

# Student, 21, with 'almost impossible' cancer diagnosis dies after 'last wish' granted

Alexandra passed away surrounded by loved ones in Peru

A 21-year-old student with an 'almost impossible' cancer diagnosis has died after raising £165,000 for her final flight back home to Peru.

Alexandra Angeles Caycho, a Fine Art and Design graduate from Lancaster University, thought she was suffering from a rugby injury before she was diagnosed with stage three pancreatic cancer.

Doctors told her this summer she had just 'days to weeks left to live'.

She was finally granted her 'last wish' earlier this month, arriving safely in Peru after several flights with costly medical assistance to spend her final days with her family. Her boyfriend shared the sad news on Saturday (September 14) that she has now passed away.

In an update on the GoFundMe online fundraising page, Dylan said: "Struggling to put it into words, Alex passed away at 12 30 am local time on the 14th September with loved ones by her side. Alex's family and close friends ask for privacy at this moment in time."

Alex moved from Peru to Lancaster, where she went to university to study in 2021. She first started suffering from pain last year.

She explained how her bowel movements then changed and 'things got weird'. Alex's health soon started to deteriorate - her eyes turned yellow and she couldn't sit for long - before she went to A&E where she was told she could have a problem with her liver.

She was sent to Clatterbridge Cancer Centre in Liverpool after finding out that the cancer had developed to stage four. Writing about her diagnosis, she said: "The doctors were shocked; they told me it was almost impossible for someone my age to have this disease."

Alex, who graduated from university this year and planned to do a masters degree, was discharged from hospital to spend time at home with her mum, Linda, and Dylan. She returned for chemotherapy just days later but it was stopped when she threw up blood.

She said: "They [the doctors] decided to pause everything and put me back in the ward. I was there for two weeks and they told me I had internal bleeding from the cancer, they said there was nothing much they could do and that I have days to weeks left to live."

"I've tried to stay strong and to keep fighting with everything I have, but unfortunately my journey is coming to an end. I'm too tired most days to do anything; I suffer with swelling, the swelling has got so bad I have gained ten kilos of fluid and my body is too weak to deal with that immense weight gain. I suffer from back pain. Most days I spend my time in bed trying to eat and drink water if I can."

## My Take...

Millions of University students around the world were illegally mandated toxic COVID-19 mRNA Vaccines.

There is no such thing as an "impossible diagnosis" when it comes to Turbo Cancer caused by COVID-19 mRNA Vaccines.

Pancreatic Cancer at age 21 was unheard of, and I had never seen a case this young, not even close.

But after the rollout of COVID-19 Vaccines, this is textbook “Turbo Cancer”.

No one knows the exact mechanism but it’s important to remember that Pfizer and Moderna COVID-19 mRNA Vaccines have particles size 60-100nm which are cleared by the hepatobiliary system, end up accumulating in the bile ducts, gallbladder and yes, the pancreas.

So in addition to destroying the immune system, COVID-19 mRNA Vaccines almost certainly have a LOCAL CARCINOGENIC EFFECT.

[American Cancer Society:](#)

**“The average age at the time of diagnosis is 70. Almost all patients are older than 45. About two-thirds are at least 65 years old.”**

[GoFundMe:](#)

**Alex was diagnosed with stage 3 pancreatic cancer on March 17 2023, aged just 20.**

**“My future was bright, and I was so excited to start my journey as an artist,” she posted on the fundraising page.**

**“But on March 17th, 2023, everything changed. At just 20 years old, I received the devastating news that I had been diagnosed with stage 3 pancreatic cancer.**

**“The doctors were shocked; they told me it was almost impossible for someone my age to have this disease.**

**“Yet, here I am, facing a battle that no one should ever have to fight.**

**“Since then, I’ve been through endless rounds of chemotherapy, radiotherapy, and countless hospital stays. I’ve tried to stay strong, to keep fighting with everything I have, but unfortunately, my journey is coming to an end.**

“Despite all the treatments, the cancer has spread throughout my body. The tumour in my pancreas has grown so much that it’s pressing against my intestines, causing internal bleeding. The doctors have explained that there’s nothing more they can do—treatment is no longer an option. They’ve given me a timeframe of just days to weeks to live.

“This news has shattered me, and it’s been a massive shock to my friends and family as well. I never imagined my life would end this way, so soon, with so much left undone. But now, more than anything, I want to spend my last days surrounded by the people I love, in the place that means the most to me—home.

“My last wish is to return to Peru, to be with my family in the place where I grew up, where I have so many happy memories. I can’t imagine being anywhere else in these final days. But getting there isn’t going to be easy.

“This is why I’m reaching out to you all, asking for your help. The cost of (transportation) and the medical care I need during the flight is far beyond anything my family and I can afford.

“Any contribution, no matter how small, would mean the world to me. Your kindness could help me fulfil my last wish to go home, to be with my family, and to spend my final moments in a place where I feel at peace.”

## **The Worldwide Corona Crisis, Global Coup d’Etat Against Humanity**

**by Michel Chossudovsky**

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

*“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”*

### **Reviews**

*This is an in-depth resource of great interest if it is the wider perspective you are motivated to understand a little better, the author is very knowledgeable about geopolitics and this comes out in the way Covid is contextualized. —Dr. Mike Yeadon*

*In this war against humanity in which we find ourselves, in this singular, irregular and massive assault against liberty and the goodness of people, Chossudovsky’s book is a rock upon which to sustain our fight. –Dr. Emanuel Garcia*

*In fifteen concise science-based chapters, Michel traces the false covid pandemic, explaining how a PCR test, producing up to 97% proven false positives, combined with a*

*relentless 24/7 fear campaign, was able to create a worldwide panic-laden “plandemic”; that this plandemic would never have been possible without the infamous DNA-modifying Polymerase Chain Reaction test – which to this day is being pushed on a majority of innocent people who have no clue. His conclusions are evidenced by renown scientists.*  
—**Peter Koenig**

*Professor Chossudovsky exposes the truth that “there is no causal relationship between the virus and economic variables.” In other words, it was not COVID-19 but, rather, the deliberate implementation of the illogical, scientifically baseless lockdowns that caused the shutdown of the global economy.* –**David Skripac**

*A reading of Chossudovsky’s book provides a comprehensive lesson in how there is a global coup d’état under way called “The Great Reset” that if not resisted and defeated by freedom loving people everywhere will result in a dystopian future not yet imagined. Pass on this free gift from Professor Chossudovsky before it’s too late. You will not find so much valuable information and analysis in one place.* –**Edward Curtin**
