Global Research 1 April 2020

Incisive article by Peter Koenig first published by Global Research on April 1st, 2020

The New York Times reported on 30 March that President Trump retreated from his earlier statement that by 12 April the COVID-19 lock-down should be over and its “back-to-work” time. Instead he said that an extension to the end of April was necessary – and possibly even to June. This, he said, was following the guidance of his advisors, of whom **Dr. Anthony Fauci**, Director of the National Institute of Allergy and Infectious Diseases (NIAID), within the National Institute for Health (NIH), is one.

Virus COVID-19 has so far caused far less infections and death than the common flu in past years. WHO reports on 30 March worldwide 750,000 infections with a death toll of 36,000. In the US about 161,000 cases and 3,000 deaths. Yet, alarmist Fauci claims that there may be millions of US coronavirus cases and 100,000- 200,000 deaths. And, coincidentally, so does Bill Gates, using pretty much the same figures.

All with the idea of pushing a vaccine down the throat of the public.

A multibillion dollar vaccine is not necessary.

The NIAD and the Bill and Melinda Gates Foundation are collaborating with a view to developing a COVID-19 Vaccine.

China has proven that COVID-19 could be brought under control at rather low-cost and with strict discipline and conventional medication. The same medicines and measures have been used for centuries to prevent and cure successfully all kinds of viral diseases.

First, a vaccine against COVID-19, or coronaviruses in general, is a flu vaccine. Vaccines don't heal. In the best case, flu-vaccines may prevent the virus from affecting a patient as hard as it might without a vaccine. The effectiveness of flu vaccines is generally assessed as between 20% and 50%. Vaccines are foremost a huge money-making bonanza for Big Pharma.

Second, here are a myriad of remedies that have proven very successful. See also [this](#) and [this](#).

- French **Professor Didier Raoult**, who is one of the world's top 5 scientists on communicable diseases, suggested the use of **hydroxychloroquine (Chloroquine or Plaquenil)**, a well-known, simple, and inexpensive drug, also used to fight Malaria, and that has shown efficacy with previous coronaviruses such as SARS. **By mid-February 2020, clinical trials at his institute and in China already confirmed that the drug could reduce the viral load and bring spectacular improvement.** Chinese scientists published their first trials on more than 100 patients and announced that the Chinese National Health Commission would recommend Chloroquine in their new guidelines to treat Covid-19.
- China and Cuba are working together with the use of **Interferon Alpha 2B**, a highly efficient anti-viral drug developed in Cuba some 39 years, but little known to the world, because of the US imposed embargo on anything from Cuba. Interferon has also proven to be very effective in fighting COVID-19 and is now produced in a joint-venture in China.
- There is an old natural Indian / Ayurveda medicine, **Curcumin, that comes in capsules as C90.** It is an anti-inflammatory, antioxidant compound that has been successfully used to treat cancer, infectious diseases and, yes, coronaviruses.
- Other simple, but effective remedies include the use of heavy doses of **Vitamin C**, as well as **Vitamin D3**, or more generally the use of Micronutrients essential to *fight* infections, include **vitamins A, B, C, D, and E.**
- Another remedy that has been used for thousands of years by ancient Chinese, Romans and Egyptians, are **Colloidal silver** products. They come in forms to be administered as a liquid by mouth, or injected, or applied to the skin. Colloidal silver products are boosting the immune system, fighting bacteria and viruses, and have been used for treating cancer, HIV/AIDS, shingles, herpes, eye ailments, prostatitis - and COVID-19.
- A simple and inexpensive remedy, to be used in combination with others, is **menthol-based "Mentholatum"**. It's used for common flu and cold symptoms. Rubbed on and around the nose, it acts as a disinfectant and prevents germs to enter the respiratory track, including corona viruses.

- Northern Italy and New Orleans report that an unusual number of patients had to be hospitalized in Intensive Care Units (ICU) and be put 24x7 on a 90%-strength respirator, with some of the patients remaining unresponsive, going into respiratory failure. The reported death rate is about 40%. The condition is called acute respiratory distress syndrome, ARDS. That means the lungs are filled with fluid. When this description of ARDS episodes applies, Dr. Raoult and other

medical colleagues recommend COVID-19 patients **to “sleep sitting up” until they are cured**. This helps drain the liquid out of the lungs. The method has been known to work successfully since it was first documented during the 1918 Spanish Flu epidemic.

- Finally, Chinese researchers in cooperation with Cuban and Russian scientists are also developing a vaccine which may soon be ready for testing. The vaccine would attempt to address not just one strand of coronaviruses, but the basic coronaviral RNA genome (RNA = Ribonucleic Acid), to be applied as a prevention of new coronavirus mutations. In contrast to the west, working exclusively on profit-motives, the **Chinese-Cuban-Russian vaccine would be made available at low cost to the entire world**.

These alternative cures may not be found on Big Pharma controlled internet. Internet references, if there are any, may advise against their use. At best, they will tell you that these products or methods have not proven effective, and at worst, that they may be harmful. Don't believe it. None of these products or methods are harmful. Remember, some of them have been used as natural remedies for thousands of years. And remember, China has successfully come to grips with COVID-19, using some of these relatively simple and inexpensive medications.

Few doctors are aware of these practical, simple and inexpensive remedies. The media, under pressure from the pharma giants and the compliant government agencies, have been requested to censoring such valuable information. The negligence or failure, to make such easily accessible remedies public knowledge is killing people.

The Role of Bill Gates and the Lockdown

Bill Gates may have been one of Trump's 'advisors', suggesting that he should extend the “back-to-work” date to at least end April, and, if Gates has his way, to at least June. That still remains to be seen. Gates is very-very powerful:

President Donald Trump said Tuesday that he wants businesses to open by Easter, April 12, to soften the economic impact. ... Gates acknowledged Tuesday that self isolation will be “disastrous” for the economy, but “there really is no middle ground.” He suggested a shutdown of six to 10 weeks. ([CNBC](#), March 24, 2020)

The Bill and Melinda Gates Foundation, will drive the mass vaccination effort which is scheduled to be launched in the period after the lockdown.

The vaccination association includes, the Coalition for Epidemic Preparedness Innovations (**CEPI**), a semi-NGO, to which NIH / NIAID outsourced oversight of the vaccination program – supported by Bill Gates; GAVI, the *Global Alliance for Vaccines and Immunization* – also a Bill Gates creation, supported by WHO, also amply funded by the Gates Foundation; the World Bank and UNICEF; plus a myriad of pharmaceutical partners.

Bill Gates also strongly suggests that travelers must have in their passport a vaccination certificate before embarking on a plane, or entering a country.

The program implementation, including a related global electronic identity-program, possibly administered with nano-chips that could be embedded in the vaccine itself, would be overseen by the little-know agency Agenda ID2020 which is also a Bill and Melinda Gates foundation initiative.

Bill Gates is also known as a strong proponent of drastic and selective population reduction. Knowing what we know, who would trust any vaccine that carries Bill Gate’s signature. Hope that this evil endeavor will not succeed is omnipresent. We must hope to the end, then the end will never come – and gradually Light will drown Darkness
