...

I have been on a two year medical journey from hell since receiving the Pfizer Vax in 12/20 and 1/21. Multiple injuries after I did what I thought I should as duty to protect my patients as a frontline physician. Had many doubts, but still proceeded in good faith. Now the system is failing me and the irony of the responses by some accusing me of pushing the vax is ironic.

...

My first physician that I encountered accused me of being an alcoholic. Another blamed me and said I must be out of shape. Not one cardiologist ever listened to my timeline and symptoms. One told me these symptoms go away after three years. The vax hadn't been out three years!!

...

It has struck me that for two years every doctor I've seen has either been arrogant, lacks empathy, is a poor listener, has had his/her mind made up before seeing me, is afraid to hear me as I don't fit his/her brainwashed narrative or is just plain ignorant. This is me seeing my profession in its true colors.

Yes this! POTS after second jab. Now my latest cardiologist at Cleveland says it's not pots just idiopathic sinus tachycardia, take your beta blocker and condition your heart. Still doesn't tell me why I pass out. He is actually my fourth cards. Over it. I'm OB/Gyn and frustrated as hell.

Dr. Smith has been shocked by the horrible treatment she has received from her physician colleagues as a COVID-19 vaccine injured patient.

Dr. Shmuel Shapira MD

Dr. Shmuel Shapira MD MPH (Col) led Israel's effort to develop a coronavirus vaccine and was the Head of the Department of Military Medicine of Hebrew University Faculty of Medicine and IDF Medical Corps ([read more here](#)):

"Professor Shmuel Shapira might be the most senior ranking medical-scientist in the world to openly criticize the COVID vaccines."

On May 13, 2022, Dr. Shapira said: "I received 3 vaccinations (Pfizer), I was physically injured in a very significant way as many others were injured"

Dr. Kerry Phelp MD

Dr. Kerry Phelp is the former President of the Australian Medical Association (AMA). She and her partner were COVID-19 vaccine injured. She is the highest ranking Australian medical doctor to admit to being COVID-19 vaccine injured ([read more here](#)):

“This is an issue that I have witnessed first-hand with my wife who suffered a severe neurological reaction to her first Pfizer vaccine within minutes, including burning face and gums, paraesthesiae, and numb hands and feet”

“I continue to observe the devastating effects a year-and-a-half later with the addition of fatigue and additional neurological symptoms including nerve pains, altered sense of smell, visual disturbance and musculoskeletal inflammation. The diagnosis and causation has been confirmed by several specialists who have told me that they have seen ‘a lot’ of patients in a similar situation.”

“Dr. Phelp revealed she was also diagnosed with a [vaccine injury](#) from her second dose of Pfizer in July 2021, “with the diagnosis and causation confirmed by specialist colleagues”.

“In my case the injury resulted in dysautonomia with intermittent fevers and cardiovascular implications including breathlessness, inappropriate sinus tachycardia and blood pressure fluctuations.”

“Dr. Phelp said both reactions were reported to the Therapeutic Goods Administration (TGA) “but never followed up”.

“She revealed she had spoken with other doctors “who have themselves experienced a serious and persistent adverse event” but that “vaccine injury is a subject that few in the medical profession have wanted to talk about”.

