*COVID Propaganda Roundup: The latest updates on the “new normal” – chronicling the lies, distortions, and abuses by the ruling class. [Excess mortality resulting from the Covid Vaccine starting in early 2021 is not mentioned]*

This week in *gaslighting that will blow your socks off*, The Science™ has conjured a fascinating new scapegoat upon which to heap blame for the growing mountains of dead babies over the past few years.

Via [CNN](#) (emphasis added)

“The infant mortality rate in the United States rose in 2022, the first jump in 20 years, according to data released Thursday by the US Centers for Disease Control and Prevention.

More than 20,500 babies died in 2022 before the age of 1, final records show. Overall, there were 5.6 infant deaths for every 1,000 live births, a 3% increase from the year before.

Infant mortality in the US has been generally trending down since at least 1995, when consistent tracking started, but rates are still much higher in the US than they are in many peer nations. There have been some small upticks over that time, but 2022 was the first time there was a statistically significant increase since 2002, according to the CDC’s National Center for Health Statistics.”

Here is CNN, relying for some reason to make this expert assessment on an *assistant sociology professor*, grasping at straws to blame... drumroll... abortion restrictions for the infant mortality jump, despite the fact that any abortion restrictions due to the overturning of *Roe v Wade* were instituted in the extreme latter half of 2022 and were only in certain states, whereas this study points to a spike in dead babies across the nation.

Continuing:

“Covid-19 also probably played a significant role in the rise in infant mortality in 2022, [demographer and assistant professor of sociology at the University of Colorado Boulder] Stevenson said. Infections in pregnant women who were exposed to the coronavirus during the major surges in 2021 could have affected infants who would be born in 2022...”

Recent research has drawn some connections between infant mortality and abortion restrictions, finding that infant deaths spiked in Texas after the state passed a law in

September 2021 that banned nearly all abortions beyond about six weeks of pregnancy.”

In unrelated news, none other than Robert F. Kennedy Jr. himself recently retweeted one of my articles, which I appreciate greatly and which I view as an inauguration into the big leagues.

They talk about these things (robot soldiers WILL replace humans) as if they were inevitable. We need global treaties on AI weaponry, just as with nuclear weapons, to avoid a Terminator-style dystopian future.<https://t.co/2PgDUj8T9>

# The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

*“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”*

## Reviews

*This is an in-depth resource of great interest if it is the wider perspective you are motivated to understand a little better, the author is very knowledgeable about geopolitics and this comes out in the way Covid is contextualized. —Dr. Mike Yeadon*

*...humanity in which we find ourselves, in this singular, irregular and... liberty and the goodness of people, Chossudovsky’s book is a rock... our fight. —Dr. Emanuel Garcia*

*In fifteen concise science-based chapters, Michel traces the false covid pandemic, explaining how a PCR test, producing up to 97% proven false positives, combined with a relentless 24/7 fear campaign, was able to create a worldwide panic-laden “plandemic”; that this plandemic would never have been possible without the infamous DNA-modifying Polymerase Chain Reaction test - which to this day is being pushed on a majority of innocent people who have no clue. His conclusions are evidenced by renown scientists.*

—Peter Koenig

*Professor Chossudovsky exposes the truth that “there is no causal relationship between the virus and economic variables.” In other words, it was not COVID-19 but, rather, the deliberate implementation of the illogical, scientifically baseless lockdowns that caused the shutdown of the global economy. —David Skripac*

*A reading of Chossudovsky’s book provides a comprehensive lesson in how there is a global coup d’état under way called “The Great Reset” that if not resisted and defeated by freedom*

*loving people everywhere will result in a dystopian future not yet imagined. Pass on this free gift from Professor Chossudovsky before it's too late. You will not find so much valuable information and analysis in one place. -Edward Curtin*
