

COVID Deaths Up 39% After Vaccines Rolled Out in Ontario Canada

Weren't the vaccines supposed to REDUCE deaths from COVID? Oddly, there was no press coverage on this. I wanted to make sure you knew about it. Tell your friends.

Executive summary

The [official government numbers show COVID deaths are up in Ontario by nearly 40% since the vaccines rolled out](#) and hospitalizations due to COVID are up by 31%!

Both hospitalization and deaths from COVID were up dramatically.

You can see it yourself (see the red box below):

ENHANCED EPIDEMIOLOGICAL SUMMARY

Comparison of COVID-19 Hospitalizations and Deaths in 2022 and 2021

Published: March 2023

Purpose

This report highlights differences in the incidence of COVID-19 hospitalizations and deaths in Ontario between January 1 to December 31, 2022 and January 1 to December 31, 2021.

Please visit the interactive [Ontario COVID-19 Data Tool](#) to explore data from the entire COVID-19 pandemic (i.e., January 2020 onward) by public health unit, age group, sex, and time. For more detailed information on COVID-19 vaccine uptake in Ontario, please refer to the [COVID-19 Vaccine Uptake in Ontario](#) report. For information on variants of concern in Ontario, please refer to the [SARS-CoV-2 Genomic Surveillance in Ontario](#) report.

Highlights

- Differences in circulating SARS-CoV-2 variant characteristics (e.g., transmissibility and immune evasion), public health measures, COVID-19 vaccine uptake, population immunity, and COVID-19 vaccine effectiveness against circulating SARS-CoV-2 lineages impact the incidence of severe COVID-19 outcomes, including hospitalizations and deaths.
- In Ontario, there were a total of 29,524 COVID-19 hospitalizations in 2022 and 22,559 in 2021. The COVID-19 hospitalization and death rates in 2022 were 31% and **39% higher than in 2021**, respectively (Tables 1 and 2, Figure 1).

Deaths went from 5,485 in 2021 to 7,625 in 2022.

Could that be statistical noise? Not likely. Sigma is 74 so it's a 29-sigma increase. In other words, this increase in death didn't happen by chance; something caused it.

The data from the Ontario website

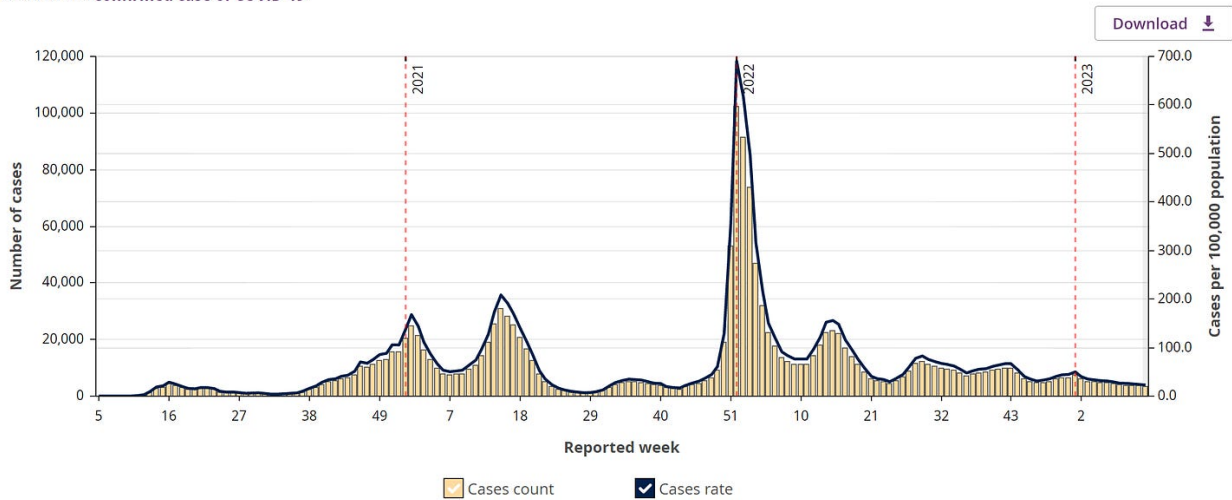

We know the vax makes you more likely to get COVID. If you had 3 shots, the [Cleveland Clinic study showed you are about 2.5X more likely to get COVID](#). So that big spike in cases in 2022 is totally expected: it was our own doing. The more people who got COVID, the more people who died from COVID.