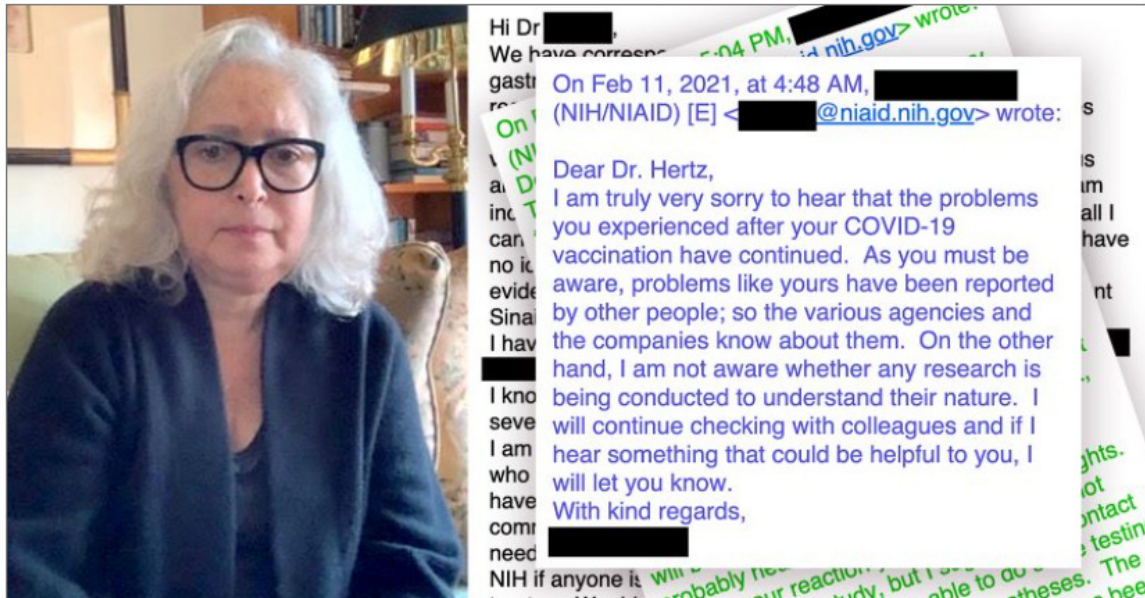

Dr. Danice Hertz MD

Dr. Danice Hertz, a 64 year old physician was “horribly ill” and “incapacitated” after getting Pfizer’s COVID-19 mRNA vaccine. Her story is here ([click here](#)):

Exclusive: Physician ‘Horribly Injured’ After Pfizer Vaccine Pleads With Top U.S. Public Health Officials for Help — and Gets None

In an exclusive interview with The Defender, Dr. Danice Hertz said people like her who have been seriously injured by COVID vaccines are being dismissed or ignored, and because health officials won’t research their injuries and potential treatments, they have nowhere to turn.

By **Megan Redshaw**

“Dr. Hertz, a gastroenterologist who retired in October, got her first and only dose of [Pfizer’s](#) vaccine on Dec. 23, 2020”

“Within 30 minutes, I started experiencing adverse effects”

“Hertz said within 24 hours she developed neurological symptoms, including severe [paresthesias](#) in her face, tongue, scalp, chest wall and limbs, as well as tremors, twitching, weakness, headaches, tinnitus and imbalance.”

“I saw six neurologists, five allergists, three rheumatologists, and no one had a clue,” Hertz said.”

“Dr. Danice Hertz said people like her who have been seriously injured by COVID vaccines are being dismissed or ignored, and because health officials won’t research their injuries and potential treatments, they have nowhere to turn.”

“After taking the Pfizer injection Danice got neuropathy, mast cell activation, pericarditis and many other symptoms. She has now seen 22 different doctors and still hasn’t recovered.” ([click here](#))

Dr. Stephen Wright MD

Dr. Stephen Wright (UK) died at age 32, from blood clots caused by the AstraZeneca COVID-19 vaccine.

Mark Steyn conducted several interviews with the family:

My Take...

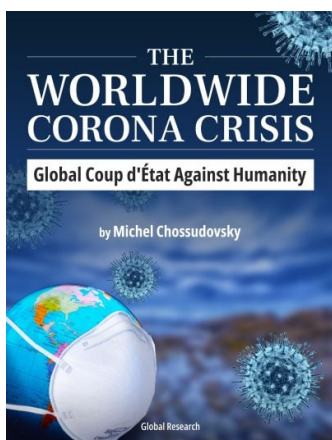

It is crucial for doctors who have been COVID-19 vaccine injured to speak up and let the world know what has happened to them and how they have been treated by their colleagues and the medical establishment in general, once they became COVID-19 vaccine injured patients.

It is also important for everyone, vaccinated or unvaccinated to be kind to these doctors as they share their painful stories with us. Their voices will be crucial in turning the tide on the COVID-19 vaccine propaganda, gaslighting and censorship.

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”
