50-year-old CMS teacher shares story after stroke at the Charlotte Marathon

By [Claire Kopsky](#), Feb. 27, 2024 at 3:39 PM MST

CHARLOTTE, N.C. (WBTV) – After experiencing a stroke moments after finishing his leg of a relay at the Charlotte Marathon, a Charlotte-Mecklenburg English teacher shared his story to educate the community about strokes and remind all every day is a gift.

“The central question for me has been you know, ‘Why?’ Why is a person who is like, eating really healthy, you know, I don’t smoke. I don’t drink. I’m exercising more than I ever have been, you know, since I was in high school. It’s just it was pretty confusing for me. Like, why is this happening to me?” 50-year-old stroke survivor Justin Parmenter said.

As an English teacher at the South Academy of International Languages, Parmenter stepped back into running in his late 40s thinking he was healthy.

“I ran in high school many, many years ago. And a couple years ago, my son got interested in running, joined the cross country team. I didn’t want him out running on the Greenway alone,” Parmenter said. “So I started running with him just to support him. It’s about, you know, having this new bond with my son.”

His colleagues caught wind of his re-found hobby and he trained to run the Charlotte Marathon as a relay with them in November 2023.

“The legs for the relay was five people running 26 miles so it was around five miles per leg,” Parmenter explained. “I thought, ‘Well, if I start now and build up my mileage, I could probably do that.’”

He was the first runner in his team’s relay on Nov. 4.

“After I was done, I found my teammates you know, the next runner got on the course and started and the rest of us got in the car, drove to the next relay point,” he said. “We were headed towards the third point and **I was driving the car when I had a stroke.**”

He said he blacked out and had to be told what happened later by his teammates.

My Take...

Justin is a teacher so he was mandated COVID-19 mRNA Vaccines to keep his job.

He had a stroke while running his 5 mile relay portion of a marathon and collapsed while driving to the next portion of the marathon. He then had another stroke 6 weeks later.

If he hadn't been driving slowly, when he had a stroke, someone may have died.

There are some key takeaways in this story:

1. COVID-19 Vaccinated are still getting very serious blood clots
2. COVID-19 Vaccinated are still collapsing while exercising.
3. COVID-19 Vaccinated are still collapsing while driving - that means the roads are still significantly more dangerous & unpredictable for everyone
4. Some doctors will try to cover-up COVID-19 Vaccine Injuries in creative ways.

Two strokes in a young healthy man is a serious legal liability for his doctor.

What about the mysterious "hole" in his heart that was there and then it was nowhere to be found? As a Radiologist, I find that more than a little suspicious. Incompetence? Coincidence? Or cover-up?

Don't put it past doctors making up all kinds of bogus "diagnoses" to deflect blame and legal liability for pushing COVID-19 mRNA Vaccines.

Canadian Doctors:

In late 2021, two young COVID-19 Vaccinated Canadian doctors had fatal car crashes early in the day.

Died: Aug 16, 2021
Dr. Nelia Scheeres
Age: 24
Barrie, ON
Medical student in Ireland
car crash, 1:15pm, only fatality

Died: Oct 21, 2021
Dr. Annabella Isabella Zawada
Age: 43
Thunder Bay, ON
Emergency physician
car crash, 11:40am, only fatality

In both cases, they lost control of the vehicle, they were the only fatality, while the other driver walked away with no injuries (highly likely that they had a medical event that led to the crash).

I was viciously attacked online for suggesting the possibility of COVID-19 Vaccine Injury, such as cardiac arrest or blood clots behind the wheel, that led to the crash.

Even [Reuters](#) used this to attack me in their hit piece. All the naysayers thought it was a “gotcha” that discredited me somehow.

To me, it always seemed a very reasonable to question such crashes, the “vaccidents” as they were called.

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”

Reviews

*This is an in-depth resource of great interest if it is the wider perspective you are motivated to understand a little better, the author is very knowledgeable about geopolitics and this comes out in the way Covid is contextualized. —**Dr. Mike Yeadon***

*In this war against humanity in which we find ourselves, in this singular, irregular and massive assault against liberty and the goodness of people, Chossudovsky’s book is a rock upon which to sustain our fight. —**Dr. Emanuel Garcia***

*In fifteen concise science-based chapters, Michel traces the false covid pandemic, explaining how a PCR test, producing up to 97% proven false positives, combined with a relentless 24/7 fear campaign, was able to create a worldwide panic-laden “plandemic”; that this plandemic would never have been possible without the infamous DNA-modifying Polymerase Chain Reaction test - which to this day is being pushed on a majority of innocent people who have no clue. His conclusions are evidenced by renown scientists. —**Peter Koenig***

*Professor Chossudovsky exposes the truth that “there is no causal relationship between the virus and economic variables.” In other words, it was not COVID-19 but, rather, the deliberate implementation of the illogical, scientifically baseless lockdowns that caused the shutdown of the global economy. —**David Skripac***

A reading of Chossudovsky’s book provides a comprehensive lesson in how there is a global coup d’état under way called “The Great Reset” that if not resisted and defeated by freedom

loving people everywhere will result in a dystopian future not yet imagined. Pass on this free gift from Professor Chossudovsky before it's too late. You will not find so much valuable information and analysis in one place. -Edward Curtin