You're less likely to die from a COVID case in 2022 than in 2021 because the variant is less deadly, not because the vaccine worked.

Laboratory confirmed COVID-19 weekly case counts and rates by reported date in Ontario

January 26, 2020 to March 25, 2023

This graph shows COVID-19 cases over time among people who were tested for COVID-19 and met the provincial definition of a **confirmed case of COVID-19**.

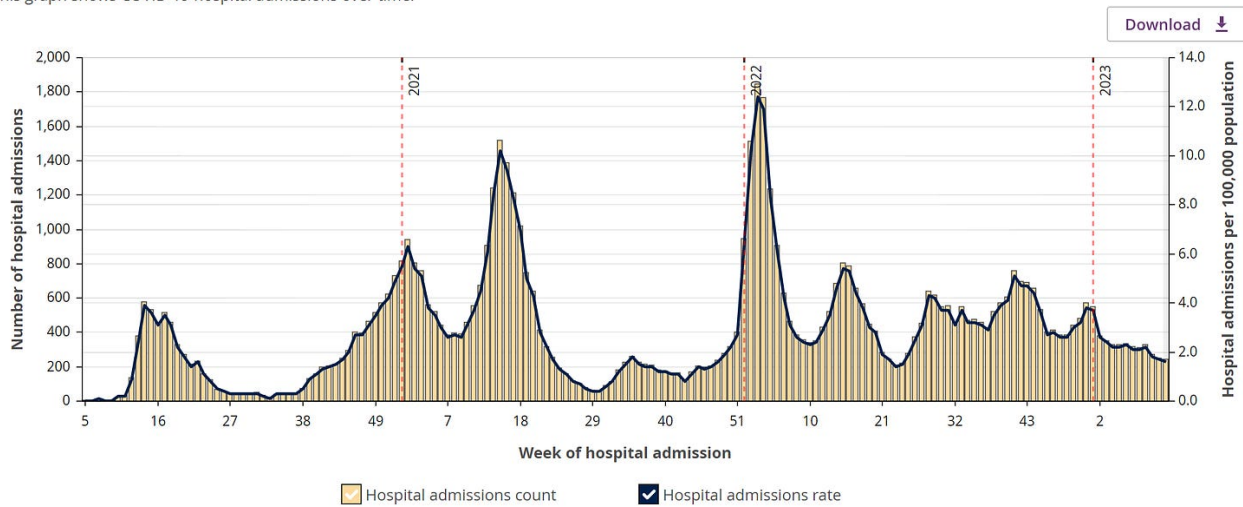

Cases

COVID-19 weekly hospital admission counts and rates by admission date in Ontario

January 26, 2020 to March 25, 2023

This graph shows COVID-19 hospital admissions over time.

