Latest update (I am a co-author and adjudicator):

[The paper is currently on the Zenodo server \(Swiss server operated by CERN – European Organization for Nuclear Research\)](#)

It currently has over 41,000 downloads and 52,000 views.

The screenshot shows the Zenodo website interface. At the top, there is a search bar, 'Upload' and 'Communities' buttons, and 'Log in' and 'Sign up' buttons. Below the navigation bar is a warning: 'Caution: Unverified Contents' with a note that papers are not peer-reviewed. The main content area displays a preprint entry dated July 6, 2023, titled 'A SYSTEMATIC REVIEW OF AUTOPSY FINDINGS IN DEATHS AFTER COVID-19 VACCINATION'. The authors listed are Nicolas Hulscher, Paul E. Alexander, Richard Amerling, Heather Gessling, Roger Hodkinson, William Makis, Harvey A. Risch, Mark Trozzi, and Peter A. McCullough. The abstract begins with 'Background: The rapid development and widespread deployment of COVID-19 vaccines, combined with a high number of adverse event reports, have led to concerns over possible mechanisms of injury including systemic lipid nanoparticle (LNP) and mRNA distribution, spike protein-associated tissue damage, thrombogenicity, immune system dysfunction, and carcinogenicity. The aim of this systematic review is to investigate possible causal links between COVID-19 vaccine administration and death using autopsies and post-mortem analysis.' To the right of the title, statistics show 52,250 views and 41,157 downloads. Below this, it indicates the preprint is indexed in OpenAIRE. At the bottom right, the publication date is listed as July 6, 2023, and the DOI field is present but empty.

## Summary of Findings

This landmark paper reviewed the largest number of autopsy reports published to date relating to COVID-19 vaccination, injury and sudden death.

We identified 44 papers with 325 autopsy cases and three physicians (including myself) independently reviewed all deaths and found:

- **74% of all deaths were either caused or contributed to by COVID vaccines**
- **53% of these deaths involved the cardiovascular system**
- **17% of these deaths involved the hematological system**
- **8% of these deaths involved the respiratory system**
- **7% of these deaths involved multiple organ systems**
- **The mean number of days from vaccination to death was 14.3 days.**

## My Take...

This is one of the most important papers of the entire COVID-19 era.

Even though it was censored by Lancet (parent company Elsevier) within 24 hours, when they saw that it was being downloaded hundreds of times per MINUTE, it is currently submitted for peer review and will get published.

This paper will lay the foundation upon which other papers will build as we collectively expose the toxicity of the COVID-19 vaccines.

I want to thank Dr. Peter McCullough for his leadership and his tireless efforts, and my colleagues at the Wellness Company for their support and hard work in helping bring this important paper forward.

The “died suddenly” phenomenon post COVID-19 vaccination is very real and devastating.

COVID-19 vaccines should be immediately taken off the market and the entire LNP/mRNA platform should be suspended and thoroughly investigated.

## **The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity**

**by Michel Chossudovsky**

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

*“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”*
