The seeds of Nigella sativa, commonly known as black seed or black cumin, are used in folk (herbal) medicine all over the world for the treatment and prevention of a number of diseases ([click here](#)).

SUPPLEMENT FACTS

Serving Size 2 Capsules

Servings Per Container 60

	Amount Per Serving	%Daily Value
Selenium (<i>L-Selenomethionine</i>)	75.00 mcg	136%
Black Sativa Extract (<i>Nigella sativa</i>)(Seed)	500.00 mg	†
Irish Sea Moss Powder (<i>Chondrus Crispus</i>) (Plant)	500.00 mg	†
Green Tea Extract (<i>Camellia Sinensis</i>) (Leaf)	150.00 mg	†
Nattokinase	100.00 mg (2000 FU)	†
Dandelion Extract (<i>Taraxacum officinale</i>) (Root)	50.00 mg	†

%DV based on a 2000 calorie diet. DV may be higher or lower depending on individual calorie needs.

† Daily Value not established.

Other ingredients: Vegetable Cellulose, Dicalcium Phosphate, Silicon Dioxide, Magnesium Stearate.

SUGGESTED USE: AS A DIETARY SUPPLEMENT, TAKE TWO (2) CAPSULES TWICE DAILY WITH 8-12 OZ OF WATER OR AS DIRECTED BY YOUR HEALTHCARE PROFESSIONAL.

Black Sativa

Black Sativa has an ancient medicinal history and is still used to treat a variety of diseases and chronic health conditions. Black Sativa also shows anti-viral, antioxidant, and anti-inflammatory properties and can inhibit the expression levels of pro-inflammatory cytokines.

- Powerful medicinal properties
- Treats conditions from headaches, to high blood pressure and infections
- Stimulates tissue growth and wound healing
- Decreases blood levels of c-reactive protein

In South Asia, it is called Kalonji.

Its Arabic name is Habat-ul-Sauda.

Its English name is Black cumin.

Nigella Sativa is used as a spice in Indian and Middle Eastern cuisine. The black seeds taste like oregano and have bitterness to them like mustard-seeds.

Much of the biological activity of the seeds has been shown to be due to thymoquinone.

In Islamic literature, Nigella Sativa is considered as one of the greatest forms of healing medicine. It has been recommended for using on a regular basis in Tibb-e-Nabwi (Prophetic Medicine). ([click here](#))

Folk Medicine Uses

The seeds have been traditionally used in the Middle East and Southeast Asian countries to treat ailments including asthma, bronchitis, rheumatism and related inflammatory diseases, to increase milk production in nursing mothers, to promote digestion and to fight parasitic infections. Its oil has been used to treat skin conditions such as eczema and boils and to treat cold symptoms.

Its many uses have earned Nigella the Arabic approbation 'Habbatul barakah', meaning the seed of blessing. Nigella Sativa seeds and their oil have a long history of folklore usage in Arabian and Indian civilization and are used in food as well as medicine. The seeds are used as flavouring, to improve digestion and produce warmth, especially in cold climates. They are sometimes scattered in the folds of woollen fabrics to preserve them from insect damage.

In India the seeds are used as a carminative and stimulant to ease bowel and indigestion problems and are given to treat intestinal worms and nerve defects to reduce flatulence, and induce sweating. Dried pods are sniffed to restore a lost sense of smell. ([click here](#))

In Moroccan traditional medicine, the plant is used to treat illnesses such as allergy, heart disease, hypertension, scarring, dermatitis, abdominal pain, stomach ache, vomiting, osteoarthritis, and rheumatic pain ([click here](#))

