[New Year Donation Drive: Global Research Is Committed to the "Unspoken Truth"](#)

The rush to mass vaccinate the world with genetic vaccines launched in 2021 with a reckless hubris that will go down in history. With no assurances on safety or efficacy, the [American College of Obstetrics and Gynecology](#) broke the time-honored conservative stance on novel products in pregnant women and broadly endorsed the shots that skipped all preclinical and clinical testing during gestation.

COVID-19 Vaccines and Pregnancy: Conversation Guide

Key Recommendations and Messaging for Clinicians

[Vaccination Site Recommendations for Pregnant Individuals](#)

Key Recommendations

- The American College of Obstetricians and Gynecologists (ACOG) strongly recommends that pregnant individuals be vaccinated against COVID-19.
- Vaccination may occur in any trimester, and emphasis should be on vaccine receipt as soon as possible to maximize maternal and fetal health.
- For patients who do not receive any COVID-19 vaccine, the discussion should be documented in the patient's medical record. During subsequent office visits, obstetrician-gynecologists should address ongoing questions and concerns and offer vaccination again.
- COVID-19 vaccines may be administered simultaneously with other vaccines, including within 14 days of receipt of another vaccine. This includes vaccines routinely administered during pregnancy, such as the influenza and Tdap vaccines.

Now years later, scientists are filling in the knowledge gaps, and in the case of a rat study

by [Erdogan et al](#), with results that are making many in the clinical community uncomfortable. In short, they found that pregnant rats injected with the Pfizer BNT162b2 vaccine had male progeny in particular, that tended to have concordant neurodegenerative changes with impaired behaviors on standardized testing.

“In conclusion, our study presents evidence that the COVID-19 mRNA BNT162b2 vaccine impacts the Wnt pathway (one of the most crucial morphogens in development and during the maturation of central nervous system) and brain-derived neurotrophic factor [BDNF] levels in rats, with particularly pronounced effects observed in males. These male-specific outcomes, including autism-like behaviors, reduced neuronal counts, and impaired motor performance, emphasize the potential neurodevelopmental implications of the vaccine, aligning with existing literature on the roles of the WNT pathway and BDNF signaling in neurodevelopmental disorders.”

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”

Reviews

This is an in-depth resource of great interest if it is the wider perspective you are motivated to understand a little better, the author is very knowledgeable about geopolitics and this comes out in the way Covid is contextualized. —Dr. Mike Yeadon

In this war against humanity in which we find ourselves, in this singular, irregular and massive assault against liberty and the goodness of people, Chossudovsky's book is a rock upon which to sustain our fight. -Dr. Emanuel Garcia

In fifteen concise science-based chapters, Michel traces the false covid pandemic, explaining how a PCR test, producing up to 97% proven false positives, combined with a relentless 24/7 fear campaign, was able to create a worldwide panic-laden "plandemic"; that this plandemic would never have been possible without the infamous DNA-modifying Polymerase Chain Reaction test - which to this day is being pushed on a majority of innocent people who have no clue. His conclusions are evidenced by renown scientists. —Peter Koenig

Professor Chossudovsky exposes the truth that "there is no causal relationship between the virus and economic variables." In other words, it was not COVID-19 but, rather, the deliberate implementation of the illogical, scientifically baseless lockdowns that caused the shutdown of the global economy. -David Skripac

A reading of Chossudovsky's book provides a comprehensive lesson in how there is a global coup d'état under way called "The Great Reset" that if not resisted and defeated by freedom loving people everywhere will result in a dystopian future not yet imagined. Pass on this free gift from Professor Chossudovsky before it's too late. You will not find so much valuable information and analysis in one place. -Edward Curtin
