

COVID-19: Perfect Cover for Mandatory Biometric ID

By [Kurt Nimmo](#)

Theme: [Police State & Civil Rights](#)

Global Research, April 09, 2020

Now that the state and its media have falsely characterized the coronavirus as a pandemic [closing in on the 1918 flu pandemic](#) (falsely attributed to Spain), it is time for the global elite and their technocrats to force not only highly-profitable (for Big Pharma) vaccines on the world but biometric IDs as well.

“As countries begin to lift coronavirus lockdowns, biometric identification can help verify those who have already had the infection, and ensure that the vulnerable get the vaccine when it is launched, health and technology experts said,” reports [Reuters](#).

A biometric ID system can keep a record of [the infected] and those getting the vaccine, said Larry Dohrs, Southeast Asia head at iRespond, a Seattle-based nonprofit that launched its technology last month.

The pretense for this—as it was for the US decimation of Libya, Syria, and Iraq—is “humanitarianism,” according to iRespond and Simprints, a British NGO partnered with Johns Hopkins University’s Global mHealth Initiative, the latter connected to the US military and its “Dark Winter” and “Event 201” pandemic scenarios (see Whitney Webb: [All Roads Lead to Dark Winter](#)).

Total surveillance requires 24/7 monitoring of individuals—especially those included in the [Main Core database](#) of activists and political enemies of the state—and biometric technology introduced during the hysteria of an exaggerated health threat fits the bill.

[ID2020](#)—a project initiated by the Rockefeller Foundation, Bill Gates and Microsoft, transnational pharmaceutical corporations, and technology firms—is pushing the concept that every human on the planet needs biometric verification because “to prove who you are is a fundamental and universal human right,” according to the ID2020 [website](#).

“What they really want is a fully standardized data collection and retrieval format, and cross-border sharing of identities of the entire population of the planet, in order for the stand-alone AI-powered command center to work without a hitch, and for purposes of calculating everyone’s potential contribution, and threat to the system,” explains [OffGrid Healthcare](#).

If you believe this is dangerously close to China’s “social credit” system, you’re not far off the mark.

Introducing this totalitarian technology under the cover of a supposed pandemic rife with speculation and a dearth of hard numbers is a near-perfect cover for “patient ID technology” producing data on individuals shared with the state and its corporate partners.

A vaccine ostensibly designed to combat COVID-19 will become mandatory and those who resist will be blacklisted as public health criminals. They will be locked out of society, similar to Chinese citizens suffering under China's totalitarian social credit system.

[Martin Armstrong](#) believes the healthcare-industrial complex and the state will surreptitiously introduce a nanotech ID and tracking chip along with a cocktail of vaccine toxins, or they will sell it to the public as a way to identify those presumably infected.

The proposal is a digital certificate that verifies if you have been vaccinated and was developed by MIT and Microsoft. They are looking at merging this with Bill Gates' ID2020. It is entirely possible that this scare has been a deliberate plot to get people to accept these digital implants. Refuse, and you will be prohibited from social gatherings. Like 9/11 conditioned us to be x-rayed before entering a plane, now the next stage is to embed digital markers that they have been using in dogs and cats.

COVID-19 is the perfect Trojan horse for a control freak state itching to not only micromanage the lives of ordinary citizens but also ferret out critics and potential adversaries and punish them as enemies of the state. The latter is the primary objective. History is replete with examples—from Stalin and Mao to Hitler and Mussolini, with lesser autocrats and dictators along the way.
