Abstract Part II

[See Part I of this study here.](#)

*The COVID-19 modified mRNA (modmRNA) lipid nanoparticle-based “vaccines” are not classical antigen-based vaccines but instead prodrugs informed by gene therapy technology. Of considerable note, **these products have been linked to atypical adverse and serious adverse event profiles.***

As discussed in Part 1, health-related risks and drawbacks were drastically misrepresented and underreported in the Pfizer and Moderna trial evaluations of these genetic products.

Now in Part 2, we examine the main structural and functional aspects of these injectables. The COVID-19 modmRNA injectable products introduce a unique set of biological challenges to the human body with the potential to induce an extensive range of adverse, crippling, and life-threatening effects.

Based on the fact that there is no current method to quantify host (cell-based) spike protein production *in vivo* following injection with these prodrugs, there *is* no standard “dose”. This is in part due to differences in spike protein production output, which depends on cell metabolism and transfection efficiency. It is therefore difficult to predict adverse event profiles on an individual basis, but **considering that millions of adults across the world have reported severe and serious adverse events in the context of these modmRNA COVID-19 products, valid concerns are raised regarding injection of infants and younger age groups for whom COVID-19 poses only minimal risks.**

We address the process-related genetic impurities inherent in mass production of these products, and the potential risks posed by these contaminants. We then categorize the principal adverse events associated with the modmRNA products with a brief systems-based synopsis of each of the six domains of potential harms:

- (1) cardiovascular,
- (2) neurological,

- (3) hematologic;
- (4) immunological,
- (5) oncological, and
- (6) reproductive.

We conclude with a discussion of the primary public health and regulatory issues arising from this evidence-informed synthesis of the literature and reiterate the urgency of imposing a global moratorium on the modmRNA-LNP-based platform.

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”

Reviews

This is an in-depth resource of great interest if it is the wider perspective you are motivated to understand a little better, the author is very knowledgeable about geopolitics and this comes out in the way Covid is contextualized. —Dr. Mike Yeadon

In this war against humanity in which we find ourselves, in this singular, irregular and massive assault against liberty and the goodness of people, Chossudovsky's book is a rock upon which to sustain our fight. -Dr. Emanuel Garcia

In fifteen concise science-based chapters, Michel traces the false covid pandemic, explaining how a PCR test, producing up to 97% proven false positives, combined with a relentless 24/7 fear campaign, was able to create a worldwide panic-laden "plandemic"; that this plandemic would never have been possible without the infamous DNA-modifying Polymerase Chain Reaction test - which to this day is being pushed on a majority of innocent people who have no clue. His conclusions are evidenced by renown scientists. —Peter Koenig

Professor Chossudovsky exposes the truth that "there is no causal relationship between the virus and economic variables." In other words, it was not COVID-19 but, rather, the deliberate implementation of the illogical, scientifically baseless lockdowns that caused the shutdown of the global economy. -David Skripac

A reading of Chossudovsky's book provides a comprehensive lesson in how there is a global coup d'état under way called "The Great Reset" that if not resisted and defeated by freedom loving people everywhere will result in a dystopian future not yet imagined. Pass on this free gift from Professor Chossudovsky before it's too late. You will not find so much valuable information and analysis in one place. -Edward Curtin