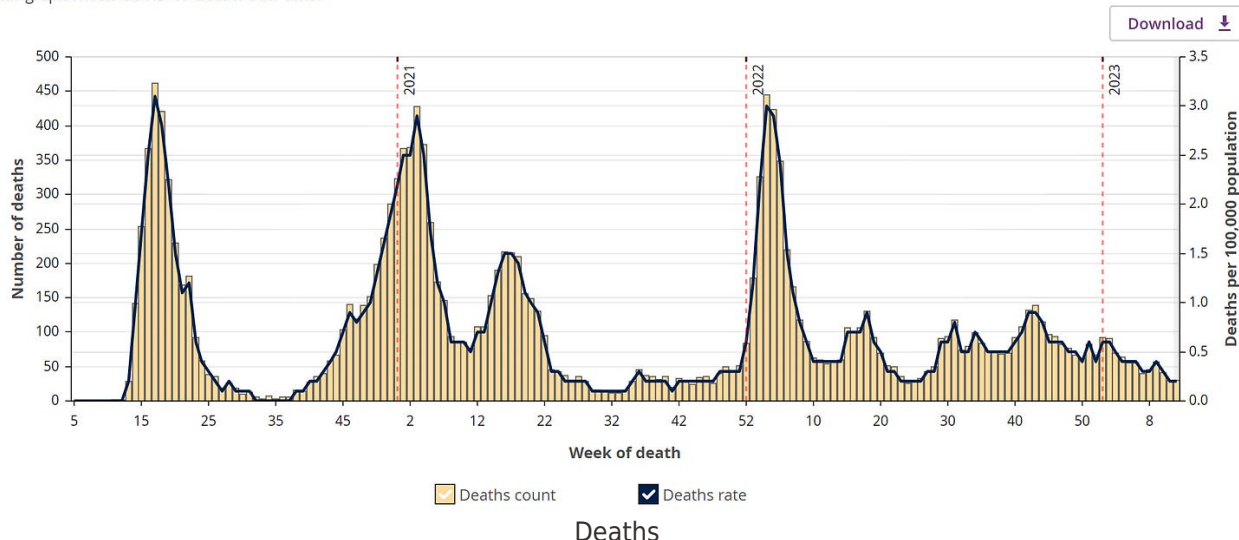

Hospitalizations

COVID-19 weekly death counts and rates in Ontario

January 26, 2020 to March 25, 2023

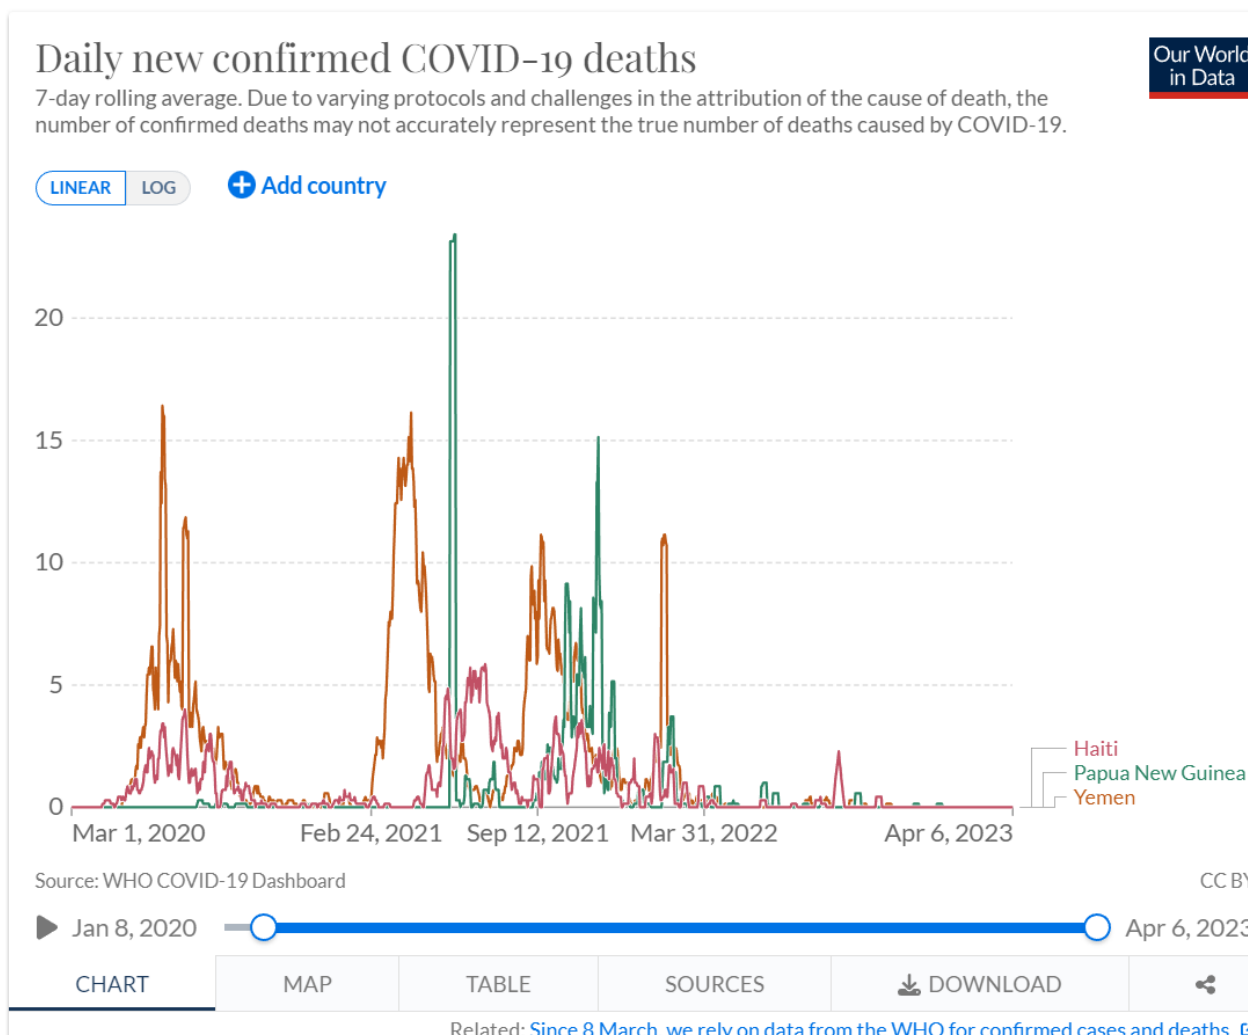

This graph shows COVID-19 deaths over time.

Possible explanations

Was this because the virus was more deadly in 2022? I don't think so.

Let's look the world's least vaccinated countries: Yemen, Haiti, and PNG. As you can see, deaths are way down in 2022 because the variants are less lethal:

Related: [Since 8 March, we rely on data from the WHO for confirmed cases and deaths](#)

These numbers show that the “it would have been worse if people weren’t vaccinated” excuse won’t hold any water.

Furthermore, we know the vaccines are super deadly. Consider the following recent post which is based on CDC data:

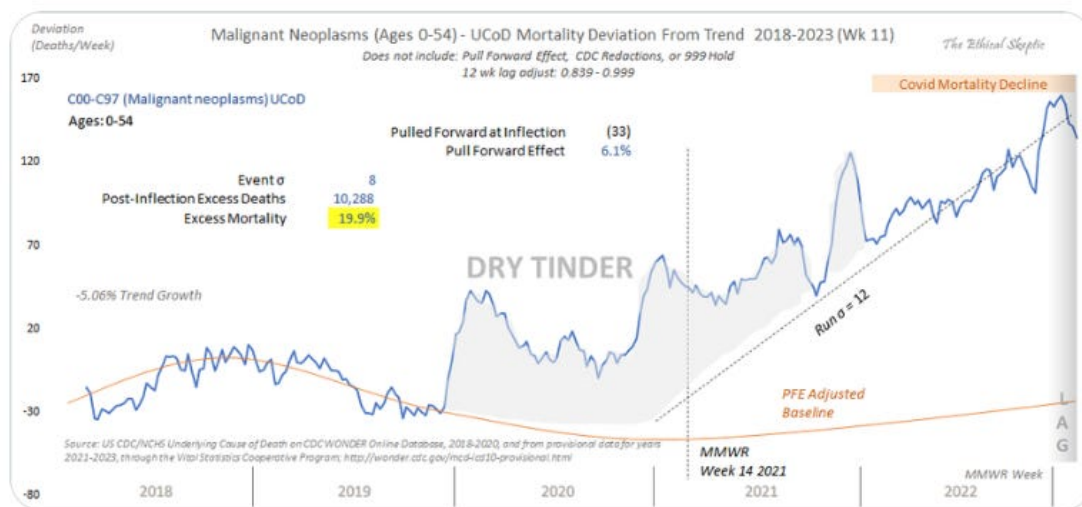

Pinned Tweet

Ethical Skeptic @EthicalSkeptic · Apr 6

The latest CDC Wonder data set has dropped.

Malignant Neoplasms Ages 0 - 54 ➔ UP 19.9% or 12-sigma to the excess.

as of Week 11 2023

57 823 1,471 190.1K

Show this thread

If it wasn't the vaccine that caused this dramatic rise, what caused it?

Also, even the US data shows a decrease in 2022 vs. 2021, so it's hard for Ontario to argue that the virus was more deadly in 2022:

This visualization was done on the CDC website on the [Weekly Provisional Counts of Deaths page](#).

So there is no rock they can hide under.

Of course, this is embarrassing for the narrative which is why nobody is talking about it.

Even [Professor David Fisman](#) is silent about the report. I reached out to him for an explanation and he ignored it, exactly as expected.

This is why there is no press coverage of this: because the numbers are inexplicable if the vaccine worked.

I just thought you'd like to know.

Summary

It's unfortunate that the mainstream press isn't covering this.

I can't figure out why. The press is supposed to report this and get comments from both sides. Instead, they ignore the story.

A nearly 40% increase in COVID deaths and the mainstream press ignores the story!?! WTF is going on here?

But I thought people would want to know the truth.

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”
