide the CPSS with reports as to the status of Kabongo's practice.

Kabongo is also directed to pay costs associated to the investigation and the hearing in the amount of \$44,783.72. This amount is to be paid in 24 equal instalments, beginning August 1.

If he fails to pay these costs as required, his licence is to be suspended until he pays in full.

Regina Doctor Suspended for Prescribing Ivermectin for COVID

Saskatoon / 650 CKOM

By Lisa Schick, Jun 18, 2024

A Regina doctor has been suspended from practicing for a month this summer for prescribing Ivermectin for COVID-19.

The Saskatchewan College of Physicians and Surgeons found that over two years, between April 2020 and March 2022, [Tshipita Kabongo prescribed the drug as either a treatment or to prevent COVID-19](#) at his practice in Regina

He was found to have engaged in unprofessional conduct.

In a decision released this month, the college said Kabongo failed to follow the its policy on alternative therapies, which says patients have a right to make decisions about their health

care but doctors who choose to use complementary or alternative therapies have to do so in a way that's informed by medical evidence and science.

"It is unethical to engage in or to aid and abet in treatment which has no acceptable scientific basis, may be dangerous, may deceive the patient by giving false hope, or which may cause the patient to delay in seeking conventional care until his or her condition becomes irreversible," the policy states.

The college's decision on Kabongo said one or more of the prescriptions he gave out weren't medically necessary, he failed to recommend other evidence-informed treatment options, and he didn't properly document the prescriptions in medical records.

As a result, Kabongo will be suspended from practising for one month in August. He'll have to have someone supervise him when he returns to practising, and he'll have to pay the cost of the investigation and hearing, which added up to \$44,783.72.

Ivermectin is a drug meant to treat parasites as an oral medicine and rosacea as a topical medication. However, some on social media promoted it as a cure for COVID during the pandemic which began in 2020.

In the fall of 2021, Health Canada and several medical groups in Saskatchewan put out public messages warning people against the use of Ivermectin for COVID, particularly the stronger and more dangerous veterinary formulation.

"There is no evidence that Ivermectin works to prevent or treat COVID-19 and it is not authorized for this use. To date, Health Canada has not received any drug submission or applications for clinical trials for Ivermectin for the prevention or treatment of COVID-19," explained a public notice from Health Canada issued in October, 2021.

A memo issued around the same time by the College of Physician and Surgeons, along with several other Saskatchewan medical groups, said that while there have been studies on Ivermectin, the study limitations like sample sizes and confounding factors mean that conclusions couldn't be drawn, and so Ivermectin was disapproved of for the treatment or prevention of COVID-19.

My Take...

This is yet another example of criminal behavior by a College, this time by the College of Physicians and Surgeons of Saskatchewan.

It is time to start filing criminal charges against College Officials.

These Colleges, through their actions, have killed thousands of Canadians already and if Canadians don't take the Colleges back, the Colleges will continue to take many more lives in the future.

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”

Reviews

This is an in-depth resource of great interest if it is the wider perspective you are motivated to understand a little better, the author is very knowledgeable about geopolitics and this comes out in the way Covid is contextualized. —Dr. Mike Yeadon

In this war against humanity in which we find ourselves, in this singular, irregular and massive assault against liberty and the goodness of people, Chossudovsky's book is a rock upon which to sustain our fight. -Dr. Emanuel Garcia

In fifteen concise science-based chapters, Michel traces the false covid pandemic, explaining how a PCR test, producing up to 97% proven false positives, combined with a relentless 24/7 fear campaign, was able to create a worldwide panic-laden “plandemic”; that this plandemic would never have been possible without the infamous DNA-modifying Polymerase Chain Reaction test - which to this day is being pushed on a majority of innocent people who have no clue. His conclusions are evidenced by renown scientists.

—Peter Koenig

Professor Chossudovsky exposes the truth that “there is no causal relationship between the virus and economic variables.” In other words, it was not COVID-19 but, rather, the deliberate implementation of the illogical, scientifically baseless lockdowns that caused the shutdown of the global economy. –David Skripac

A reading of Chossudovsky’s book provides a comprehensive lesson in how there is a global coup d’état under way called “The Great Reset” that if not resisted and defeated by freedom loving people everywhere will result in a dystopian future not yet imagined. Pass on this free gift from Professor Chossudovsky before it’s too late. You will not find so much valuable information and analysis in one place. –Edward Curtin
