The latest updates on the “new normal” – chronicling the lies, distortions, and abuses by the ruling class.

Study lays waste to pro-lockdown agenda, finds net negative benefits (duh)

A [survey of the public health records in the UK](#) has turned up the conclusion that many anecdotally adopted years ago based on anecdotal experience and intuition: **the lockdowns were total theater that needlessly, badly hurt the society and economy.**

Via [The Telegraph](#):

“Lockdown saved as few as 1,700 lives in England and Wales in spring 2020, according to a landmark study which concludes the benefits of the policy were **“a drop in the bucket compared to [the staggering collateral costs](#)” imposed.**

Scientists from Johns Hopkins University and Lund University examined almost 20,000 studies on measures taken to protect populations against Covid across the world.

Their findings suggest that lockdowns in response to the first wave of the pandemic, when compared with less strict policies [adopted by the likes of Sweden](#), prevented as few as 1,700 deaths in England and Wales. In an average week there are around 11,000 deaths in England and Wales.”

1,700 deaths over the span of several months in a principality as large as Great Britain is nothing from a sane public health perspective. For context, [3,700 people globally die every](#)

[day from car accidents.](#)

WHO-directed ‘vaccine passports’ are now active in Europe

The EU, along with Australia, Canada, and the UK, is [ground zero for global biomedical totalitarianism](#).

Via [World Health Organization](#):

“In June 2023, WHO will take up the European Union (EU) system of digital COVID-19 certification **to establish a global system that will help facilitate global mobility** and protect citizens across the world from on-going and future health threats, including pandemics. This is the first building block of the WHO Global Digital Health Certification Network (GDHCN) that will develop a wide range of digital products to deliver better health for all.”

New CDC Director cackles about denying the peasants the pleasure of football during lockdowns

The corrupt pharmaceutical industry tool nitwit Rochelle Walensky has resigned her post as CDC Director in disgrace, to be replaced by, somehow, [an even more despicable technocrat](#) with no apparent regard of any kind for the serfs’ welfare.

Here is Mandy Cohen bragging about her arbitrary edicts, conjured out of thin air, in her prior role as North Carolina HHS Director.

“Make yourself sheep and the wolves will eat you.”

FDA curiously rejects COVID-19 safety warning labels

The FDA – which, of course, respects deeply The Science™ with a fanatical reverence reserved exclusively for the domain or religion — recently rejected a petition filed in January 2023 for the agency to update its Pfizer and Moderna mRNA shots’ warning label based on the risks demonstrated by actual science.

Via the [Coalition Advocating for Adequately Labeled Medicines \(CAALM\)](#):

“Incomplete, inaccurate, or misleading labeling of any medical product can negatively impact the health and safety of Americans, with global ramifications considering the international importance of FDA decisions. For these reasons, and due to the compelling need to ensure the safety and efficacy of any COVID-19 vaccine licensed by the FDA and to allow Petitioner the opportunity to seek emergency judicial relief should the instant Petition be denied, it is respectfully requested that FDA act on the instant Petition by April 30, 2023.”

The FDA, three months later in late April, issued its [official response](#). In the document, it rejects all but one of CAALM’s demands, including the request for a myocarditis warning

because, according to the agency, the evidence tying the injections to sudden cardiac death “is not sufficient to demonstrate a causal association between sudden cardiac death and vaccination.”

But, Mr. Public Health™ bureaucrat, one might retort, [myocarditis is housed categorically under the umbrella of cardiac sudden death](#) and [myocarditis is a documented side effect of the shots](#).

So, it appears, the FDA is spreading medical misinformation here.

What’s good for the goose is good for the gander. I got my social media accounts on multiple platforms suspended for saying true things about COVID-19 that ran counter to Public Health™ orthodoxy. Surely the FDA denying proven risks of the COVID-19 shots would cross some similar red line.

Right?

No double standards for federal government bureaucrats, right?

Elon Musk might want to look into [the FDA’s blue-check status](#).

Remember the self-assembling nanoparticle ‘conspiracy theory’? Turns out it’s less theory and more reality

I’m old enough to remember a time when the Public Health™ authorities assured the public that concerns over nanoparticles in vaccines designed to form unnatural structures were the sole domain of “conspiracy theorists.”

Now they’re openly developing [vaccines with “self-assembling nanoparticles”](#) – meaning nanoparticles that form non-human structures in the blood or tissue using a bacterial protein as the foundation.

What could go wrong?

Via [National Institutes of Health \(NIH\)](#):

“Inspiring progress also continues to be made toward a safe and effective vaccine for HIV, which still infects about 1.5 million people around the world each year. A prime example is the recent first-in-human trial of an HIV vaccine made in the lab from a unique protein nanoparticle, a molecular construct measuring just [a few billionths of a meter](#).

This nanoparticle, administered by injection, is designed to mimic a small, highly conserved segment of an HIV protein that allows the virus to bind and infect human cells...

The researchers started with a bacterial protein called lumazine synthase (LumSyn). It forms the scaffold, or structural support, of the **self-assembling nanoparticle**. Then, they added to the LumSyn scaffold 60 copies of the key HIV protein. This louder HIV signal is tailored to draw out and engage those very specific B cells with the potential to produce bnAbs.”

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”