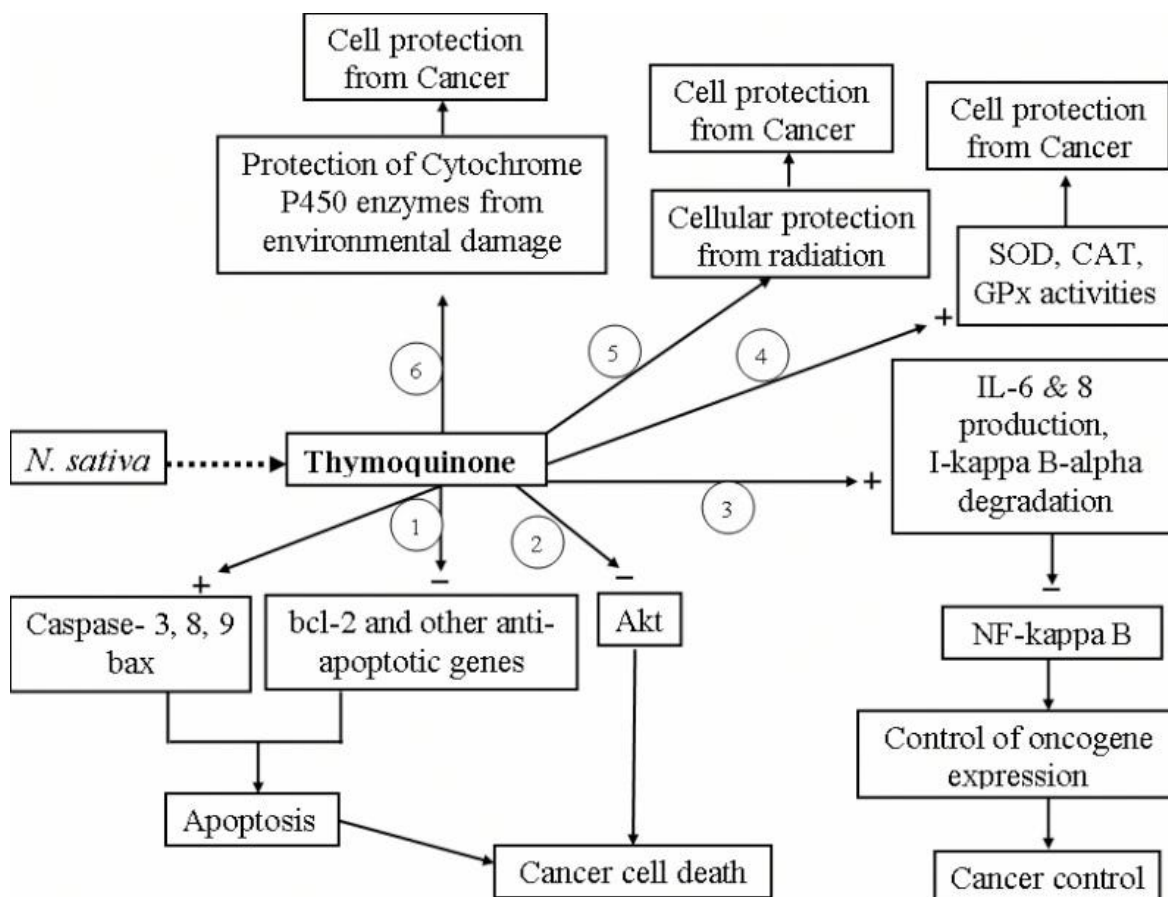

How the COVID-19 Vaccinated Can Benefit

Source: ([Click here](#))

- antimicrobial against wide variety of bacterial, fungal and parasitic organisms including tape worms, hook worms and nodular worms ([click here](#))
 - works against Staph, Salmonella, E.Coli, Shigella, Pseudomonas ([click here](#))
 - works against fungal diseases like Candida and Aspergillosis ([click here](#))
- anti-viral: blocks ACE2 receptors, acts as Zinc ionophore to enhance Zinc entry into cells for anti-viral effects in COVID-19 ([click here](#))
- anti-inflammatory: reduces skin rashes, edema, granuloma formation ([click here](#))
- treats gastrointestinal disorders: anti-ulcer activity, anti-colitis activity ([click here](#))
- anti-hepatotoxicity: protects liver from various toxins (antioxidant effect of thymoquinone) ([click here](#))
- anti-nephrotoxicity: protects kidneys from chemo toxicity, proteinuria, albuminuria, hyperlipidemia with nephrotic syndrome (also antioxidant effect of thymoquinone) ([click here](#))
- treats asthma, bronchospasm and chest congestion (nigellone is the active ingredient that inhibits histamine release from mast cells) ([click here](#))
- treats dyslipidemia: lowers serum cholesterol, triglycerides and glucose ([click here](#))
- anti-diabetic activity ([click here](#))

- analgesic - has potent analgesic effects through opioid receptors
- treatment of multiple sclerosis - thymoquinone shown to have a role ([click here](#))
- anti-cancer activity: thymoquinone has activity against leukemias, breast cancer, colon cancer, pancreatic adenocarcinoma, hepatic cancer, lung cancer, renal cancer, prostate and cervical cancers ([click here](#))

Safety

Seeds of *Nigella sativa* have a long history of use for food and medicinal purposes. No adverse or side effects have been reported when used within the recommended dosage, although dermatitis has been reported. ([click here](#))

(Note: Pregnant women, children under 18 should consult a physician before taking any supplement discussed)

My Take...

Nigella Sativa binds the COVID-19 mRNA vaccine spike protein and may prevent damage done to body tissues by the spike protein.

At least 8 published studies have shown evidence of this effect ([click here](#))

It also has numerous benefits: it is a powerful anti-microbial and anti-parasitic, as well as anti-viral, great for those whose immune systems were damaged by the jabs.

It is a powerful anti-inflammatory: used for skin rashes, asthma, ulcers and colitis.

It is an antioxidant, it protects the liver and kidneys from injury by the spike protein.

It has anti-cancer properties via thymoquinone against numerous cancers including aggressive ones like leukemias, pancreatic adenocarcinomas and common cancers like breast, prostate, lung and colon.

Nigella Sativa (Black seed) is a very powerful natural health product that can help those who have been COVID-19 vaccine injured, those suffering from the effects of long COVID, those who are extremely sensitive to vaccine spike protein shedding, and those who want to be prepared for the next viral pandemic.
